Hi Quinn and Andrew,

Thank you for making the updates to the AQ520 and Risk Assessment Report. Most of the changes look good but we found one discrepancy: in Table 6-2 of the Risk Assessment, the child exposure locations have been updated correctly but it looks like the dispersion factors for noncancer risk have not been updated to reflect the new location. Could you take a look and let me know if you can correct the dispersion factors and hazard index calculations for child noncancer risk, and re-submit the Risk Assessment Report by **August 2, 2024**? Please also submit the excel version of the risk assessment report tables so that we have the most recent version for our documentation.

I'm available this week if you have questions - if you need more time please let me know in the next few days when you think you can make the updates.

Thank you!

Julia DeGagné, P.E. (she/her)
