**RE: Storey Drive Water Line Repairs - COMPLETE**

Dear Resident of Storey Drive,

We are sending you this letter to inform you that the Water Line Repairs on Storey Drive are now complete. The City wishes to thank each resident for their patience and understanding during the repair process. We realize that repeated service interruptions are troublesome. But each of your homes now has a brand-new water service.

The reason for the work on Storey Drive is that the service lines were made of Copper and the connections between the services and mainline were made of unprotected Cast Iron. These materials corroded due to soil conditions in Molalla that were unforeseen back when they were installed in 1996. Your new services are made of polyethylene drinking water pipe and epoxy coated cast iron connections, which is the current standard for public water systems. They should serve your homes for many years.

Again, thank you for your understanding during this long process. You are welcome to call me directly at the City if you have any questions, 503-793-0507 (Cell). Happy Holidays!

Respectfully,

**Andy Peters**
