Roseburg Repair

1-25-24- 3-15-24

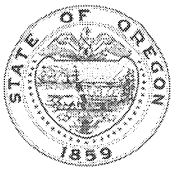

Ron's Oil was completing necessary hydrostatic integrity testing for three year requirement, boots on turbine sumps were failing, and could not repair. Ron's removed concrete around unleaded turbine sump to transition sump, brought to grade. Replaced unleaded turbine sump with new bravo sump. Installed new turbine, new electrical conduit, new sensor conduit. Also realized the interstitial did not have a sensor going to Veeder root. Installed new sensor conduit, secured conduit around interstitial bung hole. Installed new conduit for Interstitial sensor.

Removed concrete and material around premium turbine. Replaced Premium turbine sump with Franklin fueling poly sump. Installed all new electrical, sensor conduits. Installed new turbine and new manifold. Replaced old vapor lines for regular and premium tanks. Brought area to grade and poured concrete. Completed necessary testing to open site.

Coquille Repair
