

June 26, 1979

Members of the Board
Newberg Community Foundation
Newberg, Oregon

Friday, June 15, 1979. I am writing to you with the following terms to be carried out for the next year for the staff of 9, if approved by the Board. The nursing staff would like to see the plan approved and the proposed plan.

Over the past year we have been working to standardize the pay scale so nurses could be compared to other nurses in the area. The nursing staff looks forward to the plan you have proposed. The proposed one is much too low.

The proposed plan is as follows:

- | | | |
|-------------------------------|--------|--|
| 1) New graduate | \$6.34 | |
| 2) After 6 months experience | \$6.50 | |
| 3) After 18 months experience | \$6.67 | |
| 4) After 30 months experience | \$6.83 | |
| 5) After 42 months experience | \$7.00 | |
| 6) After 54 months experience | \$7.17 | |

Compare our proposed step system with Tuality Hospital:

- | | |
|----------------------------|--------|
| 1) Starting base pay | \$6.34 |
| 2) 1 year experience | \$6.50 |
| 3) 2 years experience | \$6.67 |
| 4) 3 years experience | \$6.83 |
| 5) over 3 years experience | \$7.00 |

At St. Helens Hospital a general staff nurse received in pay from \$7.15/hr to \$8.41/hr. There is quite a difference between our plan and St. Helens Hospital compared to our proposed scale. Our proposed scale is not competitive.

Shift differential has been authorized from 17¢/hr to 35¢/hr. Although this is a step in the right direction, it is still not enough. For example, both Tuality and Meridian Park offer 35¢/hr shift differential, which is a fair figure.

To further compound matters, part time employees are given no compensation for their efforts according to the contract. They should receive either an additional 10% pay above their base pay or they should be due to receive vacation and sick leave time comparable to those who are full time. They had been paid a higher hourly wage, which now will be taken into consideration by giving them earned time off in compensation.

The nursing staff is also concerned with holiday benefits. According to the projected plan the part time nurses will receive time and a half pay for working the holiday. The nurses are 100% for this benefit. It goes. The full time nurses have patiently waited for this benefit and no positive action has been taken on this. More specifically, the full time nurses receive one and a half for working the holiday and an additional day off on another day. If the holiday falls on a regular day off for the full time employees, they receive only an additional day off. This is an incentive for working a holiday or working in and duty, particularly without adequate compensation.

As understood by the nursing staff, we are hospital employees. However, we do not receive the same benefits as the hospital. We felt we should be included in this benefit.

Under our present system of personnel plan given to us by administration, we can not maintain optimum staffing because our wages and benefits are not competitive with the surrounding metropolitan area hospitals. We can not maintain high personal morale because we are given ambivalent recognition. Monthly we are told what a fine job we are doing, but monthly the hospital administration erodes their confidence in us.

We recognize that our request for an overall increase in budget for the hospital of more than 7%. On the other hand, the hospital seems to be losing money orienting personnel to the hospital to have more employees resign within six months. Although there are many reasons for resignations, major factors include substandard wages and benefits. At present, our ICU department is experiencing an acute shortage of ICU nurses. Two ICU nurses have been in the past month, compensation being a key reason for their departure.

The nursing personnel are needed at Newberg. Newberg offers its patients in all areas. We want to maintain and improve the quality of care we give. We need an incentive to keep our nurses working in Newberg Hospital and to encourage more nurses to work here to fill deficits in our nursing staff. We need a following card to use when we are offered substandard wages and benefits.

NEWBERG COMMUNITY HOSPITAL COMMISSION

Finance Committee

Minutes
6/21/84

Present: Joe Plews, Chairman
Bill Dolan
Nick Thoennes

Guests: Phil Bentley
Dick Mitchell
Gary Fleming

The meeting was called to order at 7:05 a.m. by Chairman Joe Plews.

Mr. Thoennes explained that the purpose of the meeting was to give the committee detailed information on the planned business office conversion July 1st. The Commission had accepted the proposal and associated costs at their regular May meeting.

Mr. Bentley explained the details of mechanizing the accounts receivable general ledger and the payroll system. An input terminal will be provided in the admitting area. Batch processing will take place at Cycare.

Mr. Mitchell explained the logistics of the change. Admitting will be under the supervision of the Director of Nursing. Admitting will remain in the current business office. The business office will move to the trailer on Saturday, June 30. Job descriptions and duties will be clearly delineated in contrast to the current situation in which everyone is doing everything.

Patient billing will be much improved. Detailed, itemized bills will be processed. Such information will be accessible on the terminal. Charges and a new chart of accounts will be automated and in the computer file. Charges will be refined during the next few months. Statements on all accounts will be processed beginning July 1. Mr. Mitchell cautioned that the staff should be prepared for an increase in patient questions and complaints while the process is being refined.

Special computer-processed reports will be generated, including patient accounts receivable, charge master, by cost center, performance reports to budget on expenses and revenues for all departments, and payroll listings. New payroll checks are being prepared for distribution every other Friday, beginning in August.

A manual system will not parallel the computer system. Mr. Bentley mentioned that experience has shown it is more cost effective and efficient to convert totally at one point in time. Training sessions have been scheduled already. The assistant business office manager from St. Vincent will be at NCH for the first two weeks of the conversion. Other St. Vincent and Cycare staff will be available as needed.

New financial reports are anticipated as a by-product of this system. These will be manually prepared based on information from the computer report. An example of the form was distributed (see attachment). The committee had no major changes to recommend. The report was considered acceptable. Mr. Dolan requested additional back up information to be presented in addition to the financial report to explain obvious variances.

Gary Flaring explained the new materials management system. Several space changes have taken place as part of the plan. Mr. Thoenes added that the basement is being cooled, and a materials manager will be hired effective July 1.

There being no further business, the meeting was adjourned at 9:00 a.m.
Respectfully submitted,

Nick Thoenes
Nick Thoenes
Acting Executive Director
