**Subject:** Former Mt. Hood Chemical DEQ Request for Resolution of Remaining Issues  
**Attachments:** ICP Letter Agreement.doc

Messrs., Mulflur and Kurosaki

DEQ is prepared to issue the final conditional NFA for the Mt. Hood project, and our understanding is that the following issues remain outstanding and need to be resolved before the issuance of the cNFA:

1. Notification to DEQ who will be responsible for continuing operations and progress reports for the remediation system;
2. DEQ understands that Mr. Kurosaki will be responsible for future costs of DEQ oversight of progress report reviews. Attached is an example agreement for your consideration;
3. Finalize the EES and file it with the property deed;
4. DEQ receipt of payment on the final invoice for the project (issued December 2020); and
5. Finalize the draft November 2020 cNFA to indicate who will be responsible for future costs and any necessary agreement.

DEQ is waiting on resolution and standing by to assist as needed. We can meet with you to discuss any questions regarding the site. Please respond to this email within 30 days.

Thank you

*Jim Orr*
