NPDES Permit Minor Modification #4 Fact Sheet

City of Ashland

1. Introduction

The Department of Environmental Quality (DEQ) proposes to modify the National Pollutant Discharge Elimination System (NPDES) wastewater permit issued for the City of Ashland. This department-initiated modification #4 is a minor modification for typographical corrections to Schedule B and C of the permit. This modification features no substantive changes to any permit limits. DEQ does not consider these changes as major permit modifications.

2. Summary of Changes

Typographical errors were made in Schedule B and Schedule C of the permit renewal issued February 15, 2022. A summary of the changes is listed below:

- 1) Schedule B.3, the Outfalls 001, and 002, and 004 effluent monitoring location is clarified as at the effluent diversion structure.
- 2) Schedule C, Table C1, the September 1, 2023 deadline to submit a progress report is modified to September 1, 2024. Based on a review of the factsheet, it is clear that the September 1, 2023 was a typo. The change to the due date was not requested by the permittee, but instead meets the condition for a milestone every twelve months.
