Re: Extension of the Toxic Emissions Inventory Submission Requirement  
Due Date Under Cleaner Air Oregon

Dear Ms. Devita-McBride:

Biomass One, LP, is requesting a 30-day extension to the November 22<sup>nd</sup> deadline for submission of the Toxic Emissions Inventory due to unanticipated delays in receiving an approved emission factor from the DEQ for arsenic, cobalt, and antimony based on recent Source Test Results. We are no longer confident that we will be able to complete the required submittals by the current deadline. As we discussed earlier, these results are needed to update certain emission factors used in the Toxic Emissions Inventory.

The inventory is otherwise complete (except for the aforementioned emission factors and some CETEU data), a Consulting Engineering firm (Trinity Consultants) has been secured to perform modeling, and the physical portion of the source testing is completed.

Respectfully Submitted,

A handwritten signature in blue ink that reads "Kurt E. Lumpkin".
