GRANTS PASS OR 97526

Property Address: 1270 Kinney Way, Merlin, OR 97532

Parcel: 350616B000020200 - Primary **Township:** 35 **Range:** 06 **Section:** 16

Lot Size: 2.41 **Water Supply:** Well
Zoning: N/A **City/County/UGB:** N/A
Land Use Approval: N/A

Category of Construction: Single Family Dwelling

	Existing	Proposed
Use of Structure:	N/A	3 BDRM SFR
Number of Bedrooms:	N/A	3

System Specifications

Max Peak Design Flow: 450 gpd. **Proposed Flow:** 375 gpd.
Min Septic Tank Volume: 1000 gal. **Min Dosing Tank Volume:** N/A

Drain Field Specifications

Drain Field Type: Standard **System Distribution Type:** Serial
Drainfield Sizing: N/A **Distribution Method:** Serial
Media Type: Infiltrator Chambers **Media Depth:** N/A
Trench Length: 228 linear ft. **Rock Above Pipe:** N/A
Max Depth: 30 in. **Undisturbed Soil Between Trenches:** 8 ft.
Min Depth: 18 in. **Capping Fills-Min Depth of Fill Material:** N/A

Date Certificate Issued: 08/18/2021

Work Description: STANDARD CONSTRUCTION PERMIT

Conditions of Approval

1. The system must be installed by the property owner or a licensed sewage disposal business (installer).
2. Vehicular traffic and livestock must be restricted from the system area.
3. All roof drains must be directed away from the system
4. All tanks must be tested for watertightness and have a water-tight riser to the ground surface. Twenty- inch minimum diameter if less than 36-in deep. Thirty-inch minimum diameter if greater than 36-in deep. Maintain access to septic tank for pumping and service.
5. Meet all required setbacks
6. The system must be installed in the area approved during the site evaluation and in accordance with the construction plan approved by the agent, including any changes made by the agent.
7. All work is to conform to OAR 340, Division 71 and 73. Make no changes in system location or specifications without approval by the agent.
8. A minimum 18-gauge, green-jacketed tracer wire or green color-coded metallic tape must be placed on top of the effluent sewer or pressure transport pipe from tank to drainfield.
9. Header pipe from Distribution or Drop Box must be minimum 4-ft length, level, and bedded.
10. Each drainfield trench must be level within a tolerance of plus or minus 1-inch.
11. Maximum length of an individual trench is 150-feet.
12. Serial distribution, each trench bottom to be level and on contour. Use Drop box(es).
13. A pre-cover inspection of the installed absorption facility (prior to backfill) is required.
14. A final inspection request and notice (FIRN) form including a detailed and accurate as-built plan of the constructed system and a list of all materials used in the construction of the system must be completed and submitted prior to requesting a final inspection.
15. Photos of the septic system components must be submitted along with the FIRN.

Installation of this onsite wastewater treatment system has been determined to comply with the applicable requirements in Oregon Administrative Rules Chapter 340, Divisions 071 and 073 and the Conditions of Approval above.

1. In accordance with Oregon Revised Statute 454,665, this Certificate of Satisfactory Completion is issued as evidence of satisfactory completion of an onsite wastewater treatment system at the location identified above.
2. Issuance of this Certificate does not constitute a warranty or guarantee that this onsite wastewater treatment system will function indefinitely without failure. Conditions imposed as permit requirements continue for the life of the system.
3. The area of the initial and the identified replacement area must not be subjected to activity that is likely to adversely affect the soil or the functioning of the system. Such activities may include, but are not limited to, vehicular traffic, livestock, covering the area with asphalt or concrete, filling, cutting, or other soil modification activities.
4. This onsite wastewater treatment system that be connected to the facility referenced herein within 5 years of the issuance of this Certificate of Satisfactory Completion (CSC) or rules for authorization notices, alteration permits, or construction-installation permits as outlined in OAR 340-071-0160, 340-071-0205, or 340-071-0210 apply, including payment of an additional fee.
5. This system must operate in compliance with OAR Chapter 340, Division 071 and must not create a public health hazard or pollute public waters.
6. Unless otherwise required by the agent, the system installer must backfill (cover) this system within 10 days after the issuance of this Certificate of Satisfactory Completion.

Certificate of Satisfactory Completion

System Inspection: No **Operation of Law - 7 Days Notice:** Yes **Pre-Cover Inspection Waived Per 340-071:** No
Comments: N/A

Date issued: 6/14/21**Expiration date:** 6/14/22**Work description:** STANDARD CONSTRUCTION PERMIT

This Construction-Installation Permit authorizes the property owner to construct an onsite wastewater system specified above.

Rules, Approved Material Listing; and Database of Licensed Installers can be accessed at:
<http://www.deq.state.or.us/wq/onsite/onsite.htm>

General Conditions And Requirements For All Permits: Onsite Construction-Installation Permits are valid for one year from the date of issuance. The expiration date is noted on this permit. Renewal of a permit may be granted if an application for permit renewal is received before the permit expiration date. Reinstatement of a permit may be granted if an application for permit reinstatement is received within one year after the permit expiration date. Transfer of a permit from the permittee to another person may be granted if an application for permit transfer is received before the permit expiration date and no other changes to the permit are necessary.

Installation Requirements: The drainfield must be installed in undisturbed native soil. No alterations of the natural site conditions such as soil removal or filling, or slope/topography alterations within the approval areas for both the initial and replacement systems are allowed, unless otherwise authorized by the Agent. Do not install system when soil moisture, high groundwater, adverse weather, or other conditions that could affect the quality of installation or reliability of the system are present. If such conditions are present and there is a need for sewage disposal at the site, the septic tank can be utilized as a temporary holding tank as outlined in 340-071-0160(9).

Inspection Requirements: The system installer and/or the permit holder must notify the permitting Agent when the construction, alteration, or repair of a system for which a permit was issued is completed (except for the backfilling or covering of the installation). The permitting agent has 7 days to perform an inspection of the completed construction after the official notice date, unless the permitting agent elects to waive the inspection and authorizes the system to be backfilled earlier. Receipt and acceptance of a completed Final Inspection Request and Notice form by the permitting agent establishes the official notice date of your request for the final inspection. Faxed copies are acceptable for inspection request purposes only. Originals must be received before a Certificate of Satisfactory Completion can be issued.

System Backfill Requirements: The system is to be backfilled or covered as follows: * Only after the permitting agent has approved the construction installation, * or the inspection has been waived * or the Certificate of Satisfactory Completion (CSC) has been issued by operation of law (where the inspection has not been conducted within 7 days of notification of completed installation).

Unless otherwise required, it is the system installer's responsibility to backfill the system within 10 days after inspection and issuance of the CSC. Backfill must be carefully placed to prevent damage to the system. The backfill must be free of large stones, frozen clumps of earth, masonry, stumps, waste construction materials, or other materials that could damage the system. Be sure that the untreated building paper, filter fabric, or other material approved by the agent is completely covering all drain media where required prior to backfill. The system can be connected to and placed into service once it has been properly backfilled and the CSC has been issued.

Initial and Replacement Areas — Protection: The installed subsurface absorption field and designated replacement areas must be protected and kept free of development such as roadways, covering with asphalt or concrete, filling, cutting, or other soil modifications.

Danielle Morvan

Natural Resource Specialist

Final Inspection Request and Notice - Septic ID: 463-21-000185-PRMT

Pursuant to the requirements within ORS 454.665, OAR 340-071-0170 and OAR 340-071-0175, the system installer and/or the permittee must notify the Department of Environmental Quality (or its authorized Agent) when the construction, alteration or repair of a system for which a permit was issued is completed and prior to backfilling or covering the installation. The Department (or Agent) has 7 days to perform an inspection of the completed construction/installation following the official notice date, unless the Department (or Agent) elects to waive the inspection and authorizes the system to be backfilled. Receipt and acceptance of this completed form by the Department (or Agent) establishes the official notice date of your request for the pre-cover inspection. Faxed copies are acceptable for inspection request purposes only. Originals must be received before a Certificate of Satisfactory Completion is issued. Please complete sections 1 through 4 on the form and return it to the office that issued the permit. Forms that are determined to be incomplete will be returned.

Date issued: 11/13/2019

Application status: Site Evaluation Approved

Work description: SITE EVALUATION (LOT #16)

THIS IS NOT YOUR PERMIT. A Construction/Installation permit is required before you construct your system. Please contact this office when you are ready to apply for a construction/installation permit. We cannot sign off on any Building Codes forms until we issue your permit.

This site approval runs with the land and will automatically benefit subsequent owners. This site approval is valid until the approved system is constructed under a DEQ construction permit or unless the site is altered without approval from this office. Alterations/excavations/lot line adjustments made to the site, or placement of wells or utilities, etc., may invalidate this approval

If you disagree with the decision of this report, you may apply for a site evaluation report review. The application for a site evaluation report review must be submitted to DEQ in writing within 60 days after the site evaluation report issue date and must include the site evaluation review fee in OAR 340-071-0140 Table 9A. A senior DEQ staff person will be assigned the site evaluation report review application.

You may apply for a variance to the onsite wastewater treatment system rules. The variance application must include a copy of the site evaluation report, plans and specifications for the proposed system, specify the rule(s) to which a variance is being requested, demonstrate the variance is warranted, and include the variance fee in OAR 340-071-140 Table 9C. A variance may only be granted if the variance officer determines that strict compliance with a rule is inappropriate or special physical conditions render strict compliance unreasonable, burdensome or impractical. A senior DEQ variance officer will be assigned the variance application.

Marty Easter

Onsite Wastewater Specialist

This block contains a screenshot of a mobile map application interface. At the top, there is a white search bar with the coordinates "42.528176,-123.421943" and icons for search, close, and voice search. Below the search bar is a satellite-style map showing a wooded area with a red location pin and a blue location marker. The map includes the "Google" logo and the label "Joe Creek" for a nearby water feature. At the bottom, a white information card displays "Dropped pin" and "Near Merlin, Oregon · 1 min", along with three buttons: "Directions", "Share", and "Save". The top right corner of the screenshot shows standard mobile status bar icons for location, signal strength, 4G LTE, 78% battery, and the time 10:07 AM.

Additional Conditions of Approval

- Any alteration of natural soil conditions (i.e. cutting or filling) in the acceptable area may void this approval.
 - Both the initial and replacement disposal areas are to be protected from traffic, cover, development, or other potential disturbance of natural soil conditions.
 - The area must not be subjected to excessive saturation due to, but not limited to, artificial drainage of ground surfaces, roads, driveways, and building down spouts.
 - Placement of a well within 100 feet of the approved areas may invalidate this approval.
- A curtain drain is required, a minimum of _____ feet above the highest disposal trench.
 The curtain drain must be a minimum of _____ inches deep, and installed in accordance with OAR 340-071-0220 (12).
 Rake trench sidewalls.
 The system must be installed during dry soil conditions only.
 System must be installed between June 1 and October 1, unless otherwise approved by DEQ.
