White City, OR 97503

Sent via email only

Kurt Lumpkin,

Biomass One, L.P. (Biomass One) was called in to the Cleaner Air Oregon (CAO) program on April 26, 2024, and elected to conduct source testing prior to submittal of the CAO Emissions Inventory (Inventory); therefore, Biomass One was required to submit the Modeling Protocol (Protocol) and Risk Assessment Work Plan (Work Plan) concurrent with the Inventory and supporting information by September 23, 2024. This deadline was extended to November 22, 2024, after a previous extension approval from DEQ on September 9, 2024. On November 7, 2024, DEQ received a request from Biomass One for a 30-day extension of the deadline for submittal of the Inventory. Biomass One is requesting an additional 30-day extension to review DEQ's initial comments on the most recent source testing results and submit the Inventory, Protocol, and Work Plan.

DEQ may grant an extension based on the criteria set in [OAR 340-245-0030\(3\)](#), which require sources to demonstrate progress towards completing the submittal and show that a delay is necessary for good cause. DEQ understands that Biomass One has demonstrated progress on the CAO submittals by completing the source testing and working with a consultant to complete the Protocol and Work Plan. Further, DEQ agrees that an extension would allow Biomass One to incorporate the preliminary results of the most recent source testing into establishing the most representative emissions estimates for the Inventory and Modeling Protocol and develop complete submittals for approval.

For these reasons, DEQ approves Biomass One's request and grants a 30-day extension from the previous submittal deadline of November 22, 2024. Biomass One's Inventory, Protocol, Work Plan, and supporting documents must be submitted by no later than **December 23, 2024**.

DEQ remains available to meet with Biomass One or provide feedback via email. Please contact me directly at 971-300-3653 or amy.devita-mcbride@deq.oregon.gov, if you have any questions regarding this letter or CAO submittal requirements, and I look forward to your continued assistance with this process.

Sincerely,

Amy DeVita-McBride
CAO Project Engineer
