

REGION 10

SEATTLE, WA 98101

June 25, 2025

Mr. Steve Mrazik
Water Quality Manager
Oregon Department of Environmental Quality
700 NE Multnomah Street, Suite 600
Portland, Oregon 97232-4100

Dear Mr. Mrazik:

The U.S. Environmental Protection Agency has completed its Clean Water Act review of the amended Temperature Total Maximum Daily Load for the Willamette Subbasins, submitted by the Oregon Department of Environmental Quality on May 14, 2025. The amendment added TMDLs to address 31 temperature impairments in 21 assessment units in the Willamette River Mainstem and Major Tributaries project area to the original document containing Willamette Subbasins temperature TMDLs addressing 298 impairments in 236 assessment units, which was approved by the EPA on September 11, 2024. All impairments addressed by the amended TMDL project are identified on ODEQ's 2022 303(d) list as impaired for one or more fish and aquatic life uses (Enclosure 1).

The EPA is approving the TMDLs addressing 31 temperature impairments in 21 assessment units within the Willamette River Mainstem and Major Tributaries project area; this approval letter applies only to these assessment units. Since no changes were made to the Willamette Subbasins temperature TMDLs that the EPA approved on September 11, 2024, which are also contained within the submittal package for the amended Temperature Total Maximum Daily Load for the Willamette Subbasins (Enclosure 2), the EPA takes no action on those TMDLs. The submitted documentation for the amended temperature TMDLs for the Willamette Subbasins meets the statutory and regulatory requirements found in section 303(d) of the CWA and the EPA's implementing regulations at 40 C.F.R Part 130. The EPA's review indicates that the allocations have been established at levels that, when fully implemented, will lead to attainment of applicable water quality standards. As such, ODEQ does not need to include these waters on the next 303(d) list of impaired waters for temperature.

The amended Willamette Subbasins TMDL document contains watershed-based TMDLs that also address sources of thermal loading to 701 unimpaired and unassessed waterbodies within the project area, with 677 in the original Willamette Subbasins temperature TMDL document and 24

added as part of the document amendment. Wasteload allocations and loading capacity and load allocation calculations are included for all unimpaired and unassessed waterbodies. States may not automatically move assessment units into category 4a if they identify future impairments; therefore, the EPA expects Oregon to provide supplemental information for any assessment units identified as impaired in the future that Oregon wishes to cover under these TMDL projects, particularly if a translation of a narrative criterion is needed to identify the loading capacity.

ODEQ's submittal also includes a protection plan for the unlisted and assessed waters, and a Water Quality Management Plan, which is an implementation plan for the TMDLs. The EPA has no duty to approve or disapprove protection plans or implementation plans under section 303(d) of the CWA; therefore, the EPA is taking no action on the protection plan or WQMP. The EPA's review of the protection plan elements within the amended Willamette Subbasins TMDL submittal will be documented via a separate process. Implementation is the critical next step to improve water quality, and the EPA encourages ODEQ to continue its work with responsible parties to implement the WQMP.

The EPA appreciates the work of Ryan Michie, Jim Bloom, and Michele Martin in developing and completing the amended Willamette Subbasins Temperature TMDL project. The EPA also appreciates the continued cooperation by ODEQ as we work towards the common goal of addressing impaired waters in the State of Oregon. By the EPA's approval action, the temperature TMDLs in the Willamette River Mainstem and Major Tributaries project area are now incorporated into the State's WQMP under section 303(e) of the CWA.

If you have any comments or questions on this agency action, please feel free to contact me at shaw.hanh@epa.gov or have your staff contact Lisa Kusnierz at (208) 378-5626 or by email at kusnierz.lisa@epa.gov.

Sincerely,

Hanh Shaw, Manager
Standards, Assessment, and Watershed
Management Branch
