Site Name: Talline Subdivision Date: 09/27/23
Site Address: 62660 NW Skyline Ranch Road, Bend, OR 97703 ECSI #: Not Assigned
Submitted by: Scott Wallace, R.G., Wallace Group Signature: _____
(on behalf of Skyline Ranch NW, LLC)

The criteria listed below identify sites that are good candidates for DEQ's Independent Cleanup Pathway (ICP). If the site contamination conditions at your property result in "No" answers to **all** of the questions below, you are eligible for the ICP.

PLEASE NOTE: You are not required to provide supporting documentation with this Initial Site Screening form if you have answered "No" to all of the questions. You must include the supporting information in the final report.

If your site does not meet the site screening criteria below, the ICP may still be an option. To make that determination, you will need to provide DEQ with enough information for us to complete the Site Assessment Prioritization System (SAPS) score sheet. Please discuss this with DEQ's Voluntary Cleanup Program Representative in the regional office nearest you.

If you do not have enough information about your site to answer these questions, additional site investigation is necessary.

Initial Site Screening Criteria

- ☐ Yes ☒ No Are free-phase products present in the groundwater?
- ☐ Yes ☒ No Has the site contamination impacted an existing drinking water source (groundwater or surface water)?
- ☐ Yes ☒ No Has the soil, groundwater or surface water contamination at the site migrated beyond the property boundary?
- ☐ Yes ☒ No Is the site in or within 1000 feet of a Sensitive Environment as defined in OAR 340-122-115(50)?
- ☐ Yes ☒ No Are contaminant odors present in any buildings, manholes or other confined spaces?
