Subject: Re: Draft Comments on Basin L Stormwater Evaluation Report, Terminal 4 Slip 3 (ECSI 0272) Email 1 of 3
Date: Monday, November 6, 2023 5:13:18 PM

Hello Jeff,

I wanted to follow up to let you know that we have reviewed these three monitoring reports, and we do not have any substantive comments to provide. One item that we wanted to flag is that Section 3.2.3 of the Basin K1 report defines the areas in Equations 1 and 2 as cross-sectional areas when they appear to be surface areas.

Thank you for the opportunity to provide feedback.

Jennifer

Subject: Re: Draft Comments on Basin L Stormwater Evaluation Report, Terminal 4 Slip 3 (ECSI 0272) Email 1 of 3

Hi Jeff,

Thank you for sending these materials. I wanted to confirm that all four emails and six attachments were received. We will try to review these and provide any feedback by November 17.

Best regards,
Jennifer

Subject: Draft Comments on Basin L Stormwater Evaluation Report, Terminal 4 Slip 3 (ECSI 0272) Email 1 of 3

Note: This email originated outside of IEC. Be cautious with any links or attachments.

Greetings-

DEQ is pleased to present this report provided by MFA on behalf of the Port of Portland documenting performance stormwater monitoring related to implementation of a DEQ-approved source control measure (SCM) involving end-of-pipe treatment for PAHs in Basin L in the Terminal 4 Slip 3 upland facility. For your convenience, DEQ is also providing its draft comments on the report.

DEQ is providing these materials as a courtesy and is not specifically asking for input. However, DEQ will consider any comments you wish to provide prior to finalizing its comments on the document. Please disregard the incorrect ECSI number in the file names. It was mistakenly labeled 2345 when it should have been labeled 0272. Sorry for the confusion.

This is the **first of three** emails containing reports received for stormwater source control at Terminal 4. If you plan to provide feedback, please submit to DEQ by COB on Friday November 17.

Please contact me if you have questions in the meantime. Regards,

Jeff K. Schatz, R.G.
