GENERAL AIR POLLUTION PROCEDURES AND DEFINITIONS

Summary of rule changes: The rule is amended to reflect the latest change to the SIP.

340-200-0040

State of Oregon Clean Air Act Implementation Plan

(1) This implementation plan, consisting of Volumes 2 and 3 of the State of Oregon Air Quality Control Program, contains control strategies, rules and standards prepared by DEQ and is adopted as the State Implementation Plan (SIP) of the State of Oregon under the FCAA, 42 U.S.C.A 7401 to 7671q.

(2) Except as provided in section (3), revisions to the SIP will be made under the EQC's rulemaking procedures in OAR chapter 340, division 11 of this chapter and any other requirements contained in the SIP and will be submitted to the EPA for approval. The SIP was last modified by the EQC on May 23, 2024.

(3) Notwithstanding any other requirement contained in the SIP, DEQ may:

(a) Submit to the EPA any permit condition implementing a rule that is part of the federally-approved SIP as a source-specific SIP revision after DEQ has complied with the public hearings provisions of 40 C.F.R. 51.102; and

(b) Approve the standards submitted by LRAPA if LRAPA adopts verbatim, other than non-substantive differences, any standard that the EQC has adopted, and submit the standards to EPA for approval as a SIP revision.

(4) Revisions to the State of Oregon Clean Air Act Implementation Plan become federally enforceable upon approval by the EPA. If any provision of the federally approved State

Implementation Plan conflicts with any provision adopted by the EQC, DEQ must enforce the more stringent provision.

Klamath Falls Maintenance Area: Requirements for New Sources When Using Residential Wood Fuel-Fired Device Offsets

(1) All new or modified sources subject to OAR 340 division 224 may opt to use wood fuel-fired device emission reductions to satisfy offset requirements;

(2) Offsets for decommissioning fireplaces and non-certified woodstoves (including fireplace inserts) must be obtained at the ratio specified in OAR 340-224-0530, as applicable. One ton of emission reductions from fireplaces and non-certified wood stoves offsets one ton of emissions from a proposed new or modified industrial point source proposed to be located inside or impacting the maintenance area;

(3) Offsets must be obtained from within the Klamath Falls Maintenance Area; and

(4) The emission reductions offsets must be approved by DEQ and comply with OAR 340-240-0560.

Klamath Falls Maintenance Area: Real and Permanent PM_{2.5} and PM₁₀ Offsets

(1) For Klamath Falls and other designated areas when allowed under OAR 340-204-0320, annual emissions reductions offsets for PM_{2.5} and PM₁₀ are determined as follows:

(a) For fireplaces, the emission reductions offsets for decommissioning the fireplace and replacing it with a:

- (A) Certified fireplace insert is 0.02 tons for each replaced device;
 - (B) Pellet stove insert is 0.03 tons for each replaced device; or
 - (C) Alternative non-wood burning heating system is 0.04 tons for each replaced device.
- (b) For non-certified fireplace inserts, the emission reduction for replacing the heating device with a:
- (A) Certified fireplace insert is 0.02 tons for each replaced device;
 - (B) Pellet stove is 0.04 tons for each replaced device; or
 - (C) Alternative non-wood burning heating system is 0.04 tons for each replaced device.
- (c) For conventional (non-certified) woodstoves, the emission reduction for replacing the heating device with a:
- (A) Certified woodstove (including both catalytic and non-catalytic designs) or certified fireplace insert is 0.03 tons for each replaced device; or
 - (B) Pellet stove is 0.05 tons for each replaced device; or
 - (C) Alternative non-wood burning heating system is 0.06 tons for each replaced device.
- (d) For certified woodstoves (including both catalytic and non-catalytic designs), the emission reduction for replacing the heating device with a:
- (A) Pellet stove is 0.03 tons for each replaced device; or
 - (B) Alternative non-wood burning heating system is 0.04 tons for each replaced device
- (2) For the emission reductions identified in section (1) to be considered permanent, the person responsible for taking credit for the emission reductions must obtain and maintain the following records for at least 5 years from the date that the proposed industrial point source commences operation:
- (a) The address of the residence where the emission reduction occurred;
 - (b) The date that the emission reduction was achieved;
 - (c) Purchase and installation records for certified woodstoves, certified inserts, or alternative non-wood burning heating systems;
 - (d) Records for permanently decommissioning fireplaces, if applicable; and

(e) Disposal records for non-certified woodstoves or fireplace inserts removed.

(3) The records identified in section (2) may be provided by a third party authorized and monitored by the DEQ to procure the emission reductions identified in section (1).

(4) All emission reductions must be achieved prior to startup of the proposed source using the emission reductions as offsets in the permitting action specified in OAR 340 division 224.

NOTE: As used in this rule, “Certified” includes catalytic and non-catalytic designs, unless otherwise specified.

GENERAL AIR POLLUTION PROCEDURES AND DEFINITIONS

Summary of rule changes: The rule is amended to reflect the latest change to the SIP.

340-200-0040

State of Oregon Clean Air Act Implementation Plan

(1) This implementation plan, consisting of Volumes 2 and 3 of the State of Oregon Air Quality Control Program, contains control strategies, rules and standards prepared by DEQ and is adopted as the State Implementation Plan (SIP) of the State of Oregon under the FCAA, 42 U.S.C.A 7401 to 7671q.

(2) Except as provided in section (3), revisions to the SIP will be made under the EQC's rulemaking procedures in OAR chapter 340, division 11 of this chapter and any other requirements contained in the SIP and will be submitted to the EPA for approval. The SIP was last modified by the EQC on ~~November 17, 2023~~. **May 23, 2024**.

(3) Notwithstanding any other requirement contained in the SIP, DEQ may:

(a) Submit to the EPA any permit condition implementing a rule that is part of the federally-approved SIP as a source-specific SIP revision after DEQ has complied with the public hearings provisions of 40 C.F.R. 51.102; and

(b) Approve the standards submitted by LRAPA if LRAPA adopts verbatim, other than non-substantive differences, any standard that the EQC has adopted, and submit the standards to EPA for approval as a SIP revision.

(4) Revisions to the State of Oregon Clean Air Act Implementation Plan become federally enforceable upon approval by the EPA. If any provision of the federally approved State

Implementation Plan conflicts with any provision adopted by the EQC, DEQ must enforce the more stringent provision.

Commented [TH1]: Note that this one is a little bit odd--nonattainment area was defined in 204-0030 previously and is not laid out in definition section (0010) as all others are. It could alternatively be moved to -0010 with the other definitions, but it would require renumbering everything after (14).

(southeast corner), west to Township 21 South, Range 2 East, Section 23 (southwest corner) connecting back to Township 21 South, Range 2 East, Section 11 (northwest corner).

(b) The Klamath Falls Maintenance Area for PM2.5 as defined in 340-204-0010, upon maintenance plan approval and redesignation by EPA.

Klamath Falls ~~Nonattainment~~ Maintenance Area: Requirements for New Sources When Using Residential Wood Fuel-Fired Device Offsets

(1) All new or modified sources subject to OAR 340 division 224 may opt to use wood fuel-fired device emission reductions to satisfy offset requirements;

(2) Offsets for decommissioning fireplaces and non-certified woodstoves (including fireplace inserts) must be obtained at the ratio specified in OAR 340-224-0530, as applicable. One ton of emission reductions from fireplaces and non-certified wood stoves offsets one ton of emissions from a proposed new or modified industrial point source proposed to be located inside or impacting the ~~non-attainment area or~~ maintenance area;

(3) Offsets must be obtained from within the Klamath Falls ~~Nonattainment Area and~~ Maintenance Area; and

(4) The emission reductions offsets must be approved by DEQ and comply with OAR 340-240-0560.

NOTE: This rule is included in the State of Oregon Clean Air Act Implementation Plan that EQC adopted under OAR 340-200-0040.

Klamath Falls ~~Nonattainment~~ Maintenance Area: Real and Permanent PM2.5 and PM10 Offsets

(1) For Klamath Falls and other designated areas when allowed under OAR 340-204-0320, annual emissions reductions offsets for PM2.5 and PM10 are determined as follows:

(a) For fireplaces, the emission reductions offsets for decommissioning the fireplace and replacing it with a:

(A) Certified fireplace insert is 0.02 tons for each replaced device;

(B) Pellet stove insert is 0.03 tons for each replaced device; or

(C) Alternative non-wood burning heating system is 0.04 tons for each replaced device.

(b) For non-certified fireplace inserts, the emission reduction for replacing the heating device with a:

(A) Certified fireplace insert is 0.02 tons for each replaced device;

(B) Pellet stove is 0.04 tons for each replaced device; or

(C) Alternative non-wood burning heating system is 0.04 tons for each replaced device.

(c) For conventional (non-certified) woodstoves, the emission reduction for replacing the heating device with a:

(A) Certified woodstove (including both catalytic and non-catalytic designs) or certified fireplace insert is 0.03 tons for each replaced device; or

(B) Pellet stove is 0.05 tons for each replaced device; or

(C) Alternative non-wood burning heating system is 0.06 tons for each replaced device.

(d) For certified woodstoves (including both catalytic and non-catalytic designs), the emission reduction for replacing the heating device with a:

(A) Pellet stove is 0.03 tons for each replaced device; or

(B) Alternative non-wood burning heating system is 0.04 tons for each replaced device

(2) For the emission reductions identified in section (1) to be considered permanent, the person responsible for taking credit for the emission reductions must obtain and maintain the following records for at least 5 years from the date that the proposed industrial point source commences operation:

(a) The address of the residence where the emission reduction occurred;

(b) The date that the emission reduction was achieved;

(c) Purchase and installation records for certified woodstoves, certified inserts, or alternative non-wood burning heating systems;

(d) Records for permanently decommissioning fireplaces, if applicable; and

(e) Disposal records for non-certified woodstoves or fireplace inserts removed.

(3) The records identified in section (2) may be provided by a third party authorized and monitored by the DEQ to procure the emission reductions identified in section (1).

(4) All emission reductions must be achieved prior to startup of the proposed source using the emission reductions as offsets in the permitting action specified in OAR 340 division 224.

NOTE: As used in this rule, "Certified" includes catalytic and non-catalytic designs, unless otherwise specified.

NOTE: This rule is included in the State of Oregon Clean Air Act Implementation Plan that EQC adopted under OAR 340-200-0040.
