Hello Chris Griffin,

My name is Rachel Long and I work with the DEQ Environmental Cleanup Program here in Western Region. I am reaching out to you today to check in with you regarding the open Leaking Underground Storage Tank site (22-93-4013) located at 32053 Bridfoot Dr, Tangent OR 97389.

I perform periodic reviews on open leaking underground storage tank sites to see if there is anything I can do to help move them forward while they wait for a project manager to be formally assigned. During my review I noticed a couple of important things I wanted to bring to your attention to help aid in closure of this site.

1. An important thing to note with this site is that the historical decommissioning work for your site was completed by UST Environmental. UST Environmental also known as Hogate Drilling, was charged with falsifying laboratory and disposal receipts on June 22, 1994. DEQ can not accept any of the work conducted by UST Environmental. Please see the attached letter from February 6, 1995.
2. If you haven't already, I recommend hiring an environmental consultant who is familiar with what is required for an adequate site investigation. If you are looking for a list of consultants, I encourage you to check with the Northwest Environmental Business Council (NEBC). They post a list of members, and you can find them on the web at <https://www.nebc.org/>.

A copy of your site's records can be viewed here:

https://ormswd2.synergydcs.com/HPRMWebDrawer/Record?q=webdrawercode%3A%22*089*%22+And+recAnyWord%3A%22LUST22-93-4013%22&sortBy=

I have attached the most recent communication between the Tangent Fire Department and DEQ.

If you have any questions or development with this site, please reach out to our general inbox: unassigned.lust@deq.oregon.gov. I would be happy to speak with you and discuss this site further.

Thank you for your continued work.

Rachel Long
