This

Phase I Environmental Site Assessment

Report for:

Vacant Property

5415 SE 122nd Avenue
Portland, Oregon

Has been prepared for the sole benefit and use of our Client:

Northwest Housing Alternatives

Attn: Destin Ferdun

2316 SE Willard Street
Milwaukie, Oregon 97222

and its assignees

Site Conditions as of June 20, 2022 by:

We declare that, to the best of our professional knowledge and belief, we meet the definition of Environmental Professional as defined in §312.10 of 40 CFR § 312. We have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the subject property. We have developed and performed the all appropriate inquiries requirements in conformance with the standards and practices set forth in 40 CFR Part 312.

Heather Caporaso

Executive Summary

At the request of Northwest Housing Alternatives, this Phase I Environmental Site Assessment (Assessment) has been prepared by EVREN Northwest, Inc. to assess environmental conditions arising from past and present uses at the subject property located at 5415 SE 122nd Avenue in Portland, Oregon 97236 (the “subject property” or “subject site”). The objective of the Phase I Environmental Site Assessment was to:

- Identify potential environmental concerns related to present day or historical on-site chemical use, storage, handling, spillage and/or on-site disposal, focusing on potential degradation of soil and/or ground-water quality.
- Evaluate the potential for off-site activities and environmental contamination to impact the subject site.
- Evaluate natural conditions that may affect the subject site.

The following summarizes the findings of the Phase I Environmental Site Assessment. A more detailed description of the findings will be found in the indicated sections of this report.

Since ENW has performed an environmental assessment at the site documented in a previous report, this assessment freely incorporates observations, findings, and text of the previous report where the information has not changed and is still appropriate; the ability to reference the previous observations also allows additional insight into the more recent observations at the site.

Site Location and Environmental Setting (Section 2.0)

The subject site consists of one tax lot located on the west side of SE 122nd Avenue, east of SE 121st Avenue, and north of SE Harold Street in Portland, Oregon. The site is currently vacant.

The subject property is generally level and the surrounding area slopes to the northwest. The nearest surface water body is Johnson Creek located approximately three-quarter mile to the south. Ground water beneath the subject site is expected to be approximately 23 feet below ground surface. Ground water beneath the area is presumed to mirror surface topography and flow northwest beneath the subject property.

Site Reconnaissance (Section 3.0)

A site reconnaissance was performed at the subject property on June 20, 2022. At the time of site reconnaissance, the subject site was vacant of structures and vegetated with grasses, brush, and Himalayan blackberries. Several areas of the site were obscured from view due to thick and overgrown grasses and blackberries.

No storage of hazardous substances or wastes was observed on site. No ground stains, discoloration, odors, distressed vegetation, or other indications of contaminant impacts were observed during the site visit. There was no physical evidence of any surface spillage, discharges, or emissions of toxic or regulated substances noted on-site at the time of the site reconnaissance.

Historical Site Usage (Section 4.0)

Historical research has indicated that by the late 1940s, the subject site was developed with two residential structures in the southern portion of the site. By the early 1950s, the eastern structure had been removed and by the early 1960s, additional residential structures were constructed in the south-central and northwest area on the subject property. In the early 2000s, additional garages and/or outbuildings were constructed in western areas on site and several stored vehicles were observed in the northern portion. A 2005 City Directory listing for 5395 SE 122nd Avenue was listed as Integrity Auto Inc, which, when mapped, appears associated with the subject site. By 2006, all structures on site had been removed and the site has remained vacant to present day.

Previous investigations on site included a Phase I Environmental Site Assessment (ESA) which identified several recognized environmental conditions (RECs) for the subject property due to historical automobile repair activities on site, stained soils, soil piles from an unknown source, a pipe possibly associated with a former heating oil underground storage tank (UST). Undocumented fill on site was also identified in a geotechnical investigation. A subsequent Phase II ESA was performed on site to address the RECs. No indications of USTs were found through a geophysical survey. Soil samples collected from across the site and in the northeast where stained soils were observed identified metals and petroleum constituents above risk-based concentrations. It was recommended that impacted soils be removed and characterized for disposal, following with confirmation soil sampling prior to redevelopment activities. A Contaminated Media Management Plan (CMMP) was also then prepared for the subject site in May 2022.

Historical research has also indicated that by the mid-1910s, adjacent properties to the south and southeast were residentially developed. By the late 1940s, the west adjacent property was developed with a residential structure and row crops. Additional residential structures were also present to the east during this time and by the early 1950s, the north adjacent property was residentially developed. By 1960, agricultural activities on the west adjacent property had ceased. By the early 2000s, the south and west adjacent properties were redeveloped with the current residential structures. Adjacent areas have been developed with single and multi-family residential structures to present day.

Regulatory Agency Database Records (Section 5.0)

The subject site was not listed in any environmental databases searched by EDR for this Assessment.

Several environmental database-listed facilities were identified within the American Society for Testing and Materials defined database search radii from the subject site. All of the listed facilities are considered unlikely to have impacted the subject site.

Tier I Vapor Encroachment Screen (Section 6.0)

A vapor encroachment screening was completed for the subject property in accordance with ASTM E 2600–10. Based on geology, hydrogeology, ground water flow direction, and other factors in combination with site conditions, previous site investigations, and environmental database research, it is our opinion that a Vapor Encroachment Condition (VEC) cannot be ruled out. However, based on the types of facilities identified, review of readily available regulatory information, previous investigation on site, and/or lack of reported release, the environmental risk to the subject site is low and therefore no further investigation regarding a possible VEC is warranted at this time.

Findings (Section 7.0)

We have performed a Phase I Environmental Site Assessment in conformance with the scope and limitations of American Society for Testing and Materials Standard Practice E 1527 of 5415 SE 122nd Avenue, Portland, Oregon 97236, the property. Any exceptions to, or deletions from, this practice are described in Section 8 of this report.

This assessment has identified no evidence of *recognized environmental conditions* at the subject property, **except for the following:**

- A Phase II ESA was performed on site in November 2021 which identified diesel-range and residual-range organics, ethylbenzene, naphthalene, arsenic, lead, and benzo(a)pyrene in surface soil across the site, and in the area of stained surface soil in the northeast part of the site, at concentrations exceeding risk-based concentrations for the *Soil Ingestion, Dermal Contact, and Inhalation* pathway for a potential residential, urban residential, and/or occupational receptor and/or a future construction worker. ENW recommends that prior to site redevelopment activities, the obvious areas of surface soil impacts should be excavated, characterized, and disposed of in accordance with state and local regulations, as well the collection of confirmation soil samples from excavated areas to document that petroleum-impacted soil had been adequately removed and the site should be reassessed for residual risk. A CMMP has also been prepared under a separate cover to assist in the proper handling, management, and disposal of the remaining impacted soils on site.

This assessment has identified the following *historical recognized environmental conditions* at the subject property:

- During the 2021 Phase I ESA, a soil pile and mixed soil and wood chip pile were observed in the northeast area of the site. As the source of soil in this pile was unknown, there was the potential for it to have originated from an impacted site. The soil pile was sampled during the 2021 Phase II ESA and analyzed for petroleum hydrocarbons and metals. Results were either non-detect or were detected below background levels and risk-based concentrations. Due to overgrown vegetation during the 2022 Phase I ESA site visit, it could not be confirmed whether this pile remains on site or has been removed.
- Records regarding how the former buildings on site were heated were not found, and based on the date of initial construction, it is possible that heating oil was used. Furthermore, a pipe was observed on the southwest part of the site during a previous Phase I ESA and the possibility of this pipe being associated with a UST was noted. A geophysical survey was performed on site during the 2021 Phase II ESA, which did not find any magnetic anomalies indicative of abandoned USTs.

Data Gaps (Section 8.0)

No significant data gaps were identified during this investigation.

1.0 Introduction

At the request of Northwest Housing Alternatives (Client), this Phase I Environmental Site Assessment has been prepared by EVREN Northwest, Inc. (ENW) to assess environmental conditions arising from past and present uses at the property located at 5415 SE 122nd Avenue in Portland, Oregon 97236 (subject property).

1.1 Authorization

Destin Ferdun, representative of the Client, authorized the scope of work on June 10, 2022. ENW understands this report will be used to assist in evaluating environmental issues and subject property conditions. This report was prepared for the exclusive use of the Client, its affiliates, and its legal counsels.

1.2 Objective

The objective of this Assessment was to provide an independent, professional opinion regarding *recognized environmental conditions (RECs)*, as defined by the American Society for Testing and Materials (ASTM), associated with the subject property.

The term *recognized environmental conditions* is defined as the presence or likely presence of any hazardous substances or petroleum products in, on, or at a property: (1) due to any release to the environment; (2) under conditions indicative of a release to the environment; or (3) under conditions that pose a material threat of a future release to the environment. *De minimis* conditions are not *recognized environmental conditions*. In addition, environmental conditions that in the past would have been considered a *recognized environmental condition*, but which may or may not be considered a *recognized environmental condition* currently, are identified as *historical recognized environmental conditions* or *controlled recognized environmental conditions* in this report. A Historical Recognized Environmental Condition (HREC) refers to a past release that has been remediated to below “residential” standards and given regulatory closure with no use restrictions. The HREC category is distinct from the Controlled Recognized Environmental Condition (CREC), which applies to sites that have received regulatory closure, but which are still subject to controls.

1.3 Scope

The Phase I Assessment was performed under the conditions of, and in accordance with, the guidelines outlined in ASTM E 1527-21. This standard, while subject to changes (as are all ASTM standards), is recognized as meeting the due diligence provisions of the federal statute [Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA); 42 USC 9601(35) (B)] and the Oregon Revised Statutes (ORS) 465.255(2)(a) at the time this report was prepared. ASTM E 1527-21 satisfies the elements of the U.S. Environmental Protection Agency (EPA) All Appropriate Inquiry (AAI) rule, which establishes requirements that purchasers must meet to limit their environmental liability under CERCLA and qualify for liability protections, including the “Innocent Purchaser”, “Bona Fide Prospective Purchaser”, and “Contiguous Property Owner” liability defenses that are provided by CERCLA.

Elements not included in ASTM E 1527-21 (e.g., identification, sampling, and analysis of asbestos, radon, lead paint, and lead in drinking water and/or wetlands; regulatory compliance; cultural and historic

resources; indoor air quality and vapor intrusion including the potential presence of mold or other biological contaminants; industrial hygiene; health and safety; ecological resources; and endangered species) were also not included in our scope of services.

The Phase I ESA process is not a means of “finding everything there is to know about a property”. Rather, it is an effort to evaluate the environmental liabilities associated with a property based on reasonably available information (both oral and written) within the budget, schedule, and project-specific limitations, all in accordance with the EPA’s AAI rule.

The Phase I included the following components:

- A walk-through, reconnaissance-level visit of the subject site.
- Review of readily available historical aerial photographs, maps, and city directories to evaluate the subject site setting and history of land usage.
- Review of readily available regulatory databases and records pertaining to hazardous materials use, storage, handling, and disposal/release on the subject site and neighboring properties.
- Interview of current owner and/or other knowledgeable sources, if available.
- Evaluation of information gathered and preparation of this report.

Heather Caporaso, Senior Environmental Scientist for ENW, conducted the subject property walkthrough portion of the Phase I Environmental Site Assessment on June 20, 2022. Resumes for the environmental professionals involved in this assessment are included in Appendix A. References for information included in this Assessment report are included in Appendix B and photographs taken at the time of the assessment are included in Appendix C.

2.0 Site Location and Environmental Setting

2.1 Location and Legal Description

The site consists of one tax lot in Portland, Multnomah County, Oregon (Figures 1 and 2). The subject property location and legal description are further summarized in Table 2-1 below.

Table 2-1. Property Identification

Situs	County Identification	Tax Lot	Current Occupancy/Use	Owner	Size (acres)
5415 SE 122nd Avenue	R335469	1S2E15AD 9300	Vacant	LMC Inc	0.59

2.2 Site and Vicinity Description

The subject property is located on the west side of SE 122nd Avenue, east of SE 121st Avenue, and north of SE Harold Street in Portland, Oregon. The subject property is rectangular in outline, measures approximately 0.59 acres and is currently vacant. A more detailed description of the site development is presented in Section 3.0. A site plan showing primary features of the site is presented as Figure 3.

2.3 Surrounding Properties

The vicinity of the subject property is developed with residential and commercial properties. Adjoining and nearby surrounding properties are presented in Table 2-2.

Table 2-2. Surrounding Properties

Direction	Description
North	Single-family residential
East	SE 122 nd Avenue; single-family residential
South	Multi-family residential
West	SE 121 st Avenue; single-family residential

2.4 Topography

The subject site is located within the U.S. Geological Survey Gladstone, OR 7.5-minute quadrangle, at an approximate elevation of 212 feet above mean sea level (see Figure 1). The subject property is generally level and the surrounding area slopes to the northwest.

2.5 Geologic Setting

The site is located within the Portland Basin of Oregon and southern Washington. The Portland Basin is located between the Cascade Range on the east and the Portland Hills on the west. The Portland Basin is underlain by fluvial and flood deposits of the Columbia River and Willamette River and their tributaries, and glacial outburst flood deposits of the late Pleistocene Missoula Floods which have been mapped at up to 400 feet elevation above mean sea level. Isolated monogenetic volcanic centers of late Miocene through Pleistocene age are scattered through the Portland area, including several local topographic prominences, e.g., Kelly Butte to the northwest, Mt. Scott to the south, and Powell Butte to the east of the site.

During the late Pleistocene (approximately 12,000 years ago), numerous catastrophic floods swept into the Portland Basin through the Columbia River Gorge to the east. The floods deposited great thicknesses of sediments within the basin. The subject site is located on coarse-grained facies of the catastrophic flood deposits. These sediments are typically composed of pebble to boulder gravel within a silt and coarse sand matrix in this area. These coarse sediments are poorly sorted and moderately to well rounded.¹

During the past 10 years, various federal and state agencies and academic specialists have performed earthquake studies in the Pacific Northwest. Oregon is located at the western edge of the North American plate and western Oregon may experience seismic events originating from shallow moderate-size crustal earthquakes, deeper and larger “Benioff Zone” earthquakes, and subduction zone “megaquakes” along the plate margin off the Oregon coast. The Oregon Department of Geology and Mineral Industries (ODOGAMI) has released a series of earthquake hazard maps for Oregon. The agency’s hazard map for the state (ODOGAMI Geological Map Series GMS-100, 1996) indicates that the Portland area may

¹ Madin, I.P., 1990, *Earthquake-Hazard Geology Maps of the Portland Metropolitan Area, Oregon: Text and Map Explanation*: Oregon Department of Geology and Mineral Industries Open-File Report 0-90-2, 21 pages plus 8 maps.

experience peak ground acceleration at up to 26% that of gravity for predicted maximum seismic event with a 5% chance of occurrence in any 50-year period. The predicted acceleration is capable of producing moderate damage to ordinary structures and considerable damage in poorly built structures. The site is projected to fall in a zone of moderate relative potential seismic hazard.

2.6 Hydrogeologic Setting

2.6.1 Surface Water

The subject property is generally level and the vicinity slopes to the northwest. Consequently, surface drainage in the surrounding areas is expected to be directed northwest. There are no natural surface waters on site. The nearest surface water body is Johnson Creek located approximately three-quarter mile to the south.

The site is outside the 100-year flood plain and inside the 500-year flood plains per the Federal Emergency Management Agency. The National Wetland Inventory referenced by Environmental Data Resources, Inc. (EDR), suggests that no wetlands are present on the subject site.

2.6.2 Ground Water

ENW accessed the USGS Oregon Water Science Center (OWSC) Depth to Ground Water in the Portland, Oregon Area online mapper to determine ground-water conditions at the subject site. Per the OWSC, depth to ground water at the subject site is expected to be approximately 23 feet below ground surface; however shallower “perched” ground water may be present.

Additionally, ENW accessed the State of Oregon Water Resources Department (OWRD) online database for well logs pertaining to the subject site. This database had no records pertaining to the subject site.

For the purposes of this report, it is assumed that shallow ground water flow generally mimics surface water flow (i.e., from topographic highs to lows). However, multiple factors can affect the direction of ground-water flow in subsurface layers including, but not limited to, sediment/rock type, subsurface utility lines, buried river valleys, and stream beds, folds, fractures, and faults. The direction of ground water flow in the subject area is generally expected to be to the northwest, based on the local and regional topography.

3.0 Site Reconnaissance

ENW performed the field inspection described in this section on June 20, 2022. The site reconnaissance survey was performed by Heather Caporaso. Observations during the site reconnaissance are summarized below.

3.1 Observations

At the time of site reconnaissance, the subject site was vacant of structures and vegetated with grasses, brush, and Himalayan blackberries. Several areas of the site were obscured from view due to thick and overgrown grasses and blackberries. Some scattered household refuse was observed in the northern

portion of the site. A fenced perimeter was also noted around the subject property. Wrecked car storage was observed off-site on the north adjacent property.

3.1.1 Utilities

The following utility connections were observed or reported to be present at the subject site:

Electricity: none

Natural Gas: none

Water: none; City of Portland available

Sewer: none; City of Portland available

Heating/Cooling: none

3.2 Interviews

Destin Ferdun, representative of the Client, completed a user questionnaire for the subject site provided by ENW. The representative stated to have checked for and been unaware of any environmental liens in place against the subject site. They stated to be aware of possible activity and use limitations involving the subject site and listed several easements found within the property deed; however, none of these were of environmental concern. They stated to have no specialized knowledge that might indicate past or present use of hazardous substances on site or nearby. The representative reported that the purchase price is not significantly below fair market value. They added to have knowledge of any obvious indicators of possible impacts on or near the site and noted that a previous Phase I ESA observed stained soils on site, and that a previous geotechnical report identified undocumented fill on the subject property.

Christopher Duffin, representative of the property owner, completed an environmental questionnaire pertaining to the subject site provided by ENW. The representative responded “No” or “Unknown” to all questions.

3.3 Hazardous Substances and Wastes

During the site reconnaissance, the subject property was assessed for signs of storage, use or disposal of hazardous substances. The assessment consisted of noting evidence (e.g. drums, unusual vegetation patterns, staining) indicating that hazardous substances are currently or were previously located on the subject property.

- No storage of hazardous substances or wastes was observed on site; however, stained soils were previously observed in the northeast portion of the subject property.

3.4 Storage Tanks

3.4.1 Underground Storage Tanks (USTs)

The subject property was inspected for evidence of underground storage tank (UST) systems by inspecting exterior and interior areas for fill ports, vent piping, evidence of dispensing equipment or ancillary containment, and patches in pavement where USTs may have been removed previously.

- No evidence of USTs was observed during site reconnaissance.

- A previous geophysical survey performed in November 2021 did not identify any magnetic anomalies indicative of abandoned heating oil tanks or any other features of environmental concern at the subject site.

3.4.2 Above Ground Storage Tanks (ASTs)

The subject property was inspected for evidence of ASTs; e.g. concrete foundations, saddles, pedestals, or steel support structures.

- No evidence of ASTs was observed on site during the site reconnaissance.

3.4.3 In-Ground Hydraulic Equipment

The subject property was inspected for evidence of in-ground hydraulic equipment (e.g. hydraulic elevators or lifts that have hydraulic fluid-containing reservoirs or jacks below ground surface).

- No evidence of in-ground hydraulic equipment was observed on site.

3.5 Solid Waste Disposal

Solid waste is not currently generated on site. Scattered household refuse was observed in the northern portion of the site.

3.6 Polychlorinated Biphenyls (PCBs)

The subject property was inspected for the presence of liquid-cooled electrical units (e.g. transformers and capacitors) and major sources of hydraulic fluid (e.g. elevators and lifts). Such units are notable because they may be potential polychlorinated biphenyls (PCB) sources.

- No electrical transformers were observed on site. A pole-mounted transformer was observed off-site to the east and appeared in good condition. Should this transformer fail in the future, the local electricity provider should be immediately notified.

3.7 Water, Wastewater, and Storm Water Discharge

Storm water on site infiltrates the ground surface.

3.7.1 Discharge Sources

Evidence of industrial, process or other discharge sources was not observed at the subject property.

3.7.2 Oil/Water Separators, Clarifiers, Sumps, and Trenches

The subject property was inspected for evidence of oil/water separators, clarifiers, sumps and trenches (e.g. hatches, manholes, and patches on the floor slabs). Although not regulated as USTs, these features can be of concern due to the potential for leaks into the subsurface.

- No evidence of oil/water separators, clarifiers, sumps or trenches was observed on site.

3.7.3 Sanitary Systems

The subject property was inspected for evidence of current or former septic systems (e.g. clean out manhole, records, and interviews).

- No evidence of septic systems or cesspools was observed during the site reconnaissance visit.
- Records obtained from Portlandmaps.com identified a permit for a decommissioned septic tank on the subject property. See Section 4.1.2. for further information. Additionally, a geophysical survey performed on site in 2021 identified a magnetic anomaly that was interpreted as a potential septic system.
 - o Should a septic system remain on site, ENW recommends the proper decommissioning of the septic system prior to any redevelopment activities in accordance with state and local regulations.

3.8 Wells

The subject property was inspected for evidence of wells (e.g. potable supply, irrigation, monitoring, extraction, dry, injection).

- No evidence of wells was observed on site.

3.9 Non-Scope Considerations

ASTM guidance states that environmental issues or conditions that parties may wish to assess in connection with commercial real estate but that are outside the scope of the E 1527-21 guidance document are called *Non-Scope Considerations*. Non-Scope Considerations also include those substances in quantities and under conditions that may lead to contamination of the property or of nearby properties, but which are not included in CERCLA's [the Comprehensive Environmental Response, Compensation, and Liability Act of 1980] definition of hazardous substances, or do not otherwise present potential CERCLA liability. *There is no requirement for an assessor to inquire into non-scope considerations in connection with an environmental site assessment.* Specifically included in non-scope considerations are the following: asbestos-containing materials, radon, lead-based paint, lead in drinking water, wetlands, regulatory compliance, cultural and historical resources, industrial hygiene, health and safety, ecological resources, endangered species, indoor air quality and high voltage powerlines, as well as emerging contaminants.

ENW advises the following regarding certain non-scope considerations.

3.9.1 Asbestos

Asbestos-containing building materials (ACBMs) were not assessed as part of this assessment. OSHA rules presume that building products installed before 1981 contain asbestos (such products are defined as presumed asbestos-containing materials or PACMs). Because there are currently no buildings on site, ACBMs are not expected to be present at the subject property.

3.9.2 Lead-Based Paint

Lead-based paint (LBP) was not surveyed as part of this assessment. Because there are currently no buildings on site, LBP is not expected to be present at the subject property.

3.9.3 Radon

In 1993, the EPA's Office of Radiation and Indoor Air, in conjunction with the USGS, studied radon found in indoor air of homes. The study determined that Multnomah County is in Radon Zone 2. Zone 2 areas are predicted to have an average indoor radon screening potential of greater than 2-pCi/L (picoCuries/Liter) and less than 4-pCi/L, which is lower than the EPA action level of 4-pCi/L.

The Oregon Department of Human Services maintains records on long-term radon concentration determinations accessible by Zip Code. For Zip Code 97236, the agency has on record 11 radon tests, for which the maximum was 12-pCi/L and the minimum was 0.5-pCi/L. The average was 3.3-pCi/L, with two determinations exceeding the EPA's 4-pCi/L action level.

3.9.4 Mold

Some varieties of molds have been demonstrated to have toxic properties, especially to those human receptors that appear to have higher sensitivity. No evidence of mold growth or water intrusion was observed during site reconnaissance.

3.9.5 Perfluorooctyl and Polyfluoroalkyl Substances

Perfluorooctyl sulfonate (PFOS) and polyfluoroalkyl substances (PFAS) are considered emerging contaminants, as they are continually undergoing research by the EPA. PFOS/PFAS are persistent and widely used chemicals that have been found in various medias as well as in the blood of humans and animals worldwide. PFOS/PFAS have been known to be used in various products such as firefighting suppressant, Teflon, waterproof material, and metal finishing. Based upon current and historical usage of the subject site, the subject property is not expected to have been impacted by PFAS and PFOS.

4.0 Site History

4.1 Agency Contacts

4.1.1 Building Department

ENW contacted the City of Portland and researched their geographical information system database at www.PortlandMaps.com to obtain historical building permits for the subject property. Permits of potential interest are summarized below.

- A permit dated July 1954 for 5413 SE 122nd Avenue was issued for a land use change to furniture manufacturing and cabinet work.
- A permit dated February 1985 for 5413 SE 122nd Avenue was issued for a wood stove.

- A permit dated June 2006 for 5403 SE 122nd Avenue was issued for the demolition of a northern residence.
- A permit dated June 2006 for 5413 SE 122nd Avenue was issued for the demolition of a southern residence, which also identified a decommissioned septic tank associated with the residence.
- A nuisance permit dated December 2013 for 5403 SE 122nd was issued for the abandonment of tires and other debris on site.

4.1.2 Fire and Health Departments

ENW reviewed the Oregon State Fire Marshal's (OSFM) databases for incidents and hazmat response.

- The subject property address was not listed in any of the OSFM databases.

ENW accessed the US Drug Enforcement Agency's online Clandestine Lab Records for information related to drug labs at the subject site.

- No records pertaining to the subject site were found.

ENW accessed PortlandMaps.com for records relating to cesspools or septic tanks at the subject site.

- A permit dated June 2006 for 5413 SE 122nd Avenue identified a decommissioned septic tank associated with the southern residence on site. No other information on the septic tank was found.
 - A geophysical survey performed on site in 2021 identified a magnetic anomaly that was interpreted as a potential septic system. Should a septic system remain on site, ENW recommends the proper decommissioning of the septic system prior to any redevelopment activities in accordance with state and local regulations.

Additionally, ENW contacted Portland Fire and Rescue pertaining to hazardous substance spill incidents, fire department responses, and USTs and ASTs at the subject site.

- They reported to have no records of hazardous substance spill incidents or other fire department responses for the subject site.
- They reported to have no tank records pertaining to the subject site.

4.1.3 Oregon Department of Environmental Quality

The Oregon Department of Environmental Quality (ODEQ)-Northwest Region maintains the Facility Profiler-Lite Interactive Database, GIS mapping application showing which of ODEQ's programs are active at given locations. Additionally, program database listings are available through an online public records request submission through ODEQ's website.

- The subject site was not listed in any ODEQ programs tracked by the Facility Profiler-Lite or reported through the public records request.

4.1.4 Multnomah County Assessor's Office

ENW contacted the Multnomah County Assessor's Office to obtain ownership records for the subject site (Appendix D). Based on this research, the subject site is currently owned by LMC Inc.

- The Assessor's Jacket for the subject site was requested and it was reported that only an appraisal card was available. The appraisal card did not contain any information of potential environmental significance.

4.2 Title Report

A Preliminary Title Report was provided by the Client for the subject property (Appendix D). Title to the subject property is vested in LMC Inc.

- No environmental liens or activity and use limitations were identified in the title report.

4.3 Standard Historical Resources

The following standard historical resources were reviewed by ENW to assess subject site and adjoining property development and use history:

Aerial Photographs. Regional aerial photographs for 1936, 1948, 1952, 1960, 1963, 1970, 1975, 1981, 1994, 2000, 2005, 2006, 2009, 2012, 2016, and 2021 were obtained from EDR and Google Earth for this assessment. Aerial photographs reviewed for this assessment are presented in Appendix E.

Topographic Maps. Historical topographic maps include symbols that represent such features as streets, buildings, streams, vegetation, infrastructure, and legal boundaries. The maps are regularly refined to better relate area conditions and cultural changes. Therefore, historical topographic maps may be of use in understanding a site's history. Topographic Maps were reviewed for the following years: 1914, 1939/1940, 1941, 1954, 1961, 1970, 1984, and 2014. Topographic maps reviewed for this assessment are presented in Appendix F.

Sanborn Fire Insurance Maps. ENW requested historical Sanborn Fire Insurance Maps from EDR for the subject property and immediate surrounding areas. Sanborn Map coverage was unavailable for the subject site and its vicinity. See Appendix G for a statement reflecting this.

City Directories. ENW requested an historical city directory search for the subject site and surrounding areas from EDR. The city directories were reviewed at least in 5-year intervals, if available, and spanned the years 1924 through 2017. The EDR City Directory Report is presented in Appendix H.

4.3.1 Summary – Subject Site

The following is a summary of the subject site as interpreted from aerial photographs, topographic maps, Sanborn Fire Insurance Maps, and city directory search:

Year	Observation	Source
1915	The subject site is vacant of structures.	Topographic Maps
1939 through 1970	The subject property is developed with at least one structure and by 1948, two residential structures were present in the southern half of the site. Between the early 1950s and early 1960s, several residential structures were added to the site.	Aerial Photographs, Topographic Maps, City Directories
1975 through 2000	By 1975, a fifth residential structure had been added to the north portion of the site. Otherwise, no significant changes were noted for the subject site.	Aerial Photographs, Topographic Maps, City Directories
2005	By 2005, the subject site had been developed with several garages and/or outbuildings in the northwest corner of the site, and several parked vehicles were observed to the north of the northern residence. A large metal-roofed garage/outbuilding was also observed in the southwest near the southern residence. City directories from this time identified the site to be occupied by Integrity Auto Inc under the possible alternative address of 5395 SE 122 nd Avenue.	Aerial Photographs, Topographic Maps, City Directories
2009 through 2021	By 2009, all previous structures and vehicles had been removed from the subject property and the site remained vacant with vegetated areas. The site has been thusly occupied with vegetation to present day.	Aerial Photographs, Topographic Maps, City Directories

4.3.2 Summary – Adjoining Sites

The following is a summary of the adjoining sites as interpreted from aerial photographs, topographic maps, Sanborn Fire Insurance Maps, and city directory search:

Year	Observation	Source
1914	SE 122 nd Avenue had been constructed to the adjacent east of the site and residential structures were present to the adjacent south and southeast. Adjacent properties to the north and west were vacant.	Topographic Maps
1948 through 1955	By 1948, the west adjacent property was occupied with a residential structure and row crops and additional residential structures were added to the east adjacent property. The north adjacent property was occupied by a vacant field at this time.	Aerial Photographs, Topographic Maps, City Directories

Year	Observation	Source
	By the early 1950s, the north adjacent property was developed with a single-family residence.	
1960 through 1994	By 1960, agricultural activities at the west adjacent property had ceased and a single-family residence remained. Otherwise, no significant changes were noted for the adjacent areas.	Aerial Photographs, Topographic Maps, City Directories
2000 through 2021	By 2000, the south and west adjacent properties had been redeveloped with the current multi- and single-family residential structures. Adjacent areas have been developed with single and multi-family residential structures to present day.	Aerial Photographs, Topographic Maps, City Directories

4.4 Previous Environmental Reports or Documents

4.4.1 Geo Consultants Northwest, Geotechnical Evaluation, 13 July 2021.

In July 2021, Geo Consultants Northwest (GCN) prepared a geotechnical investigation of the subject site which included the excavation of four test pits on site. Test pits were advanced to 20 feet below ground surface and it was stated that ground water was not encountered. GCN identified one to three feet of silty soil fill with gravel, cobbles, boulders, brick fragments and other construction debris in Test Pits 1A, 2, 3 and 4. GCN recommended to completely remove areas of fill in this area of the site. The source of fill is not documented.

4.4.2 EVREN Northwest, Phase I Environmental Site Assessment, 23 August 2021.

In August 2021, ENW prepared a Phase I ESA for the subject property. At the time of the report, the subject site was occupied as it currently appears with vacant vegetation. Multiple recognized environmental conditions were found for the subject site which included:

- A 2005 City Directory listing for 5395 SE 122nd Avenue was listed as Integrity Auto Inc, which, when mapped, is possibly associated with the subject site. Additionally, historical aerial photographs indicate the storage of several vehicles in the northern portion of the site and during site reconnaissance, several areas of stained soils were observed in the northeast. ENW recommended further investigation into the historical automobile practices on site, including an investigation into stained soils of the northeast.
- During site reconnaissance, a soil pile and mixed soil and wood chip pile were observed in the northeast area of the site. The sources of these soil piles are unknown and have the potential to have originated from an area of impacted materials. As such, ENW recommended further investigation into the soil piles on site.
- Records regarding how the former buildings on site were heated were not found, and based on the date of initial construction, it is possible that heating oil was used. Furthermore, a pipe was

observed on the southwest part of the site. While of unknown use, there is a possibility that the pipe could be associated with a heating oil tank. ENW recommended a geophysical survey to assess for the possible presence or absence of subsurface features such as underground heating oil tanks on site.

- A geotechnical report from July 2021 indicated the presence of undocumented fill on site. Undocumented fill may contain hazardous constituents. As such, ENW recommended further investigation of the nature of fill soils on site.

4.4.3 EVREN Northwest, Focused Phase II Environmental Site Assessment, 1 November 2021.

In October 2021, a Phase II ESA was performed to further investigate the previously identified recognized environmental conditions (Section 4.4.2). The Phase II ESA included a geophysical survey, collection of a composite soil sample from a stockpile of unknown origin, and collection of surface soil samples from accessible areas of the site using incremental sampling methodology. The geophysical survey identified five magnetic anomalies, none of which were determined to be active or abandoned heating oil tanks or any other features of environmental concern upon further inspection. One of the magnetic anomalies (MA04) was suggestive of a possible septic tank. Soil sampling results indicated diesel-range and residual-range organics, ethylbenzene, naphthalene, arsenic, lead, and benzo(a)pyrene in surface soil across the site and in the area of stained surface soil in the northeast part of the site. Residual soil impacts exceeded generic risk-based concentrations for Soil Ingestion, Dermal Contact, and Inhalation pathway for a potential residential, urban residential, and/or occupational receptor and/or a future construction worker. ENW recommended that prior to site redevelopment, obvious areas of surface soil impacts should be excavated, characterized, and disposed of in accordance with state and local regulations, as well the collection of confirmation soil samples from excavated areas to document that petroleum-impacted soil had been adequately removed and the site should be reassessed for residual risk.

ENW also recommended the preparation of Contaminated Media Management Plan (CMMP) to assist in the proper handling, management, and disposal of remaining impacted soils on site. A CMMP was prepared by ENW for the subject property in May 2022.

4.5 Summary of Site History

Historical research has indicated that by the late 1940s, the subject site was developed with two residential structures in the southern portion of the site. By the early 1950s, the eastern structure had been removed and by the early 1960s, additional residential structures were constructed in the south-central and northwest area on the subject property. In the early 2000s, additional garages and/or outbuildings were constructed in western areas on site and several stored vehicles were observed in the northern portion. A 2005 City Directory listing for 5395 SE 122nd Avenue was listed as Integrity Auto Inc, which, when mapped, appears associated with the subject site. By 2006, all structures on site had been removed and the site has remained vacant to present day.

Previous investigations on site included a Phase I Environmental Site Assessment (ESA) which identified several recognized environmental conditions (RECs) for the subject property due to historical automobile repair activities on site, stained soils, soil piles from an unknown source, a pipe possibly associated with a former heating oil underground storage tank (UST). Undocumented fill on site was also identified in a

geotechnical investigation. A subsequent Phase II ESA was performed on site to address the RECs. No indications of USTs were found through a geophysical survey. Soil samples collected from across the site and in the northeast where stained soils were observed identified metals and petroleum constituents above risk-based concentrations. It was recommended that impacted soils be removed and characterized for disposal, following with confirmation soil sampling prior to redevelopment activities. A Contaminated Media Management Plan (CMMP) was also then prepared for the subject site in May 2022.

Historical research has also indicated that by the mid-1910s, adjacent properties to the south and southeast were residentially developed. By the late 1940s, the west adjacent property was developed with a residential structure and row crops. Additional residential structures were also present to the east during this time and by the early 1950s, the north adjacent property was residentially developed. By 1960, agricultural activities on the west adjacent property had ceased. By the early 2000s, the south and west adjacent properties were redeveloped with the current residential structures. Adjacent areas have been developed with single and multi-family residential structures to present day.

5.0 Regulatory Agency Records

During this investigation, ENW reviewed various published hazardous site lists and records to locate facilities within the suggested ASTM E 1527-21 search radii that could pose an environmental threat to the site. ENW utilized the service of EDR for the most currently available information. The accuracy of the information provided by EDR is constrained by the limits of care and professional skill exercised by EDR and its sources. The list of federal and state databases accessed by EDR satisfies ASTM Standards and is provided in Appendix I. Included is a digitized map showing the keyed location of mapped sites listed in the searched databases. The keyed locations are identified and described in Appendix I, the printout of the database search. The results of the review are summarized in the following subsections.

Table 5-1. State and Federal Database Listings

Database	Search Radius (mile)	Subject Property	Adjacent Properties	Additional Properties of Potential Concern
Federal NPL or Delisted NPL	1.00	N	N	N
Federal CERCLIS	0.50	N	N	N
Federal CERCLIS-NFRAP	0.50	N	N	N
Federal CORRACTS	1.00	N	N	N
Federal RCRA-TSDF	0.50	N	N	N
Federal RCRA Generators Site (LQG, SQG, CESQG, NonGen/NLR)	0.25	N	N	N
Federal IC/EC	Subject Site	N	N	N
Federal ERNS	Subject Site	N	N	N
State/Tribal Equivalent NPL	1.00	N	N	N
State/Tribal Equivalent CERCLIS	1.00	N	N	Y
State/Tribal Equivalent Landfill/Solid Waste Disposal	0.50	N	N	N
State/Tribal Registered Storage Tank (AST/UST)	0.25	N	N	N

Database	Search Radius (mile)	Subject Property	Adjacent Properties	Additional Properties of Potential Concern
State/Tribal Leaking Underground Storage Tank	0.50	N	N	N
State/Tribal IC/EC	Subject Site	N	N	N
State/Tribal Voluntary Cleanup	0.50	N	N	N
State/Tribal Spills	0.50	N	N	N
Federal Brownfields	0.50	N	N	N
State Brownfields	0.50	N	N	N
EDR US Historical Auto Station	0.125	N	N	N
EDR US Historical Cleaners	0.125	N	N	Y

5.1 Subject Site Listings

The subject site was not identified in any environmental databases accessed by EDR for this assessment.

5.2 Adjacent Property Listings

No adjacent properties were identified in environmental databases accessed by EDR for this assessment.

5.3 Additional Properties of Potential Concern

The following additional properties of potential concern are discussed below:

- 5530 SE 122nd Avenue: Located approximately 450 feet to the southeast of the subject site, this facility was listed in the EDR Historical Dry Cleaner and Environmental Cleanup Site Information (ECSI) databases.
 - o The EDR Historical Dry Cleaner database identified the facility as a self-serve laundry for the years 1955, 1967, and 1970.
 - o The ECSI database listed the facility as Beggard Tick Automotive and it was assigned ECSI ID 2628 due to the improper disposal of waste oil and grease to a dry well for over a 13-year period. ODEQ stated that there was a possibility of surface and subsurface soil contamination, as well a possible contaminant pathway to shallow ground water via the dry well. As of 2009, the facility was listed as a suspect facility, requiring further investigation.

Based on depth to ground water and distal location from the subject site, this facility is considered unlikely to have impacted the subject site.

No other additional properties of potential concern were identified within the ASTM search radii for the databases searched by EDR for this Assessment.

5.4 Unmapped Properties

There were six unmapped facilities listed in the Radius Report from EDR. Based on a review of location and/or regulatory history, these unmapped facilities are considered unlikely to impact the subject site.

6.0 Tier 1 Vapor Encroachment Screen

In June 2010, ASTM International released a new guidance document entitled “Standard Guide for Vapor Encroachment Screening on Property Involved in Real Estate Transactions” [Designation E 2600–10]. The purpose of the guidance is to provide practical guidance and a useful process for conducting a Vapor Encroachment Screen (VES). It should be emphasized that the VES is neither a requirement nor an element of a Practice E1527 Phase I Environmental Site Assessment, or of an AAI assessment of the US Environmental Protection Agency. The VES provides a multi-tier screening protocol for assessing the potential for vapor intrusion of hazardous substances into buildings located on a property being evaluated for a potential real estate transaction, with the purpose of identifying *Vapor Encroachment Conditions (VECs)*, defined as the presence or likely presence of Chemicals of Concern (COCs) vapors in the subsurface of a target property caused by the release of hazardous vapors from contaminated soil or ground water.

Vapor intrusion occurs when chemicals migrate into a building, usually from volatilization of chemicals in soil or groundwater beneath the building. The ultimate source of the hazardous materials may also include offsite locations if dissolved within or floating on groundwater or by soil gas migration. ASTM E2600-10 recognizes that petroleum hydrocarbon COCs (e.g., gasoline, diesel, kerosene, jet fuel) are a subset of COCs that have the propensity for rapid degradation in the presence of oxidizing conditions. Vapor intrusion is a concern because chemical concentrations have been detected in buildings at levels that pose a health risk. The Tier 1 VES process is very conservative and results in one of four findings:

- 1) a VEC exists,
- 2) a VEC likely exists,
- 3) a VEC cannot be ruled out, or
- 4) a VEC can be ruled out because a VEC does not exist or is not likely to exist.

6.1 Findings

A review of regulatory database records indicates a few facilities of concern are located within the ASTM 2600-10 *approximate minimum search distance* from the subject property. Additionally, although a previous investigation identified onsite soils impacted with metals and petroleum constituents exceeding screening level risk-based concentrations, it does not appear that these constituents are present in soils above the *Vapor Intrusion into Buildings* or *Volatilization to Outdoor Air* exposure pathways. A copy of the EDR Vapor Encroachment Screen is included in Appendix J.

6.2 Opinion

Based on available information gathered from the findings of this Vapor Encroachment Screening and the distances mapped sites are from the subject site, it is the opinion of ENW that a VEC cannot be ruled out. However, based on the types of facilities identified, review of readily available regulatory information, previous investigation on site, and/or lack of reported release, the environmental risk to the subject site is low and therefore no further investigation regarding a possible VEC is warranted at this time

7.0 Findings

We have performed a Phase I Environmental Site Assessment in conformance with the scope and limitations of ASTM Practice E-1527 of the property located at 5415 SE 122nd Avenue in Portland, Oregon 97236, the “subject property”. Any exceptions to, or deletions from, this practice are described in Section 8.0 of this report.

- The subject site consists of one tax lot located on the west side of SE 122nd Avenue, east of SE 121st Avenue, and north of SE Harold Street in Portland, Oregon. The site is currently vacant.
- The subject property is generally level and the surrounding area slopes to the northwest. The nearest surface water body is Johnson Creek located approximately three-quarter mile to the south. Ground water beneath the subject site is expected to be approximately 23 feet below ground surface. Ground water beneath the area is presumed to mirror surface topography and flow northwest beneath the subject property.
- A site reconnaissance was performed at the subject property on June 20, 2022. At the time of site reconnaissance, the subject site was vacant of structures and vegetated with grasses, brush, and Himalayan blackberries. Several areas of the site were obscured from view due to thick and overgrown grasses and blackberries.
- No storage of hazardous substances or wastes was observed on site. No ground stains, discoloration, odors, distressed vegetation, or other indications of contaminant impacts were observed during the site visit. There was no physical evidence of any surface spillage, discharges, or emissions of toxic or regulated substances noted on-site at the time of the site reconnaissance.
- Historical research has indicated that by the late 1940s, the subject site was developed with two residential structures in the southern portion of the site. By the early 1950s, the eastern structure had been removed and by the early 1960s, additional residential structures were constructed in the south-central and northwest area on the subject property. In the early 2000s, additional garages and/or outbuildings were constructed in western areas on site and several stored vehicles were observed in the northern portion. A 2005 City Directory listing for 5395 SE 122nd Avenue was listed as Integrity Auto Inc, which, when mapped, appears associated with the subject site. By 2006, all structures on site had been removed and the site has remained vacant to present day.
- Previous investigations on site included a Phase I Environmental Site Assessment (ESA) which identified several recognized environmental conditions (RECs) for the subject property due to historical automobile repair activities on site, stained soils, soil piles from an unknown source, a pipe possibly associated with a former heating oil underground storage tank (UST). Undocumented fill on site was also identified in a geotechnical investigation. A subsequent Phase II ESA was performed on site to address the RECs. No indications of USTs were found through a geophysical survey. Soil samples collected from across the site and in the northeast where stained soils were observed identified metals and petroleum constituents above risk-based concentrations. It was recommended that impacted soils be removed and characterized for disposal, following with confirmation soil sampling prior to redevelopment activities. A

Contaminated Media Management Plan (CMMP) was also then prepared for the subject site in May 2022.

- Historical research has also indicated that by the mid-1910s, adjacent properties to the south and southeast were residentially developed. By the late 1940s, the west adjacent property was developed with a residential structure and row crops. Additional residential structures were also present to the east during this time and by the early 1950s, the north adjacent property was residentially developed. By 1960, agricultural activities on the west adjacent property had ceased. By the early 2000s, the south and west adjacent properties were redeveloped with the current residential structures. Adjacent areas have been developed with single and multi-family residential structures to present day.
- The subject site was not listed in any environmental databases searched by EDR for this Assessment.
- Several environmental database-listed facilities were identified within the American Society for Testing and Materials defined database search radii from the subject site. All of the listed facilities are considered unlikely to have impacted the subject site.
- A vapor encroachment screening was completed for the subject property in accordance with ASTM E 2600–10. Based on geology, hydrogeology, ground water flow direction, and other factors in combination with site conditions, previous site investigations, and environmental database research, it is our opinion that a VEC cannot be ruled out. However, based on the types of facilities identified, review of readily available regulatory information, previous investigation on site, and/or lack of reported release, the environmental risk to the subject site is low and therefore no further investigation regarding a possible VEC is warranted at this time
- No significant data gaps were identified during this investigation.

We have performed a Phase I Environmental Site Assessment in conformance with the scope and limitations of ASTM Practice E 1527 of 5415 SE 122nd Avenue, Portland, Oregon 97236, the property. Any exceptions to, or deletions from, this practice are described in Section 8 of this report.

This assessment has identified no evidence of *recognized environmental conditions* at the subject property, **except for the following:**

- A Phase II ESA was performed on site in November 2021 which identified diesel-range and residual-range organics, ethylbenzene, naphthalene, arsenic, lead, and benzo(a)pyrene in surface soil across the site, and in the area of stained surface soil in the northeast part of the site, at concentrations exceeding risk-based concentrations for the *Soil Ingestion, Dermal Contact, and Inhalation* pathway for a potential residential, urban residential, and/or occupational receptor and/or a future construction worker. ENW recommends that prior to site redevelopment activities, the obvious areas of surface soil impacts should be excavated, characterized, and disposed of in accordance with state and local regulations, as well the collection of confirmation soil samples from excavated areas to document that petroleum-impacted soil had been adequately removed and the site should be reassessed for residual risk. A CMMP has also been prepared under a separate cover to assist in the proper handling, management, and disposal of the remaining impacted soils on site.

This assessment has identified the following *historical recognized environmental conditions* at the subject property:

- During the 2021 Phase I ESA, a soil pile and mixed soil and wood chip pile were observed in the northeast area of the site. As the source of soil in this pile was unknown, there was the potential for it to have originated from an impacted site. The soil pile was sampled during the 2021 Phase II ESA and analyzed for petroleum hydrocarbons and metals. Results were either non-detect or were detected below background levels and risk-based concentrations. Due to overgrown vegetation during the 2022 Phase I ESA site visit, it could not be confirmed whether this pile remains on site or has been removed.
- Records regarding how the former buildings on site were heated were not found, and based on the date of initial construction, it is possible that heating oil was used. Furthermore, a pipe was observed on the southwest part of the site during a previous Phase I ESA and the possibility of this pipe being associated with a UST was noted. A geophysical survey was performed on site during the 2021 Phase II ESA, which did not find any magnetic anomalies indicative of abandoned USTs.

A copy of this report should be kept with the property records.

8.0 Data Gaps

The new EPA regulations state that all exceptions and variances (data gaps) from the ASTM Phase I Standard should be explicitly listed in the Phase I Environmental Site Assessment report. We did not identify any significant data gaps that affected the ability of the environmental professionals to identify recognized environmental conditions. Exceptions and variances to the current report are listed below.

1. No records of the subject site prior to its initial development were identified during preparation of this report. Based on the historical residential use of the site and its vicinity, this does not constitute a significant data gap.
2. During site reconnaissance, several areas of the subject property were obstructed from view due to heavy and overgrown vegetation. Based on previous observations made in the 2021 Phase I ESA and follow-up investigations of the 2021 Phase II ESA, this does not constitute a significant data gap.
3. No other variances from the ASTM Standard or significant data gaps were identified during preparation of this report.

9.0 Limitations

The scope of this report is limited to observations made during on-site work; interviews with knowledgeable sources; public agency personnel; contractors licensed in the State of Oregon and review

of readily available published and unpublished reports and literature. Thus, these conclusions are based on information supplied by others as well as interpretations by qualified parties.

This report is based in part on a field site reconnaissance conducted on June 20, 2022. This field reconnaissance involved a visual assessment of accessible areas of the property. The visual assessment did not involve detailed observation of onsite building interiors, construction, utilities, or obscured or hidden conditions or materials. Interior observations were limited to general observations of walls, ceilings, and floors. Some closets may be viewed where considered useful for the assessment, but generally drawers, containers, and lockers will not be assessed. In some assessments, because of a large number of commercial/residential units, visual assessment of representative areas/features must be conducted to perform the work in a timely and cost-effective manner.

The focus of the Assessment does not extend to the presence of the following conditions unless they were the express concerns of contacted personnel, report and literature authors or the work scope.

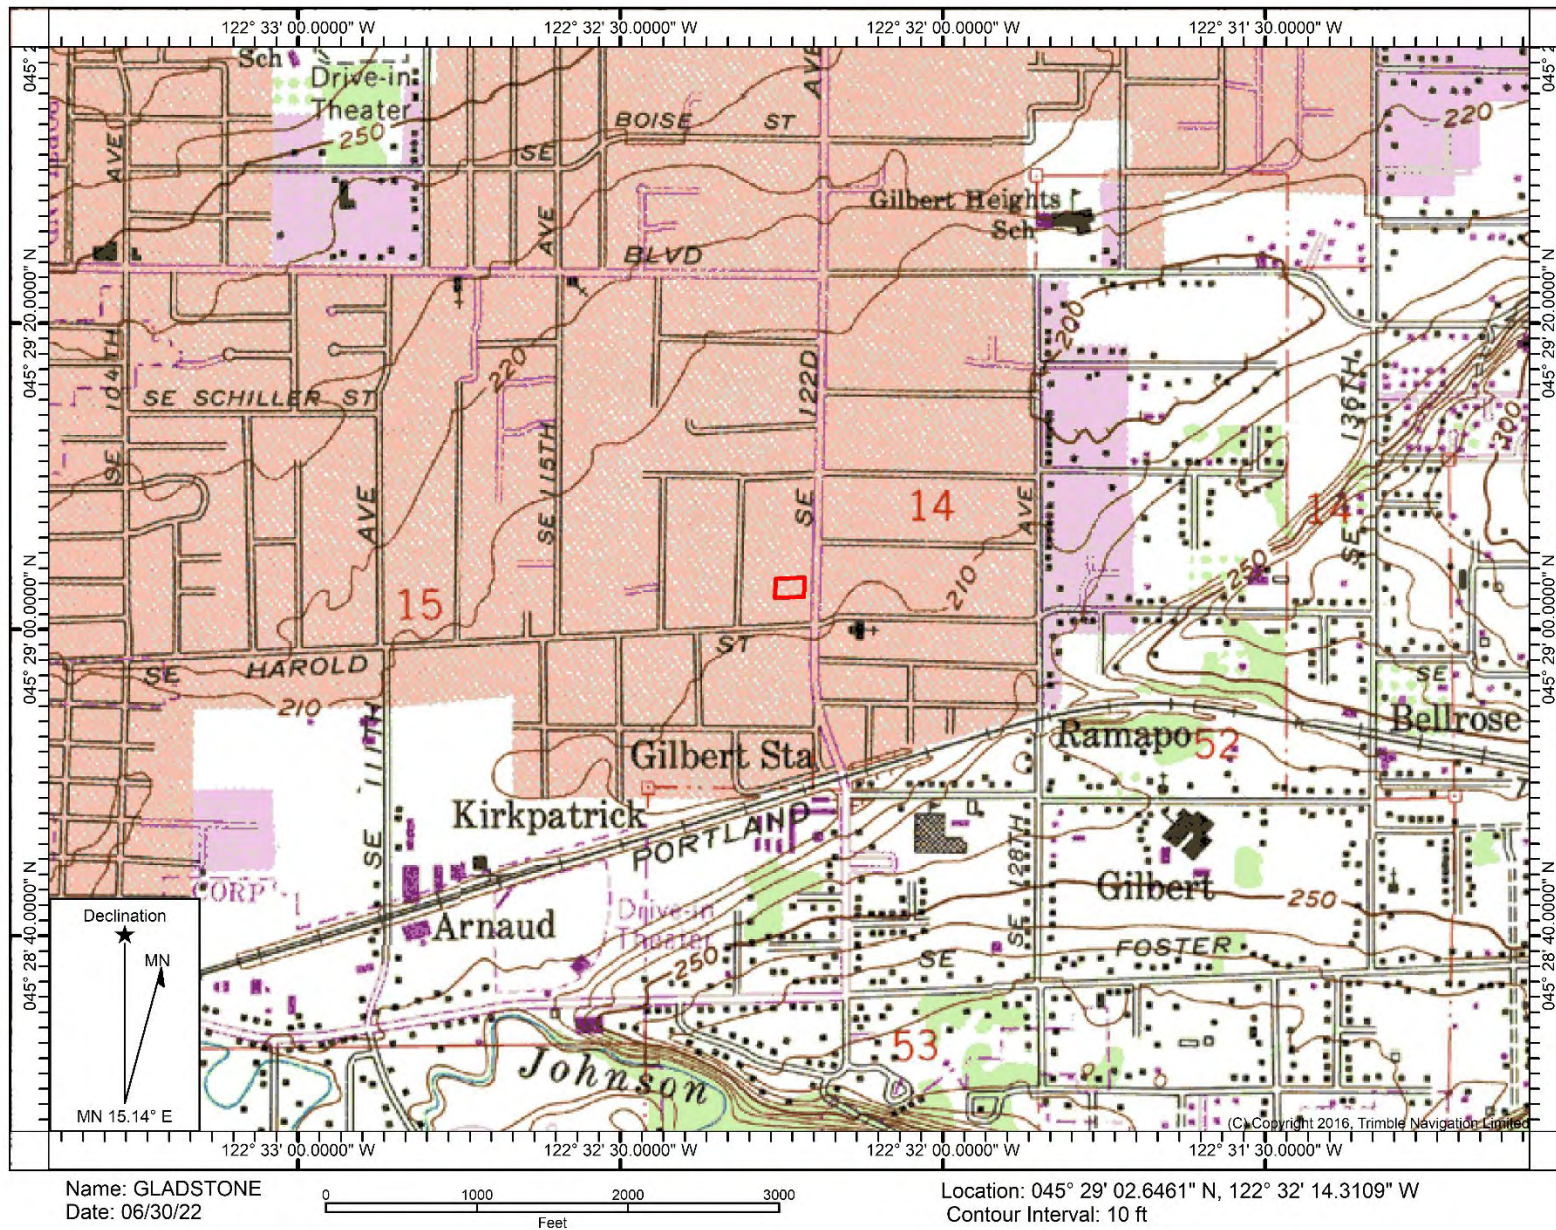

1. Naturally occurring toxic or hazardous substances in the subsurface soils, geology and water
2. Toxicity of substances common in current habitable environments, such as stored chemicals, products, building materials and consumables,
3. Contaminants or contaminant concentrations that are not a concern now but may be under future regulatory standards.
4. We are unable to predict events that may occur after our site visit, such as illegal dumping or accidental spillage.

There is no practice that is thorough enough to absolutely identify the presence of all hazardous substances that may be present at a given site. ENW's investigation has been focused only on the contamination that was specifically identified in the scope of work. Therefore, if contamination other than that specifically mentioned is present and not identified as part of a limited scope of work, ENW's environmental investigation shall not be construed as a guaranteed absence of such materials.

If applicable to this report, ENW have endeavored to collect representative analytical samples for the locations and depths indicated in this report. However, no sampling program can thoroughly identify all variations in contaminant distribution.

ENW performed this study under a limited scope of services per our agreement. It is possible, despite the use of reasonable care and interpretation, ENW may have failed to identify regulation violations related to the presence of hazardous substances other than those specifically mentioned at the closure site. ENW assumed no responsibility for conditions that we did not specifically evaluate or conditions that were not generally recognized as environmentally unacceptable at the time this report was prepared.

We have enjoyed working with you on this project and look forward to assisting you in the near future.

Assessors' Qualifications

PAUL TRONE, *Principal Geologist*

EDUCATION

- B.S. Geology, Portland State University, 1984
- M.S. Geology, Portland State University, 1987

EXPERIENCE SUMMARY

Mr. Trone has 24 years of experience managing Phase I/II Environmental Site Assessments (ESAs), Remedial Investigations/Feasibility Studies (RI/FS), and Remedial Actions (RAs) at a wide variety of sites in Oregon, Washington, California, and Hawaii. Mr. Trone's services have benefited both public and private sector clients, covering diverse business concerns in pharmaceuticals, semiconductors, automotive, recycling, property development, transportation, petroleum, communications, public works, agri-business, food products, banking, retail, and schools. He provided these services under state and federal oversight.

Mr. Trone has extensive experience performing Phase I ESAs, compliance audits, Phase II ESAs, landfill assessments, UST decommissionings, and hazardous waste management. He has mentored and trained many junior staff, supervised a site assessment group, and managed a profitable environmental department of a medium-sized consulting firm.

Mr. Trone has experience in all phases of corrective action at facilities where releases from above-ground and underground storage tanks (USTs), surface impoundments, dry wells or other waste management systems have impacted the environment. He managed the first soil resistive heating remedy in the northwest to cleanup a solvent spill in a municipal well field.

Mr. Trone has planned and implemented many RI/FS projects. For example, he provided RI/FS services at a National Priorities List (NPL) site used for reprocessing oil in the Columbia River floodplain of northwest Oregon under the oversight of the U.S. Environmental Protection Agency (EPA).

Mr. Trone's assessment, RI/FS, and remediation expertise extends to Brownfields redevelopment properties. He acquired assistance through state and federally funded Brownfields programs and prospective purchaser agreements. He prepared RI/FS work plans and managed field activities. He implemented an interim remedial action measure (IRAM) at a dry cleaners and shopping center located in an urban renewal area.

Mr. Trone also has landfill mitigation expertise. Under an exacting development-driven time-frame, he successfully negotiated the Voluntary Cleanup Pathway to an agency-approved Record of Decision (ROD) prerequisite for the construction of the \$250M commercial development at the site of a former filled quarry.

HEATHER CAPORASO, *Senior Environmental Scientist*

EDUCATION

- B.A. Anthropology, Portland State University, 2015
- OR and WA State certified Lead Based Paint Inspector
- AHERA certified Asbestos Building Inspector and Management Planner

EXPERIENCE SUMMARY

Ms. Caporaso has extensive experience performing Phase I Environmental Site Assessments on a range of properties including residential, commercial, and industrial sites throughout Oregon, Washington, California, Montana, Arizona, and New Mexico. Her experience extends into conducting radon assessments, as well as hazardous materials surveys, including sampling for asbestos and lead-based paint. Ms. Caporaso's experience also consists of regulatory review, evaluating field and analytical data, and writing reports for both public and private clients.

PRELIMINARY REPORT

In response to the application for a policy of title insurance referenced herein Chicago Title Company of Oregon hereby reports that it is prepared to issue, or cause to be issued, as of the specified date, a policy or policies of title insurance describing the land and the estate or interest hereinafter set forth, insuring against loss which may be sustained by reason of any defect, lien or encumbrance not shown or referred to as an exception herein or not excluded from coverage pursuant to the printed Schedules, Conditions and Stipulations or Conditions of said policy forms.

The printed Exceptions and Exclusions from the coverage of said policy or policies are set forth in Exhibit One. Copies of the policy forms should be read. They are available from the office which issued this report.

This report (and any supplements or amendments hereto) is issued solely for the purpose of facilitating the issuance of a policy of title insurance and no liability is assumed hereby.

The policy(s) of title insurance to be issued hereunder will be policy(s) of Chicago Title Insurance Company, a/an Florida corporation.

Please read the exceptions shown or referred to herein and the Exceptions and Exclusions set forth in Exhibit One of this report carefully. The Exceptions and Exclusions are meant to provide you with notice of matters which are not covered under the terms of the title insurance policy and should be carefully considered.

It is important to note that this preliminary report is not a written representation as to the condition of title and may not list all liens, defects and encumbrances affecting title to the land.

This preliminary report is for the exclusive use of the parties to the contemplated transaction, and the Company does not have any liability to any third parties nor any liability until the full premium is paid and a policy is issued. Until all necessary documents are placed of record, the Company reserves the right to amend or supplement this preliminary report.

EXHIBIT "A"
Legal Description

PARCEL I:

A part of the Northeast one-quarter of Section 15, Township 1 South, Range 2 East of the Willamette Meridian, in the City of Portland, County of Multnomah and State of Oregon, described as follows:

Commencing at a point 271.365 feet North 1°30' East along the center line of Buckley Avenue, now S.E. 122nd Avenue, from the East one-quarter section corner of Section 15, Township 1 South, Range 2 East of the Willamette Meridian; thence North 01°30' East along the center line of S.E. 122nd Avenue 63.365 feet; thence South 87°26' West and parallel with the center line of Gilbert Road 260.92 feet; thence South 1°30' West and parallel with the East line heretofore described 63.365 feet; thence North 87°26' East and parallel with the North line heretofore described 260.92 feet to the point of beginning.

EXCEPTING THEREFROM the rights of the public in and to the East 25 feet thereof, within the boundaries of S.E. 122nd Avenue in the County of Multnomah and State of Oregon.

FURTHER EXCEPTING THEREFROM that portion described in Deed for Right of Way Purpose to the City of Portland recorded March 22, 2013 as Recorder's Fee No. 2013-039696.

FURTHER EXCEPTING THEREFROM that portion conveyed to the City of Portland, a municipal corporation of the State of Oregon in Warranty Deed to recorded April 28, 2022 as Recorder's Fee No. 2022-043754.

PARCEL II:

A part of the Northeast one-quarter of Section 15, Township 1 South, Range 2 East of the Willamette Meridian, in the City of Portland, County of Multnomah and State of Oregon, described as follows:

Beginning at a point 208 feet North 1°30' East along the centerline of S.E. 122nd Avenue from the East one-quarter section corner of said Section 15; thence North 1°30' East along the centerline of SE 122nd Avenue 63.365 feet; thence South 87°26' West parallel with the centerline of SE Harold Street, 260.92 feet; thence South 1°30' West parallel with the East line heretofore described 63.365 feet; thence North 87°26' East parallel with the North line heretofore described 260.92 feet to a point of beginning.

EXCEPTING that portion taken for widening and relocating SE 122nd Avenue.

EXCEPTING THEREFROM a tract of land being a part of the Northeast one-quarter of Section 15, Township 1 South, Range 2 East, of the Willamette Meridian, in the County of Multnomah and State of Oregon, and being more particularly described as follows:

Beginning at a point 208.00 feet North 01°30' East along the centerline of SE 122nd Avenue and the East line of Section 15, from the East one-quarter corner of said Section 15; thence South 87°20'45" West parallel with the centerline of S.E. Harold Street 240.55 feet along the South line of that certain tract of land conveyed to Gene L. Heiple by Deed recorded May 24, 1983 in Book 1666, Page 1, Deed Records of Multnomah County, Oregon, to the true point of beginning; thence continuing South 87°20'45" West 20.05 feet to the Southwest corner of said Heiple Tract; thence North 01°30' East, parallel with the centerline of S.E. 122nd Avenue, 63.365 feet to the Northwest corner of said Heiple Tract; thence North 87°20'45" East, parallel to the South line of said Heiple Tract, 20.05 feet; thence South 01°30' West 64.365 feet to the true point of beginning.

AS OF THE DATE OF THIS REPORT, ITEMS TO BE CONSIDERED AND EXCEPTIONS TO COVERAGE IN ADDITION TO THE PRINTED EXCEPTIONS AND EXCLUSIONS IN THE POLICY FORM WOULD BE AS FOLLOWS:

GENERAL EXCEPTIONS:

1. Taxes or assessments which are not shown as existing liens by the records of any taxing authority that levies taxes or assessments on real property or by the Public Records; proceedings by a public agency which may result in taxes or assessments, or notices of such proceedings, whether or not shown by the records of such agency or by the Public Records.
2. Any facts, rights, interests or claims, which are not shown by the Public Records but which could be ascertained by an inspection of the Land or by making inquiry of persons in possession thereof.
3. Easements, or claims of easement, which are not shown by the Public Records; reservations or exceptions in patents or in Acts authorizing the issuance thereof; water rights, claims or title to water.
4. Any encroachment (of existing improvements located on the Land onto adjoining land or of existing improvements located on adjoining land onto the subject Land), encumbrance, violation, variation or adverse circumstance affecting the Title that would be disclosed by an accurate and complete land survey of the subject Land.
5. Any lien or right to a lien for services, labor, material, equipment rental or workers compensation heretofore or hereafter furnished, imposed by law and not shown by the Public Records.

SPECIFIC ITEMS AND EXCEPTIONS:

6. [Intentionally Deleted]
7. [Intentionally Deleted]
8. [Intentionally Deleted]
9. City Liens, if any, in favor of the City of Portland. None found as of December 24, 2020.
10. Easement for the purposes shown below and rights incidental thereto, as granted in a document:
Granted to: Pacific Northwest Bell Telephone Company
Purpose: Buried telephone cable and above ground cabinet
Recording Date: March 13, 1989
[Recording No.: 89-019270](#)
Book: 2185, Page: 482
Affects: The Southeasterly portion of Parcel II
11. Declaration of Deed Restriction, including the terms and provisions thereof;
Recording Date: April 20, 1990
[Recording No.: 90-032880](#)
Book: 2294, Page: 397
(Affects Tax Lot "9400" of Parcel II)
12. Easement for the purpose shown below and rights incidental thereto, as granted in a document:
Granted to: The City of Portland
Purpose: Slope
Recording Date: March 22, 2013
[Recording No.: 2013-039697](#)
Affects: The Easterly portion of Parcel II

13. We find no Notice of Completion recorded on said Land.
14. Please be advised that our search did not disclose any open Deeds of Trust of record. If you should have knowledge of any outstanding obligation, please contact the Title Department immediately for further review prior to closing.
15. The Company will require the following documents for review prior to the issuance of any title insurance predicated upon a conveyance or encumbrance by the corporation named below:
Name of Corporation: **LMC, Inc.**
a: A Copy of the corporation By-laws and Articles of Incorporation
b: An original or certified copy of a resolution authorizing the transaction contemplated herein
c: If the Articles and/or By-laws require approval by a 'parent' organization, a copy of the Articles and By-laws of the parent
d: A current dated certificate of good standing from the proper governmental authority of the state in which the entity was created
- The Company reserves the right to add additional items or make further requirements after review of the requested documentation.
16. Facts, rights, interests or claims which are not shown by the public records but which could be ascertained by an inspection of the Land or by making inquiry of persons in possession thereof.
- To remove this item, the Company will require an affidavit and indemnity on a form supplied by the Company.
17. Any lien or right to a lien for services, labor, material, equipment rental or workers compensation heretofore or hereafter furnished, imposed by law and not shown by the public records.
- To remove this item, the Company will require an affidavit and indemnity on a form supplied by the Company.
18. Any encroachment (of existing improvements located on the subject Land onto adjoining land or of existing improvements located on adjoining land onto the subject Land), encumbrance, violation, variation or adverse circumstance affecting the title that would be disclosed by an accurate and complete land survey of the subject Land.
- The Company will require a survey of the Land by a professional surveyor, and this exception may be eliminated or limited as a result thereof.
19. ***ADDED***
Conditions set forth in City of Portland Land Use Document No. LU 21-040180 AD, including the terms and provisions thereof:
Regarding: design review
Recording Date: October 21, 2021
[Recording No: 2021-156599](#)
20. ***ADDED***
Easement for the purposes shown below and rights incidental thereto, as granted in a document:
Granted to: City of Portland
Purpose: Public Street and Right-Of-Way purposes
Recording Date: April 28, 2022
[Recording No.: 2022-043752](#)
Affects: The westerly portion of Parcels I and II

ADDITIONAL REQUIREMENTS/NOTES:

- A. In addition to the standard policy exceptions, the exceptions enumerated above shall appear on the final 2006 ALTA Policy unless removed prior to issuance.
- B. NOTE: Real Property Taxes for the fiscal year 2021-2022 are paid in full, as follows:
- a) Levied Amount: \$2,323.29
Levy Code: 705
[Account No.: R335469](#)
Map No.: 1S2E15AD-09300 - (Affects Parcel I)
- b) Levied Amount: \$1,886.25
Levy Code: 705
[Account No.: R335471](#)
Map No.: 1S2E15AD-09400 - (Affects a portion of Parcel II)
- c) Levied Amount: \$422.18
Unpaid Balance: \$1.70, plus interest, if any
Levy Code: 705
[Account No.: R335717](#)
Map No.: 1S2E15AD-09401 - (Affects a portion of Parcel II)
- Prior to close of escrow, please contact the Tax Collector's Office to confirm all amounts owing, including current fiscal year taxes, supplemental taxes, escaped assessments and any delinquencies.
- C. NOTE: There are no matters against the party shown below which would appear as exceptions to coverage in a title insurance product:
Party: **Northwest Housing ALternatives, Inc.**
- D. NOTE: The Company will require the following documents for review prior to the issuance of any title insurance predicated upon a conveyance or encumbrance by the corporation named below:
Name of Corporation: **Northwest Housing Alternatives, Inc.**
a: A Copy of the corporation By-laws and Articles of Incorporation
b: An original or certified copy of a resolution authorizing the transaction contemplated herein
c: If the Articles and/or By-laws require approval by a 'parent' organization, a copy of the Articles and By-laws of the parent
d: A current dated certificate of good standing from the proper governmental authority of the state in which the entity was created
- The Company reserves the right to add additional items or make further requirements after review of the requested documentation.
- E. NOTE: No utility search has been made or will be made for water, sewer or storm drainage charges unless the City/Service District claims them as liens (i.e. foreclosable) and reflects them on its lien docket as of the date of closing. Buyers should check with the appropriate city bureau or water service district and obtain a billing cutoff. Such charges must be adjusted outside of escrow.
- F. NOTE: There are NO conveyances affecting said Land recorded within 24 months of the date of this report.

- G. NOTE: Effective January 1, 2008, Oregon law (ORS 314.258) mandates withholding of Oregon income taxes from sellers who do not continue to be Oregon residents or qualify for an exemption. Please contact your Escrow Closer for further information.
- H. THE FOLLOWING NOTICE IS REQUIRED BY STATE LAW: YOU WILL BE REVIEWING, APPROVING AND SIGNING IMPORTANT DOCUMENTS AT CLOSING. LEGAL CONSEQUENCES FOLLOW FROM THE SELECTION AND USE OF THESE DOCUMENTS. YOU MAY CONSULT AN ATTORNEY ABOUT THESE DOCUMENTS. YOU SHOULD CONSULT AN ATTORNEY IF YOU HAVE QUESTIONS OR CONCERNS ABOUT THE TRANSACTION OR ABOUT THE DOCUMENTS. IF YOU WISH TO REVIEW TRANSACTION DOCUMENTS THAT YOU HAVE NOT SEEN, PLEASE CONTACT THE ESCROW AGENT.
- I. NOTE: This map/plat is being furnished as an aid in locating the herein described Land in relation to adjoining streets, natural boundaries and other land. Except to the extent a policy of title insurance is expressly modified by endorsement, if any, the Company does not insure dimensions, distances or acreage shown thereon.
- J. Recording Charge (Per Document) is the following:
- | County | First Page | Each Additional Page |
|-----------|------------|----------------------|
| Multnomah | \$86.00 | \$5.00 |

NOTE: When possible the company will record electronically. An additional charge of \$5.00 applies to each document that is recorded electronically.

NOTE: Please send any documents for recording to the following address:
Portland Title Group
Attn: Recorder
1433 S.W. 6th Avenue
Portland, OR 97201

- K. NOTICE: Please be aware that due to the conflict between federal and state laws concerning the cultivation, distribution, manufacture or sale of marijuana, the Company is not able to close or insure any transaction involving Land that is associated with these activities.
- L. NOTE: IMPORTANT INFORMATION REGARDING PROPERTY TAX PAYMENTS
Fiscal Year: July 1st through June 30th
Taxes become a lien on real property, but are not yet payable: July 1st
Taxes become certified and payable (approximately on this date): October 15th
First one third payment of taxes is due: November 15th
Second one third payment of taxes is due: February 15th
Final payment of taxes is due: May 15th

Discounts: If two thirds are paid by November 15th, a 2% discount will apply. If the full amount of the taxes are paid by November 15th, a 3% discount will apply.

Interest: Interest accrues as of the 15th of each month based on any amount that is unpaid by the due date. No interest is charged if the minimum amount is paid according to the above mentioned payment schedule.

EXHIBIT ONE

2006 AMERICAN LAND TITLE ASSOCIATION LOAN POLICY (06-17-06) EXCLUSIONS FROM COVERAGE

The following matters are expressly excluded from the coverage of this policy and the Company will not pay loss or damage, costs, attorneys' fees or expenses that arise by reason of:

- (a) Any law, ordinance or governmental regulation (including but not limited to building and zoning) restricting, regulating, prohibiting or relating to
 - the occupancy, use, or enjoyment of the Land;
 - the character, dimensions or location of any improvement erected on the land;
 - the subdivision of land; or
 - environmental protection;or the effect of any violation of these laws, ordinances or governmental regulations. This Exclusion 1(a) does not modify or limit the coverage provided under Covered Risk 5.
- (b) Any governmental police power. This Exclusion 1(b) does not modify or limit the coverage provided under Covered Risk 6.
- Rights of eminent domain. This Exclusion does not modify or limit the coverage provided under Covered Risk 7 or 8.
- Defects, liens, encumbrances, adverse claims, or other matters
 - created, suffered, assumed or agreed to by the Insured Claimant;
 - not known to the Company, not recorded in the Public Records at Date of Policy, but known to the Insured Claimant and not disclosed in writing to the Company by the Insured Claimant prior to the date the Insured Claimant became an Insured under this policy;

- resulting in no loss or damage to the Insured Claimant;
 - attaching or created subsequent to Date of Policy (however, this does not modify or limit the coverage provided under Covered Risk 11, 13, or 14); or
 - resulting in loss or damage that would not have been sustained if the Insured Claimant had paid value for the Insured Mortgage.
- Unenforceability of the lien of the Insured Mortgage because of the inability or failure of an Insured to comply with the applicable doing-business laws of the state where the Land is situated.
 - Invalidity or unenforceability in whole or in part of the lien of the Insured Mortgage that arises out of the transaction evidenced by the Insured Mortgage and is based upon usury or any consumer credit protection or truth-in-lending law.
 - Any claim, by reason of the operation of federal bankruptcy, state insolvency or similar creditors' rights laws, that the transaction creating the lien of the Insured Mortgage, is
 - a fraudulent conveyance or fraudulent transfer, or
 - a preferential transfer for any reason not stated in the Covered Risk 13(b) of this policy.
 - Any lien on the Title for real estate taxes or assessments imposed by governmental authority and created or attaching between Date of Policy and the date of recording of the Insured Mortgage in the Public Records. This Exclusion does not modify or limit the coverage provided under Covered Risk 11(b).

The above policy form may be issued to afford either Standard Coverage or Extended Coverage. In addition to the above Exclusions from Coverage, the Exceptions from Coverage in a Standard Coverage policy will also include the following Exceptions from Coverage.

SCHEDULE B - GENERAL EXCEPTIONS FROM COVERAGE

This policy does not insure against loss or damage (and the Company will not pay costs, attorneys' fees or expenses) which arise by reason of:

- Taxes or assessments which are not shown as existing liens by the records of any taxing authority that levies taxes or assessments on real property or by the Public Records; proceedings by a public agency which may result in taxes or assessments, or notices of such proceedings, whether or not shown by the records of such agency or by the Public Records.
- Facts, rights, interests or claims which are not shown by the Public Records but which could be ascertained by an inspection of the Land or by making inquiry of persons in possession thereof.
- Easements, or claims of easement, not shown by the Public Records; reservations or exceptions in patents or in Acts authorizing the issuance thereof, water rights, claims or title to water.
- Any encroachment, encumbrance, violation, variation, or adverse circumstance affecting the Title that would be disclosed by an accurate and complete land survey of the Land. The term "encroachment" includes encroachments of existing improvements located on the Land onto adjoining land, and encroachments onto the Land of existing improvements located on adjoining land.
- Any lien for services, labor or material heretofore or hereafter furnished, or for contributions due to the State of Oregon for unemployment compensation or worker's compensation, imposed by law and not shown by the Public Records.

2006 AMERICAN LAND TITLE ASSOCIATION OWNER'S POLICY (06-17-06) EXCLUSIONS FROM COVERAGE

The following matters are expressly excluded from the coverage of this policy and the Company will not pay loss or damage, costs, attorneys' fees or expenses that arise by reason of:

- (a) Any law, ordinance or governmental regulation (including but not limited to building and zoning) restricting, regulating, prohibiting or relating to
 - the occupancy, use, or enjoyment of the Land;
 - the character, dimensions or location of any improvement erected on the land;
 - the subdivision of land; or
 - environmental protection;or the effect of any violation of these laws, ordinances or governmental regulations. This Exclusion 1(a) does not modify or limit the coverage provided under Covered Risk 5.
- (b) Any governmental police power. This Exclusion 1(b) does not modify or limit the coverage provided under Covered Risk 6.
- Rights of eminent domain. This Exclusion does not modify or limit the coverage provided under Covered Risk 7 or 8.
- Defects, liens, encumbrances, adverse claims, or other matters
 - created, suffered, assumed or agreed to by the Insured Claimant;

- not known to the Company, not recorded in the Public Records at Date of Policy, but known to the Insured Claimant and not disclosed in writing to the Company by the Insured Claimant prior to the date the Insured Claimant became an Insured under this policy;
 - resulting in no loss or damage to the Insured Claimant;
 - attaching or created subsequent to Date of Policy (however, this does not modify or limit the coverage provided under Covered Risk 9 and 10); or
 - resulting in loss or damage that would not have been sustained if the Insured Claimant had paid value for the Title.
- Any claim, by reason of the operation of federal bankruptcy, state insolvency or similar creditors' rights laws, that the transaction creating the lien of the Insured Mortgage, is
 - a fraudulent conveyance or fraudulent transfer, or
 - a preferential transfer for any reason not stated in the Covered Risk 9 of this policy.
 - Any lien on the Title for real estate taxes or assessments imposed by governmental authority and created or attaching between Date of Policy and the date of recording of the deed or other instrument of transfer in the Public Records that vests Title as shown in Schedule A.

The above policy form may be issued to afford either Standard Coverage or Extended Coverage. In addition to the above Exclusions from Coverage, the Exceptions from Coverage in a Standard Coverage policy will also include the following Exceptions from Coverage.

SCHEDULE B - GENERAL EXCEPTIONS FROM COVERAGE

This policy does not insure against loss or damage (and the Company will not pay costs, attorneys' fees or expenses) which arise by reason of:

- Taxes or assessments which are not shown as existing liens by the records of any taxing authority that levies taxes or assessments on real property or by the Public Records; proceedings by a public agency which may result in taxes or assessments, or notices of such proceedings, whether or not shown by the records of such agency or by the Public Records.
- Facts, rights, interests or claims which are not shown by the Public Records but which could be ascertained by an inspection of the Land or by making inquiry of persons in possession thereof.
- Easements, or claims of easement, not shown by the Public Records; reservations or exceptions in patents or in Acts authorizing the issuance thereof, water rights, claims or title to water.
- Any encroachment, encumbrance, violation, variation, or adverse circumstance affecting the Title that would be disclosed by an accurate and complete land survey of the Land. The term "encroachment" includes encroachments of existing improvements located on the Land onto adjoining land, and encroachments onto the Land of existing improvements located on adjoining land.
- Any lien for services, labor or material heretofore or hereafter furnished, or for contributions due to the State of Oregon for unemployment compensation or worker's compensation, imposed by law and not shown by the Public Records.

Inquire before you wire!

WIRE FRAUD ALERT

This Notice is not intended to provide legal or professional advice.
If you have any questions, please consult with a lawyer.

All parties to a real estate transaction are targets for wire fraud and many have lost hundreds of thousands of dollars because they simply relied on the wire instructions received via email, without further verification. **If funds are to be wired in conjunction with this real estate transaction, we strongly recommend verbal verification of wire instructions through a known, trusted phone number prior to sending funds.**

In addition, the following non-exclusive self-protection strategies are recommended to minimize exposure to possible wire fraud.

- **NEVER RELY** on emails purporting to change wire instructions. Parties to a transaction rarely change wire instructions in the course of a transaction.
- **ALWAYS VERIFY** wire instructions, specifically the ABA routing number and account number, by calling the party who sent the instructions to you. DO NOT use the phone number provided in the email containing the instructions, use phone numbers you have called before or can otherwise verify. **Obtain the number of relevant parties to the transaction as soon as an escrow account is opened.** DO NOT send an email to verify as the email address may be incorrect or the email may be intercepted by the fraudster.
- **USE COMPLEX EMAIL PASSWORDS** that employ a combination of mixed case, numbers, and symbols. Make your passwords greater than eight (8) characters. Also, change your password often and do NOT reuse the same password for other online accounts.
- **USE MULTI-FACTOR AUTHENTICATION** for email accounts. Your email provider or IT staff may have specific instructions on how to implement this feature.

FIDELITY NATIONAL FINANCIAL PRIVACY NOTICE

Effective January 1, 2021

Fidelity National Financial, Inc. and its majority-owned subsidiary companies (collectively, "FNF," "our," or "we") respect and are committed to protecting your privacy. This Privacy Notice explains how we collect, use, and protect personal information, when and to whom we disclose such information, and the choices you have about the use and disclosure of that information.

A limited number of FNF subsidiaries have their own privacy notices. If a subsidiary has its own privacy notice, the privacy notice will be available on the subsidiary's website and this Privacy Notice does not apply.

Collection of Personal Information

FNF may collect the following categories of Personal Information:

- contact information (e.g., name, address, phone number, email address);
- demographic information (e.g., date of birth, gender, marital status);
- identity information (e.g. Social Security Number, driver's license, passport, or other government ID number);
- financial account information (e.g. loan or bank account information); and
- other personal information necessary to provide products or services to you.

We may collect Personal Information about you from:

- information we receive from you or your agent;
- information about your transactions with FNF, our affiliates, or others; and
- information we receive from consumer reporting agencies and/or governmental entities, either directly from these entities or through others.

Collection of Browsing Information

FNF automatically collects the following types of Browsing Information when you access an FNF website, online service, or application (each an "FNF Website") from your Internet browser, computer, and/or device:

- Internet Protocol (IP) address and operating system;
- browser version, language, and type;
- domain name system requests; and
- browsing history on the FNF Website, such as date and time of your visit to the FNF Website and visits to the pages within the FNF Website.

Like most websites, our servers automatically log each visitor to the FNF Website and may collect the Browsing Information described above. We use Browsing Information for system administration, troubleshooting, fraud investigation, and to improve our websites. Browsing Information generally does not reveal anything personal about you, though if you have created a user account for an FNF Website and are logged into that account, the FNF Website may be able to link certain browsing activity to your user account.

Other Online Specifics

Cookies. When you visit an FNF Website, a "cookie" may be sent to your computer. A cookie is a small piece of data that is sent to your Internet browser from a web server and stored on your computer's hard drive. Information gathered using cookies helps us improve your user experience. For example, a cookie can help the website load properly or can customize the display page based on your browser type and user preferences. You can choose whether or not to accept cookies by changing your Internet browser settings. Be aware that doing so may impair or limit some functionality of the FNF Website.

Web Beacons. We use web beacons to determine when and how many times a page has been viewed. This information is used to improve our websites.

Do Not Track. Currently our FNF Websites do not respond to "Do Not Track" features enabled through your browser.

Links to Other Sites. FNF Websites may contain links to unaffiliated third-party websites. FNF is not responsible for the privacy practices or content of those websites. We recommend that you read the privacy policy of every website you visit.

Use of Personal Information

FNF uses Personal Information for three main purposes:

- To provide products and services to you or in connection with a transaction involving you.
- To improve our products and services.
- To communicate with you about our, our affiliates', and others' products and services, jointly or independently.

When Information Is Disclosed

We may disclose your Personal Information and Browsing Information in the following circumstances:

- to enable us to detect or prevent criminal activity, fraud, material misrepresentation, or nondisclosure;
- to nonaffiliated service providers who provide or perform services or functions on our behalf and who agree to use the information only to provide such services or functions;
- to nonaffiliated third party service providers with whom we perform joint marketing, pursuant to an agreement with them to jointly market financial products or services to you;
- to law enforcement or authorities in connection with an investigation, or in response to a subpoena or court order; or
- in the good-faith belief that such disclosure is necessary to comply with legal process or applicable laws, or to protect the rights, property, or safety of FNF, its customers, or the public.

The law does not require your prior authorization and does not allow you to restrict the disclosures described above. Additionally, we may disclose your information to third parties for whom you have given us authorization or consent to make such disclosure. We do not otherwise share your Personal Information or Browsing Information with nonaffiliated third parties, except as required or permitted by law. We may share your Personal Information with affiliates (other companies owned by FNF) to directly market to you. Please see "Choices with Your Information" to learn how to restrict that sharing.

We reserve the right to transfer your Personal Information, Browsing Information, and any other information, in connection with the sale or other disposition of all or part of the FNF business and/or assets, or in the event of bankruptcy, reorganization, insolvency, receivership, or an assignment for the benefit of creditors. By submitting Personal Information and/or Browsing Information to FNF, you expressly agree and consent to the use and/or transfer of the foregoing information in connection with any of the above described proceedings.

Security of Your Information

We maintain physical, electronic, and procedural safeguards to protect your Personal Information.

Choices With Your Information

If you do not want FNF to share your information among our affiliates to directly market to you, you may send an "opt out" request as directed at the end of this Privacy Notice. We do not share your Personal Information with nonaffiliates for their use to direct market to you without your consent.

Whether you submit Personal Information or Browsing Information to FNF is entirely up to you. If you decide not to submit Personal Information or Browsing Information, FNF may not be able to provide certain services or products to you.

For California Residents: We will not share your Personal Information or Browsing Information with nonaffiliated third parties, except as permitted by California law. For additional information about your California privacy rights, please visit the "California Privacy" link on our website (<https://fnf.com/pages/californiaprivacy.aspx>) or call (888) 413-1748.

For Nevada Residents: You may be placed on our internal Do Not Call List by calling (888) 934-3354 or by contacting us via the information set forth at the end of this Privacy Notice. Nevada law requires that we also provide you with the following contact information: Bureau of Consumer Protection, Office of the Nevada Attorney General, 555 E. Washington St., Suite 3900, Las Vegas, NV 89101; Phone number: (702) 486-3132; email: BCPINFO@ag.state.nv.us.

For Oregon Residents: We will not share your Personal Information or Browsing Information with nonaffiliated third parties for marketing purposes, except after you have been informed by us of such sharing and had an opportunity to indicate that you do not want a disclosure made for marketing purposes.

For Vermont Residents: We will not disclose information about your creditworthiness to our affiliates and will not disclose your personal information, financial information, credit report, or health information to nonaffiliated third parties to market to you, other than as permitted by Vermont law, unless you authorize us to make those disclosures.

Information From Children

The FNF Websites are not intended or designed to attract persons under the age of eighteen (18). We do not collect Personal Information from any person that we know to be under the age of thirteen (13) without permission from a parent or guardian.

International Users

FNF's headquarters is located within the United States. If you reside outside the United States and choose to provide Personal Information or Browsing Information to us, please note that we may transfer that information outside of your country of residence. By providing FNF with your Personal Information and/or Browsing Information, you consent to our collection, transfer, and use of such information in accordance with this Privacy Notice.

FNF Website Services for Mortgage Loans

Certain FNF companies provide services to mortgage loan servicers, including hosting websites that collect customer information on behalf of mortgage loan servicers (the "Service Websites"). The Service Websites may contain links to both this Privacy Notice and the mortgage loan servicer or lender's privacy notice. The sections of this Privacy Notice titled When Information is Disclosed, Choices with Your Information, and Accessing and Correcting Information do not apply to the Service Websites. The mortgage loan servicer or lender's privacy notice governs use, disclosure, and access to your Personal Information. FNF does not share Personal Information collected through the Service Websites, except as required or authorized by contract with the mortgage loan servicer or lender, or as required by law or in the good-faith belief that such disclosure is necessary: to comply with a legal process or applicable law, to enforce this Privacy Notice, or to protect the rights, property, or safety of FNF or the public.

Your Consent To This Privacy Notice; Notice Changes; Use of Comments or Feedback

By submitting Personal Information and/or Browsing Information to FNF, you consent to the collection and use of the information in accordance with this Privacy Notice. We may change this Privacy Notice at any time. The Privacy Notice's effective date will show the last date changes were made. If you provide information to us following any change of the Privacy Notice, that signifies your assent to and acceptance of the changes to the Privacy Notice.

Accessing and Correcting Information; Contact Us

If you have questions, would like to correct your Personal Information, or want to opt-out of information sharing for affiliate marketing, visit FNF's [Opt Out Page](#) or contact us by phone at (888) 934-3354 or by mail to:

Questions:

1)

Is the subject property or any adjacent property:

☐ Used for industrial purposes

☐ A gasoline station

☐ A motor repair facility

☐ A commercial printing facility

☐ A dry cleaners

☐ A photo developing laboratory

☐ A junkyard or landfill

☐ A waste treatment storage, disposal, processing or recycling facility

Are any of the materials listed below used and/or stored on the subject property:

☐ Damaged or discarded automotive or industrial batteries

☐ Pesticides for Herbicides

☐ Solvents

☐ Paints or other chemicals in containers of greater than 5 gallons

☐ More than 50 gallons of any chemical material

☐ Any chemical materials requiring Material Safety Data Sheets

☐ Other chemical materials:

Are any of the items listed below used and/or stored on the Site:

☐ Industrial drums [typically 55-gallons (208 L)]

☐ Sacks of chemicals

☐ Any registered storage tanks (above or below ground)

☐ Any unregistered storage tanks (above or below ground)

☐ Any heating oil tanks (above or underground)

☐ Any dry wells

☐ Any vent pipes, fill pipes, or access ways indicating a fill pipe protruding from the ground on the Site or adjacent to any structure on the Site

USER QUESTIONNAIRE FOR PHASE 1 ESAs

AS REQUIRED by new ASTM Standard E1527-13 (published 2013)

To: Victoria Bennett
Company: EVREN Northwest, Inc.
Phone: 503-452-5561
Fax:
Email: torib@evren-nw.com

From: Destin Ferdun
Company: Northwest Housing Alternatives
Phone: (503) 654-1007 x122
Fax:
Email: ferdun@nwhousing.org

Site Name: 5415 SE 122nd Avenue
Site Address: Portland, Oregon

The person who will use the Phase I ESA should provide the following information. Please fill in this form to the best of your ability, explaining any Yes answers to 1b), 2, 3, 4, and/or 5 on a separate sheet of paper. Without these answers, our report would have to note that the Phase I ESA is incomplete, and your Landowner Liability Protections could be at risk. We need these before we conduct the site visit.

1. **Environmental Cleanup Liens.** ASTM requires the User to check for environmental liens that may be filed or recorded against the subject property under federal, tribal, state, or local law. Such liens might be listed in the "exceptions to coverage" in the property's title insurance commitment or policy. Failure to check for these liens could put your Landowner Liability Protections at risk.

- a) Have you checked for these environmental cleanup liens?
b) Are you aware of any such liens against the subject property?

☒ Yes ☐ No
☐ Yes ☒ No

2. **Activity and Use Limitations (AULs).** These include engineering controls (e.g., slurry walls, caps) and land use restrictions or institutional controls (e.g., deed restrictions, covenants) that may be in place at the site or filed under federal, tribal, state, or local law. The title commitment or policy might list AULs.

Are you aware of any possible AULs involving the subject site?

☒ Yes ☐ No

3. **Specialized Knowledge.** This involves personal knowledge or experience related to the subject property or nearby properties. For example, if you are involved in the same line of business as the current or former occupants of the property, you would probably know of any chemicals, oil, degreasers, gasoline, or other hazardous substances commonly used in that type of business.

Do you have any specialized knowledge that might indicate the past or present use of such substances on the subject or nearby properties?

☐ Yes ☒ No

4. **Fair Market Value (FMV).** A purchase price significantly below FMV may indicate an environmental problem. Please note that this question does not require an appraisal of the property. If the price is significantly below FMV, the User should consider whether it might be because contamination may be present at the property.

Is the purchase price significantly below fair market value?

☐ Yes ☒ No

5. **Obvious Indicators.** This involves past or present spills, stains, releases, cleanups, etc. on or near the site.

Do you know of any obvious indicators of possible contamination on or near the site?

☒ Yes ☐ No

6. **Common Knowledge.** Please use a separate sheet if necessary.

a) Describe the past uses of chemicals that may have been present at the property:

See Phase 1 and Phase 2 ESA.

b) Describe any specific chemicals that may have been present at the property:

Full list can be found on Table 1 Summary of Analytical Data, Soil in Phase 2 ESA.

c) Describe any other information that may help us identify possible contamination:

See Phase 1 and 2 ESA.

Evren Northwest Questionnaire Attachment for Phase 1 ESA Update

2. Easement for the purposes shown below and rights incidental thereto, as granted in a document:

Granted to: Pacific Northwest Bell Telephone Company

Purpose: Buried telephone cable and above ground cabinet

Recording Date: March 13, 1989

Recording No.: 89-019270

Book: 2185, Page: 482

Affects: The Southeasterly portion of Parcel II

Declaration of Deed Restriction, including the terms and provisions thereof;

Recording Date: April 20, 1990

Recording No.: 90-032880

Book: 2294, Page: 397

(Affects Tax Lot "9400" of Parcel II)

Easement for the purpose shown below and rights incidental thereto, as granted in a document:

Granted to: The City of Portland

Purpose: Slope

Recording Date: March 22, 2013

Recording No.: 2013-039697

Affects: The Easterly portion of Parcel II

Conditions set forth in City of Portland Land Use Document No. LU 21-040180 AD, including the terms and provisions thereof:

Regarding: design review

Recording Date: October 21, 2021

Recording No: 2021-156599

Easement for the purposes shown below and rights incidental thereto, as granted in a document:

Granted to: City of Portland

Purpose: Public Street and Right-Of-Way purposes

Recording Date: April 28, 2022

Recording No.: 2022-043752

Affects: The westerly portion of Parcels I and II

5. During a site reconnaissance survey in August 2021, ENW observed several areas of stained soils in the northeast portion of the subject property. A geotechnical report from July 2021 also indicated the presence of undocumented fill on the site.

PERMIT

IVR Number 4705864

Permit/Case Type Public Registry
Site Without Buildings
Lot Confirmation

Work/Case Description Per 33.676.300.A, the subject lots meet the definitions of Lot or Lot of Record, as defined in Chapter 33.970, Definitions. Accordingly, Tax Lot 9300 meets the definition of Lot of Record, as shown by the attached deed No. 9562. Tax Lots 9400 and 9407 are parcels created through the attached Partition Plat No. 51684, and meet the definition of Lot. The subject lots are located in the CM2 Zone. Per 33.676.300.B.1, lots in the CM2 Zone must have a front lot line that is, at minimum, 10 feet in length. All subject lots exceed this minimum. There are no minimum requirements for lot size or any other lot dimension. The subject lots are currently vacant and, therefore, 33.676.300.C is not applicable to this application.

Simple Site Erosion Control Requirements Form

Project or Permit Number 06-140806-RS
Project Address 5403 - 5413 SE 122nd
Name of Responsible Party (print) JAN HART
Day Phone 503-572-0601 FAX 503-657-3452 email _____

Erosion control inspections are required and it is your responsibility to request these inspections.

Erosion control measures are required on this site. Because of the size and slope, a drawn plan is not required. Erosion Control Measures and inspections are required prior to beginning foundation excavation. This form may only be used for simple sites:

1. Flat (less than 10% slope before development)
2. More than 50 feet from a wetland or waterbody
3. Outside an environmental or greenway zone
4. Less than 10,000 sq. ft. of ground disturbance
5. Not a land division of 10,000 sq. ft. or more

This is an agreement that the applicant and/or responsible parties will use erosion control during this project as required. The applicant and/or responsible party must sign this form to comply with Section 10.40.020 of the Code. Details for the measures outlined below are located in the City of Portland Erosion Control Manual, available at either the Development Services Center or on our Web site at www.portlandonline.com/bds

	Minimum Erosion Control Requirements	Additional Requirements
1.	Temporary sediment control (silt fences, bio-filter bags or fiber rolls, storm drain inlet protection).	Prevent the transport of sediment from the site (Manual Sections 2-2 and 4-2) Call for #200 inspection. These items must be provided even with undisturbed vegetative buffers as allowed by manual.
2.	Stabilize access points by installing a gravel construction entrance. Do not use rock or dirt ramps in the gutter, use a wood ramp if needed to get over curb.	Limit construction vehicle access, whenever possible, to one route. Stabilize access points. Provide street cleaning by sweeping or shoveling any sediment that may have been tracked out. Place sediment in a suitable disposal area where it will not erode again. (Manual Sections 2-2 and 4-1)
3.	Stabilize all soils, including stockpiles that are temporarily exposed. Use one or more of the temporary soil stabilization Best Management Practices (BMP's): temporary grasses, mulch applications, erosion blankets, plastic sheeting, plus dust control measures.	Soil Stabilization (Manual Sections 2-2 and 4-4) • From May 1 to September 30, no soils shall remain unstabilized for more than seven days. • From October 1 to April 30, soils shall be immediately stabilized.
4.	Maintain erosion controls identified in requirements 1 through 3 above according to specifications prescribed in manual.	Inspect and maintain required erosion and sediment controls to ensure continued performance of their intended function. (Manual Chapters 4 and 5)
5.	Comply with the necessary development activity controls, including controls for fuel spill control, waste removal, concrete waste management or painting preparation.	During construction, prevent the introduction of pollutants in addition to sediment into stormwater. (Manual Section 5)
6.	Use one or more of the following to permanently stabilize soils before final building inspection: Permanent vegetative cover, mulch applications or application of sod.	After construction but before project completion, permanently stabilize all exposed soils that have been disturbed during construction. (Manual Sections 4-4)
7.	Prevent sediment from entering all storm drains, including ditches, which receive runoff from the disturbed area	Remove temporary drain inlet protection measures after final site clean-up. Call for #210 inspection.

You must request a preconstruction erosion control inspection prior to construction. Call 503-823-7000 and request a #200 inspection using your IVR number.

I agree to meet each requirement and use appropriate erosion control measures as outlined above to prevent erosion and sedimentation from leaving the site of project/permit number referenced. I understand that all inspections are still required, and that failure to install or maintain adequate measures may result in a re-inspection fees or additional fines. A permanent erosion control inspection #210 will be required prior to a final building inspection.

Disclaimer for Existing On-site Sewage Disposal System

To Our Valued Customers:

Bureau of Development Services records indicates there is a cesspool under your property. Due to the inherent risks associated with building near or over a cesspool, it is your responsibility as the property owner to be sure that you or your property are not adversely affected by any of these. Caution must be used to ensure that any septic tanks, cesspools, or drywells are properly decommissioned so that they do not collapse, causing the building to settle, and/or cracks to form in the foundation.

It is your responsibility to determine whether any septic tanks, cesspools, or drywells exist and have been properly decommissioned. In order to determine this, a septic tank, cesspool, or drywell would need to be uncovered and the contents verified. A properly decommissioned septic tank, cesspool, or drywell should be filled with $\frac{3}{4}$ inch minus gravel, pea gravel, or sand. If you determine that the septic tank, cesspool, or drywell has not been properly decommissioned, you may decommission it by following the instructions below.

If you have any questions regarding this matter or other matters regarding on-site sewage disposal systems, you may contact the Environmental Soils section at 503-823-7790.

Project or Permit Number OC-140811-RS

Project Address 5401-5413 SE 122nd

I understand the above. I am the owner of the property or am authorized to act for the property owner(s)

OAR 340-71-185 Decommissioning of System Procedures for Decommissioning:

1. The septic tank, cesspool, or drywell shall be pumped by a licensed sewage disposal service to remove all sludge.
2. The septic tank, cesspool, or drywell shall be filled with sand, pea gravel, or $\frac{3}{4}$ " minus gravel or other material approved by the Agent.
3. The system building sewer shall be permanently capped.
4. Call 503-823-7000 for an inspection after the system has been pumped and filled, but not covered.

Information is subject to change.

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by Evren Northwest, Inc. were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

Certified Sanborn Results:

Certification # 6718-4981-8994

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Abstract is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Abstract includes a search and abstract of available city directory data. For each address, the directory lists the name of the corresponding occupant at five year intervals.

Business directories including city, cross reference and telephone directories were reviewed, if available, at approximately five year intervals for the years spanning 1924 through 2017. This report compiles information gathered in this review by geocoding the latitude and longitude of properties identified and gathering information about properties within 660 feet of the target property.

A summary of the information obtained is provided in the text of this report.

RECORD SOURCES

EDR's Digital Archive combines historical directory listings from sources such as Cole Information and Dun & Bradstreet. These standard sources of property information complement and enhance each other to provide a more comprehensive report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer. Reproduction of City Directories without permission of the publisher or licensed vendor may be a violation of copyright.

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E1527-21), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E 2247-16), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E 1528-14) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.

Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal RCRA generators

RCRA-VSQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Very small quantity generators (VSQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

A review of the RCRA-VSQG list, as provided by EDR, and dated 02/28/2022 has revealed that there is 1 RCRA-VSQG site within approximately 0.25 miles of the target property.

ADDITIONAL ENVIRONMENTAL RECORDS

Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 02/28/2022 has revealed that there is 1 RCRA NonGen / NLR site within approximately 0.25 miles of the target property.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR Hist Auto: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Auto list, as provided by EDR, has revealed that there are 2 EDR Hist Auto sites within approximately 0.125 miles of the target property.

EXECUTIVE SUMMARY

EDR Hist Cleaner: EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Cleaner list, as provided by EDR, has revealed that there is 1 EDR Hist Cleaner site within approximately 0.125 miles of the target property.

BEGGARS TICK AUTOMOTIVE (Continued)

S119161971

Updated Date: 12/17/2002
Decode for NarcdID: Contamination
NARR Comments: (7/13/00 MTP/SAP) A complaint received by DEQ on April 10, 2000 indicates that waste oil and grease was improperly disposed of in a dry well at the former Beggar's Tick Automotive shop. The discharge allegedly occurred over a 13-year period. The building is currently vacant.

Environmental Interest/Information System:

OR-DEQ (Oregon - Department Of Environmental Quality) is a regulatory agency whose job is to protect the quality of Oregon's Environment. DEQ uses a combination of technical assistance, inspections and permitting to help public and private facilities and citizens understand and comply with state and federal environmental regulations.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

NARR Comments: (4/4/04 RGS/ICP) Investigation and cleanup under Independent Cleanup Pathway. Investigation and cleanup performed in March 2003. Petroleum contaminated soil and an above ground heating oil tank in the residential crawl space were removed from beneath a bedroom floor in March 2003. Approximately 1.1 tons of soil were hand excavated from the crawl space and treated at TPS Technologies. Soil removal was limited due to house foundation and rocky soil conditions. The volume of soil with TPH exceeding 500 mg/kg is estimated to be about 12 cubic yards. Constituent data is generally less than DEQ residential risk-based concentrations. After discussion with DEQ's Tanks Program, DEQ determined that no further action was required for the site, provided that the vapor barrier and concrete placed in the excavation remain in place over the residual contamination. DEQ made its determination on April 4, 2003.

Environmental Interest/Information System:

OR-DEQ (Oregon - Department Of Environmental Quality) is a regulatory agency whose job is to protect the quality of Oregon's Environment. DEQ uses a combination of technical assistance, inspections and permitting to help public and private facilities and citizens understand and comply with state and federal environmental regulations.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

NARR Comments: DEQ, USGS, EPA, and local city and county jurisdictions have conducted numerous water quality studies in Johnson Creek. Results from these investigations leave little doubt that Johnson Creek water quality is compromised. A ranking of water bodies in the Lower Willamette River Basin by DEQ, based on an index of water quality criteria including temperature, dissolved oxygen (DO), biological oxygen demand (BOD), fecal coliform, nitrate nitrogen, total phosphorous, pH, and ammonia showed Johnson Creek to have the worst water quality among the 12 sites evaluated (DEQ, 2003). As discussed below, Johnson Creek also has elevated concentrations of hazardous substances, such as the pesticides DDT and dieldrin, metals, polychlorinated biphenyls (PCBs), and petroleum constituents such as polynuclear aromatic hydrocarbons (PAHs). In 1988, USGS and Portland BES collected sediment samples from Johnson Creek (USGS, 1993). In the more highly urbanized area of Johnson Creek (below river mile 10.25), copper, lead, and zinc concentrations exceeded levels typically found in the Willamette River. The maximum concentrations of copper, lead, chromium, and mercury were 2 to 10 times higher than typically found in the Willamette River. DDT and PCBs were the most commonly detected organic compounds, with the highest DDT concentration detected at the most upstream sample location where land use is predominantly agricultural. In a water quality study conducted by USGS from 1991 to 1995 (USGS, 1998), the highest concentration of DDE (a degradation product of DDT) in sediment from 52 sampling sites in the Lower Willamette Basin was found in upper Johnson Creek. Despite being banned since 1972, DDT, like PCBs and metals, is persistent in the environment and can affect wildlife for decades. DDT and PCBs accumulate in animal tissue, with higher concentrations accumulating in animals higher in the food chain. DDT and a number of metals were detected in crayfish collected from Johnson Creek in 1991 (USGS, 1997). Fish tissue collected in 1992 approximately 0.2 miles upstream from the mouth of Johnson Creek had elevated levels of DDT, dieldrin, and a number of metals (Wentz and others, 1992). Dieldrin was widely used as a pesticide until banned in 1970. However, use as an insecticide for termites continued until 1987. Johnson Creek was added to the Clean Water Act 303(d) list in 1998 for the toxics dieldrin and DDT. Based on the extent of their use, and distribution of these pesticides in the watershed, it appears that they originate, in part, from the upper watershed as a result of overland runoff from farming and nursery operations. DEQ is developing a Total Daily Maximum Load (TMDL) for these contaminants. In response to elevated PCB and PAH concentrations in sediment and water column samples, DEQ will propose that these contaminants be added to the 303(d) list for Johnson Creek in the 2004-2006 biennium. In contrast to the apparent non-point source origin of the pesticides, PAHs and PCBs are suspected to originate primarily from point sources. Many of the detected concentrations of the various toxics in sediment are above DEQ Ecological Screening Level Values (SLVs), suggesting potential adverse impacts on wildlife. Concentrations of PCBs, DDT, chromium, lead, nickel, and zinc

detected in USGS 1988 study exceed their respective Probable Effects Concentration (PEC) -- the concentration above which an adverse effect to benthic fauna is likely (McDonald, 2000).

NARR Comments: The project area is defined as Johnson Creek and its major tributaries. The Crystal Springs Creek and Kelly Creek tributaries provide the largest flow contribution; smaller tributaries include Butler Creek, Hogan Creek, Sunshine Creek, and Badger Creek. Johnson Creek originates in a swale in the hills near Cottrell, and flows westward approximately 25 miles to its confluence with the Willamette River. The Johnson Creek watershed covers about 54 square miles. The topography of the watershed is varied, with a high point of 1,129 feet in the Boring Hills, near the creek's source, and a low point of about 20 feet above mean sea level (MSL) at the confluence with the Willamette. Creekbed elevations range from about 750 feet to 10 feet MSL. The western half of the watershed is developed, primarily as a low-density residential area, with pockets of commercial, industrial, and high-density residential land use. The eastern half is mostly open space, farms, and nurseries. The watershed lies within six political subdivisions: the cities of Portland, Milwaukie, Gresham, and Happy Valley, and Multnomah and Clackamas Counties.

NARR Comments: A number of city, county, state and other governmental agencies along with non-profit groups have collaborated in an effort to improve the health of the Johnson Creek watershed. These activities include ongoing monitoring, implementation of TMDLs, improved storm water management, and habitat restoration. The purpose of the this investigation is to supplement these ongoing efforts by assessing hazardous substances (toxics) in creek sediment, and identify sites or areas of elevated contaminant concentrations requiring additional investigation and/or cleanup, under the authority of Oregon s Environmental Cleanup Statutes. There is relatively limited information on sediment quality in Johnson Creek, and most of the data were collected more than 10 years ago. The data generated during the investigation will be used to develop baseline contaminant concentrations that will be used for evaluating individual sites or areas along the creek. These data may assist in assessing the best areas for future restoration, and will provide an indication of the effectiveness of ongoing measures to reduce impacts to the creek.

Decode for NarcdID: Pathways & Other Hazards
NARR Comments: In general, the threat to human health from hazardous substances in Johnson Creek appears low. The majority of historical contaminant concentrations in sediment are below risk-based screening levels for human health. Potentially complete direct contact exposure pathways to sediment for recreational users do not appear to be a significant concern. Some contaminants can accumulate in fish, and later be eaten by humans. However, catch and release regulations and lack of fish stocking reduce the likelihood that consumption of fish from Johnson Creek is a pathway of concern for human health. Consumption by non-human predators, however, is considered a pathway of concern due to bioaccumulation. The risk evaluation presented in the field investigation report will include human health, but will focus on ecological risk. In addition to bioaccumulation in the food chain, other pathways of concern include direct contact with contaminated sediments by benthic organisms, birds, fish and other wildlife.

Decode for NarcdID: Site History
NARR Comments: Before urbanization in the late 19th and 20th century, the Johnson Creek watershed included a variety of habitats, such as forested uplands, marshes, and scrub-shrub habitats. Native Americans maintained summer camps along the banks of the creek. Several archaeological sites have been discovered in what are now heavily developed areas. Early pioneers began the transformation of the environment by logging to provide building materials, fuel and railroad ties. Sawmills were built and dams were constructed to create holding ponds for the logs in the surrounding flood plains. Wetlands along the lower portion of Johnson Creek were filled to make way for residential development. Floodplains in the middle portion of the creek were cleared for farming, such as in the Lents area, where the creek channel was altered to create large meanders to facilitate irrigation of adjacent fields. Settlers in the upper watershed cleared land for vegetable and berry farming, dairies, and ranching. The pervasive development changed the natural dynamics of the watershed, and resulted in repeated flooding. In the 1930s the Works Project Administration widened, deepened, rock-lined and channelized 15 miles of the creek as a remedy for flooding. Flooding continued, but did not deter increased urbanization and industrial development along the creek in Milwaukie and Gresham, and Johnson Creek Boulevard in Portland. Increased developmental pressures occurred from the 1960s through the 1990s, including expansion of the urban growth boundary, hillside developments, urban renewal in Lents, and further infilling of some of the last unaltered creek segments. As early as 1975, when DEQ conducted a water quality study, the effects of development on the health of the watershed were being recognized. Additional assessment, monitoring and development of management plans by various agencies occurred throughout the 1980s and 1990s. Monitoring is still being conducted, and management plans have been developed and implemented.

NARR Comments: The City of Portland posted the site as potentially hazardous in January 1992 due to mishandling of PCB equipment. DEQ and EPA inspected the site the same month, and collected five samples, mostly wipe samples and bulk samples from trucks, trailers, and buckets on the premises. These samples contained no detectable PCBs. However, a sample from a pile of burnt electrical equipment and debris contained 14 ppm PCBs. Soil samples were also collected from the nearby White Residence (ECSI #1601) and remote U.S. Forest Service sites where Jacobsen and White burned PCB-containing equipment.

NARR Comments: No remediation has occurred at the site. Site Assessment recommends additional soil sampling, as well as cleanup of ash, residue, and stored electrical equipment. Wipe samples should be taken from vehicles used to transport electrical equipment, and within the home. These actions warrant a low priority. The site should be placed on the Confirmed Release List.

Decode for NarcdID: Contamination

NARR Comments: (4/7/03) DEQ completed review of a Preliminary Assessment (PA) dated February 24, 2003. The PA contained a summary of previous investigations. Relatively low level petroleum concentrations have been detected at the site in the vicinity of a former gas station. Elevated concentrations of dry cleaning solvent (perchloroethene, aka PCE) were detected in soil gas samples collected in the vicinity of a former dry cleaners. Co-located soil samples were either non-detect or contained low concentrations of PCE. (MTP 12/13/05) In 2004 additional investigation was conducted, including subsurface vapor sampling at the adjacent Jackson-Hewitt tenant space. Subsurface Investigation results showed elevated levels of PCE (up to 55,000 ug/m3) and TCE (up to 2,300 ug/m3) in sub-slab soil gas samples. Soil vapor transport simulations conducted by DEQ using methods based on the Johnson-Ettinger Model indicate that significant concentrations of TCE may be migrating into indoor air. The sanitary sewer appear to be the source of the PCE/TCE.

NARR Comments: Used dry cleaning solvent disposal prior to 1999 is not well documented. Numerous dry wells or a former septic/cesspool system are areas of concern. There are apparently two or more old abandoned tanks behind the facility, in addition to the retail fuel tanks at the site, none of which have been properly decommissioned.

NARR Comments: Prior to 1990 sanitary waste was apparently discharged to an on-site septic system. There are indications that releases to the sanitary sewer have occurred, prompting concern of releases to the on-site system prior to sanitary sewer hookup in 1990. Possible releases from the USTs at the former service station have not been adequately evaluated.

NARR Comments: (4/7/03 MP/VCP) DEQ has reviewed the PA and provided comments to the responsible party via letter dated March 27, 2003, and has requested a response within 30 days. (MTP 12/13/05) DEQ has requested Pan Pacific to collect additional site specific data to refine the vapor transport model and/or conduct remedial actions at the site aimed at addressing TCE vapor migration into the Jackson-Hewitt Tenant Space. Based on the detections of TCE and PCE in soil gas, and modeling results that predict unacceptable TCE concentrations may exist in indoor air, DEQ recommends the site be placed on the Confirmed Release List and Inventory of Hazardous substances. (3/7/06 MTP/VCP) Environ, on behalf of Pan Pacific, reported the following site-specific information to incorporate into the Johnson-Ettinger vapor intrusion model: Building height = 454 centimeters (cm) Building air exchange rate = 2 exchanges/hour (default for commercial buildings). Soil water-filled soil porosity of 0.2 cm³/cm³ Modeling results using these parameters resulted in estimated indoor air concentrations of TCE essentially equivalent to DEQ's acceptable risk-based concentration of 0.1 ug/m³. Subsequent measurements of the HVAC system, however, showed an actual air outflow rate from the building of 400 ft³/minute, which equates to an air exchange rate of approximately 0.8/hour. Incorporating the actual exchange rate into the model, with all other parameters unchanged as presented above, results in an estimated indoor air concentration for TCE of 0.245 ug/m³. The excess cancer risk from exposure to this concentration is about 2 x 10⁻⁶, which exceeds the acceptable risk level of 1 x 10⁻⁶ for protection of humans specified in state law. On the basis of these results, DEQ is proceeding with listing the site on the Confirmed Release List (CRL) and Inventory of Hazardous Substance Sites.

NARR Comments: In 2006, chlorinated hydrocarbon vapor intrusion appeared to be of concern. There was also the potential for future site excavation or construction workers to come into direct contact with petroleum hydrocarbons or chlorinated solvents. Based on 2008 conditions including no construction over suspected former dry wells/septic, and maintenance of HVAC building air exchange rate of 2/hour or greater in the former dry cleaner space and adjacent tax preparation service office, DEQ determined that the site presented no unacceptable health threats.

NARR Comments: The fuel station was build circa 1959, and discontinued operation in the late 1990s. Dry cleaning occurred at the Speedy Bright dry cleaners portion of the site from 1980 until present. A self contained dry cleaning machine was installed in 1999.

NARR Comments: [March 2008] DEQ has issued a conditional NFA for this site. Conditions include no construction over suspected former dry wells/septic, and maintenance of HVAC building air-exchange rate of 2/hour or greater in former dry cleaner space and adjacent tax preparation service office. The facility remains listed on the Confirmed Release List and Inventory based on the need for these long-term controls.

NARR Comments: (4/1/09 CWH/CU&ER) The City of Portland CoP was awarded an EPA Brownfields Petroleum (site) Cleanup grant and is in the process of evaluating remedial alternatives. CoP had their contractor complete an Analysis of Brownfields Cleanup Alternatives (ABCA) in November of 2008. DEQ approved the ABCA in May 2009. (12/16/11 CWH/VCP) In 2005, the DEQ's Leaking Underground Storage Tank (LUST) Program granted a No Further Action determination for the property based on a land use as open land. Remaining petroleum-contaminated soil (PCS) was noted at that time as: Approximately 75 cubic yards of PCS in the vicinity of test pits TP-4, TP-13, and TP-14 at depths from 11 to 15 feet below ground surface (bgs), assumed to be part of historic releases from the former fuel USTs. Approximately 70 cubic yards on the west side of the property ranging from 10 to 15 feet bgs, in the vicinity of boring SB-2 and AGI test pit TP-3, also assumed to be part of historic fuel USTs releases. PBS, working for City of Portland, conducted a baseline investigation in 2009 to confirm the location of the two contaminated areas identified in 2005, and to assess the remaining petroleum contaminant concentrations. This investigation consisted of installing monitoring wells and conducting a soil and groundwater investigation. The results of the investigation were used to design the treatment injections. URS-selected Petrox bacteria and ORC were successfully injected into the selected east and west remediation areas in two rounds during the fall of 2009. Subsequent confirmation sampling indicated that where Petrox encountered contamination in soil, it achieved substantial reduction. Based on sampling of soil and perched groundwater performed in December 2009

and May 2010, petroleum contamination remains in perched water but is below applicable RBCs for migration or applicable exposure pathways (see analysis below). Contamination in the perched water zone has not migrated laterally towards the creek, and groundwater monitoring does not indicate a future threat to the creek. Conceptual Site Model and Exposure Pathways Analysis Conceptual Site Model: Human receptors at the site are assumed to be short-term recreational users and excavation workers. Pathways used to select the appropriate risk based concentrations (RBCs) for soil are ingestion, dermal contact, and inhalation (residential and excavation worker), volatilization to outdoor air (residential), and leaching to groundwater (residential). Groundwater pathways considered for RBC selection are volatilization to outdoor air (residential), and groundwater in an excavation. The pathway for ingestion and inhalation of groundwater is not complete, as groundwater is not used at this site, tests did show impacts to deeper regional groundwater. Site applicable exposure pathways are discussed below: Soil Ingestion, Dermal Contact and Inhalation (recreational user) - Short-term recreational users are unlikely to come into contact with contaminated soil, as the residual soil contamination was found between 6.5 and 11 feet below ground surface (bgs) and this pathway is incomplete. In addition, petroleum concentrations found at these depths do not exceed the residential RBCs for this pathway. Soil Ingestion, Dermal Contact and Inhalation (excavation worker) - For future excavation workers, this pathway is complete as impacted soil is within depths where excavation work could occur. However, residual concentrations are three to four orders of magnitude lower than the RBC and this pathway is not of concern. Volatilization to Outdoor Air (soil) Volatile organic compounds (VOCs), as gasoline, remain in shallow soil at the site and this pathway is considered complete. However, residual concentrations are two to three orders of magnitude lower than the RBC and this pathway is not of concern. Leaching to Groundwater (soil) - Field observations and lab testing show that contamination in perched water has not migrated vertically to regional groundwater. Therefore, this pathway is incomplete. Volatilization to Outdoor Air (groundwater) - VOCs, as gasoline, remain in perched water at the site; therefore, this pathway is considered complete. Gasoline constituent groundwater concentrations are three to four orders of magnitude lower than the volatilization to outdoor air RBCs and this pathway is not of concern. The baseline cleanup goals targeted by the City of Portland were achieved - residual petroleum concentrations are below RBCs for exposure pathways considered complete at the site. DEQ issued a No Further Action determination to the City of Portland on December 16, 2011.

NARR Comments: Site underwent LUST cleanup (26-98-1131) and completed cleanup under that program. Some petroleum contaminated soil, found primarily in two areas, or <quot>pockets<quot> were left in place. The City of Portland took ownership of the site in 1998, after the LUST no further action determination was made.

NARR Comments: [May 2010, PBS Environmental] This property is part of a long-term flood management program, and future use is expected to be natural areas, park and trails. Redevelopment into these uses may include recontouring the existing stream channel. When assessing the effectiveness of the proposed remedy, future receptors of any remaining contamination are assumed to be short-term recreational users and excavation workers. In addition, residual contamination should be assessed for impacts to habitat by looking at the potential for leaching to groundwater. (See attached report for more detail on site remedial activities.)

NARR Comments: Electrical equipment, containing PCBs and heavy metals, was burned off-site and then transported to the White Residence and the Jacobsen residence (ECSI #1602). Once on these properties, the electrical equipment was disassembled and recovered for salvageable metals. An EPA Technical Assistance Team (TAT) investigation, completed in April 1992, identified PCBs and heavy metals in site soils. Soil samples were also collected at the nearby Jacobsen residence and remote U.S Forest Service sites where White and Jacobsen burned PCB-containing equipment.

NARR Comments: (5/4/89 LSK/SAS) Upon receipt of a complaint regarding leaking drums on 7/19/88, DEQ visited the site on 7/21/88. Numerous 55-gallon drums were discovered on-site. The property owner reported that there had been spills at the site. A renter of the property became concerned about the chemicals when the family dog died and an autopsy revealed that death was the result of consumption of toxic material. DEQ collected soil samples near the drums and the yard, and recommended that residents keep their pets away from the questionable areas. As of 8/15/88, one soil sample contained 55 ppm malathion, but not all results were in. DEQ NWR staff recommended that further investigation

Decode for NarcdID: Remedial Action
NARR Comments: (8/29/89 LSK/SAS) On 7/28/88, DEQ requested itemization of contents of storage shed and removal of existing drums as hazardous waste. Drums were disposed of 5/12/89 after numerous letters and discussions with DEQ. Soil sample results indicate the presence of pesticides; these samples failed an aquatic toxicity test. Further assessment is needed. (11/30/06 CWH/SAP) File updated in NWR ECSI files. Back in November of 2003, DEQ was made aware of development plans for this site. DEQ initiated contact with the property owner and provided information to the owner regarding site history and needed actions to resolve. DEQ had periodic communications with Mr. L. Cox of LHC Enterprises, the property owner, and with his legal representative up to 3/8/04. Legal representative for LHC stated to DEQ that Mr. Cox was likely not a responsible party under state law and did not have resources to do cleanup under DEQ oversight. As of the date of this note - 11/30/06, DEQ is unaware of any remedial activity at this site. The site will remain on the CRL until data is provided to demonstrate there is no longer any risk to human health or the environment. (3/26/2020 KJD/VCP) Property owner submitted ICP agreement in 2018 but no deposit leading to termination of ICP project.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal NPL (Superfund) sites

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

	Data Release Frequency: Quarterly

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Lists of Federal Delisted NPL sites

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425(e), sites may be deleted from the NPL where no further response is appropriate.

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly known as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Lists of Federal CERCLA sites with NFRAP

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be potential NPL site.

Lists of Federal RCRA TSD facilities

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Lists of Federal RCRA generators

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

RCRA-SQG: RCRA - Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

RCRA-VSQG: RCRA - Very Small Quantity Generators (Formerly Conditionally Exempt Small Quantity Generators)

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Very small quantity generators (VSQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

SSTS: Section 7 Tracking Systems

Section 7 of the Federal Insecticide, Fungicide and Rodenticide Act, as amended (92 Stat. 829) requires all registered pesticide-producing establishments to submit a report to the Environmental Protection Agency by March 1st each year. Each establishment must report the types and amounts of pesticides, active ingredients and devices being produced, and those having been produced and sold or distributed in the past year.

RMP: Risk Management Plans

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

Date of Government Version: 10/19/2006

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historical Auto Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

EDR Hist Cleaner: EDR Exclusive Historical Cleaners

EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

NY MANIFEST: Facility and Manifest Data

Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a TSD facility.

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:
