Subject: 1021 & 1037 Baseline Street TBA (Former Cornelius Estby) - Final Phase II Report
Attachments: 1021 1037 Baseline Street TBA_Phase II ESA_FINALsigned.pdf

All –

Please see the attached final signed Phase II ESA report for the 1021 & 1037 Baseline Street TBA site. Note that the lab results Appendix is too large to be provided via email, so it is not included in the attached PDF. The full report with the lab report appendix can be downloaded at the following link:

[Full Phase II Report](#)

Also – I wanted to point out that the IDW manifest is also not included in the report yet. The wastes were picked up last week, but the copies of the manifests have not yet been received. Once those are available, they will be provided to this group to include as Appendix G of the report.

Thanks to all who provided feedback on the report. The only other remaining deliverable is the revised ABCA, which we are currently finalizing and will be provided by EPA.

Thank you!

Brook
