Re: Hayden Island Cleaners Site, Final Technical Memorandum, Portland, Oregon,  
Task Order Number 88-97-13, E&E Project Number HQ06000

Dear David:

Attached please find one unbound and five bound copies of the Final Technical Memorandum for the Focused Risk Assessment and Beneficial Land and Water Use Survey for the Hayden Island Dry Cleaners Site in the Jantzen Beach area of North Portland. The technical memorandum structure and outline has been prepared in accordance with DEQ's February 23, 1999 Statement of Work.

I asked Julie and Gordon to run the Johnson and Ettinger Heuristic Model for VOCs again using DEQ defaults based on Susan Turnblom's comments on the draft report. I have included both runs on the model using DEQ and EPA defaults as part of Attachment 5 in the technical memorandum.

Should you have any questions regarding the contents of this Technical Memorandum, please do not hesitate to call.

Sincerely,

ECOLOGY AND ENVIRONMENT, INC.

Mark Ochsner  
Task Order Manager

CC: Steve Campbell, DEQ (1 bound copy)
