RULES:

340-045-0075, 340-071-0800

AMEND: 340-045-0075

RULE TITLE: Permit Fee Schedule

NOTICE FILED DATE: 04/28/2025

RULE SUMMARY: Increasing Water Quality fees in the attached tables as authorized by statute.

RULE TEXT:

- (1) OAR chapter 340, division 71 contains the fee schedule for onsite sewage disposal system permits, including WPCF permits, and graywater reuse and disposal system WPCF individual permits.
- (2) DEQ establishes fees for various industrial, domestic and general water quality permits:
  - (a) Table 70A lists the application and modification fees that apply to industrial NPDES and WPCF individual permits.
  - (b) Table 70B lists the annual fees that apply to industrial NPDES and WPCF individual permits.
  - (c) Table 70C lists application, modification and annual fees for domestic NPDES and WPCF individual permits.
  - (d) Table 70D lists annual population fees.
  - (e) Table 70E lists annual pretreatment fees applicable to domestic wastewater systems.
  - (f) Table 70I lists application, annual and surcharge fees for Underground Injection Control rule authorizations and general permits.
- (3) DEQ must consider the following criteria when classifying a facility for determining applicable fees. For industrial sources that discharge to surface waters, discharge flow rate refers to the system design capacity. For industrial sources that do not discharge to surface waters, discharge flow refers to the total annual flow divided by 365:
  - (a) Tier 1 industry. A facility is classified as a Tier 1 industry if the facility:
    - (A) Discharges at a flow rate that is greater than or equal to 1 mgd; or
    - (B) Discharges large biochemical oxygen demand loads; or
    - (C) Is a large metals facility; or
    - (D) Has significant toxic discharges; or
    - (E) Has a treatment system that will have a significant adverse impact on the receiving stream if not operated properly;or

- (F) Needs special regulatory control, as DEQ determines.
- (b) Tier 1 domestic facility. A facility is classified as a Tier 1 domestic facility if the facility:
  - (A) Has a dry weather design flow of 1 mgd or greater; or
  - (B) Serves an industry that can have a significant impact on the treatment system.
- (c) Tier 2 industry or domestic facility: A facility is classified as Tier 2 if it does not meet Tier 1 qualifying factors.
- (4) New permit application fee. Unless this rule does not require it, the applicant must submit the applicable new permit application fee listed in Table 70A, 70C, 70G, or 70I with each application. The facility category and type of permit (e.g., individual vs. general) determines the amount of the fee.
- (5) Permit modification fee. Tables 70A and 70C list the permit modification fees. Modification fees for Individual WPCF Underground Injection Control permits are contained in Table 70I. Permit modification fees vary with the type of permit, the type of modification and the timing of modification as follows:
  - (a) Modification at time of permit renewal:
    - (A) Major modification – involves an increase in effluent limitations or any other change that involves significant analysis by DEQ;
    - (B) Minor modification – does not involve significant analysis by DEQ.
  - (b) Modification prior to permit renewal:
    - (A) Major modification – involves an increase in effluent limitations or any other change that involves significant analysis by DEQ. DEQ may require a permittee requesting a significant modification to their permit to enter into an agreement to pay for these services according to ORS 468.073. ORS 468.073 allows DEQ "... to expedite or enhance a regulatory process by contracting for services, hiring additional staff or covering costs of activities not otherwise provided during the ordinary course of department business . . . ."
    - (B) Minor modification – does not involve significant analysis by DEQ.
- (6) Annual fees. Tables 70B and 70G list applicable annual fees for general and industrial permit holders. Table 70H lists applicable annual fees for Municipal Separate Storm Sewer permits. Tables 70C, 70D, and 70E also list annual fees for domestic sources and include the following:
  - (a) Annual fee. This is based on the type of treatment system, the dry weather design flow, and the duration assigned to the permit before a renewal application is required;
  - (b) Population-based fee. A permit holder with treatment systems other than Type F (septage alkaline stabilization facilities) must pay an annual population-based fee. Table 70D lists the applicable fee;
  - (c) Pretreatment fee. A source DEQ requires to administer a pretreatment program under federal pretreatment program regulations (40 C.F.R., Part 403; January 29, 1981, and its amendments) must pay an additional annual fee plus a fee for each significant industrial user specified in their annual report for the previous year. Table 70E lists the applicable fee.
- (7) Technical activities fee. Table 70F lists the technical activity, plan review and administrative fees. They are categorized as follows:
  - (a) All permits. A permittee must pay a fee for NPDES and WPCF individual and general permit-related technical activities. DEQ will charge a fee for initial submittal of engineering plans and specifications. DEQ will not charge fees for revisions and re-submittals of engineering plans and specifications or for facilities plans, design studies, reports, change orders, or inspections.
  - (b) General permits. A permittee must pay the technical activity fee shown in Table 70F when the following activities are required for application review:
    - (A) Disposal system and environmental management plan review;
    - (B) Site inspection and evaluation.
- (8) For permits the Oregon Department of Agriculture administers, the permit applicant or permit holder must pay the permit fees following the fee schedule the Oregon Department of Agriculture establishes.
- (9) Administrative activity fees are listed in Table 70F:
  - (a) The annual electronic reporting requirement waiver fee applies to permit holders who qualify for a temporary or

permanent waiver exempting them from submitting data and reports electronically.

(b) A permittee must pay a fee for a transfer of ownership as specified under OAR 340-045-0045 and for requests to change the legal or common name on the permit issued to the facility.

Application fees for new industrial permits			
Tier 1 Industrial Facilities	\$95,628		
Tier 2 Industrial Facilities	\$19,243		
Special WPCF Permits (OAR 340-045-0061)	\$907		
Note: New permit applications must include the annual fee specified in Table 70B in addition to the new permit application fee listed above. The application fee is not required for renewal unless a modification is needed or requested.			
Modification Fees <sup>1</sup>			
	Major		Minor
	At Permit Renewal	Prior to Expiration	
Tier 1 Industrial Facilities	\$24,023	\$47,736	\$1,672
Tier 2 Industrial Facilities	\$6,106	\$9,537	\$1,672
1. A new application, application fee and modification fee must accompany all requests for permit modification. DEQ may charge the environmental management plan review fee amount in Table 70F when only the environmental management plan required by the permit requires review.
