Phone Memo

Date: 9/29/2022 Time: 10:15am

Call From/To: Carey Vonasek

Title: _____

Company: Tangent Fire Dept.

Location: _____

Phone No.: 541-928-8722 cvonasek@tangentfire.com

RE: 22-93-4013 Backlog letter received

Summary of Call:

Spoke w/Assistant Chief Carey Vonasek. Tank was removed and a water fill tower is now in it's place using well water. Well Services only the fill tower – there is a separate well that is used for potable water for the station. There is an individual that Has recollection of when the tank was removed (was present that day). Suggested they get a written statement of recollection For use with cleanup file. Recommended they hire an environmental consultant to help with soil sampling and water sample. Seems like it may be a low complexity site due to age of contamination and only soil contamination reported. However, Contractor that did the tank pull was found to be fraudulent; no information in file other than decommissioning checklist. Old tank location is close to building and railroad ROW. Will send email to Mary Camarata to see if there are any grants Available for fire station for this type of work.
