Sign-off Sheet and Signatures of Environmental Professionals

This document entitled 401-407 East 2nd Street, The Dalles, Oregon 97058 - Phase I Environmental Site Assessment was prepared by Stantec Consulting Services Inc. ("Stantec") for the account of City of Dalles (the "Client"). Any reliance on this document by any third party is strictly prohibited. Any use which a third party makes of this document is the responsibility of such third party. Such third party agrees that Stantec shall not be responsible for costs or damages of any kind, if any, suffered by it or any other third party as a result of decisions made or actions taken based on this document.

All information, conclusions, and recommendations provided by Stantec in this document regarding the Phase I ESA have been prepared under the supervision of and reviewed by the professionals whose signatures appear below. The following declaration applies to all professionals whose signatures appear below.

Author: _____

Jacqueline Brenner
Project Scientist

I declare that, to the best of my professional knowledge and belief, I meet the definition of Environmental Professional as defined in § 312.10 of 40 CFR 312. I have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the Property. I have developed and performed all the appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.

Summary
October 5, 2021

1.0 SUMMARY

Stantec Consulting Services Inc. (Stantec) has completed a Phase I Environmental Site Assessment (ESA) of the property located at 401-407 East 2nd Street, The Dalles, Oregon (the "Property"), on behalf of the City of The Dalles (the "Client" or the "City"). The work was performed according to the City's brownfield coalition assessment grant cooperative agreement (BF-01J86801) with the United States Environmental Protection Agency (EPA). The City has been designated as the User of this report.

The Phase I ESA was conducted in conformance with the requirements of ASTM International (ASTM) Designation E1527-13, and All Appropriate Inquiry (AAI) as defined by the EPA in Title 40 of the Code of Federal Regulations (CFR), Part 312, except as may have been modified by the scope of work, and terms and conditions, requested by the City. Any exceptions to, or deletions from, the ASTM or AAI practice are described in **Section 2.3**.

The Property consists of two 0.14-acre tax parcels. The western tax parcel (1N13E3BD-2300) is 100% occupied by a single-story building with basement constructed prior to 1900. The eastern parcel (1N13E3BD-2200) is 90% occupied by a single-story building constructed prior to 1900, with an addition extending the building to the north in the late 1950s. The northernmost approximately 15 feet of tax parcel -2200 is an asphalt-paved lot used for parking. Both parcels are zoned Central Business Commercial (C-H). Surrounding properties are commercial, except to the north, which is developed as a surface parking lot. A Property location map is provided as **Figure 1**. A Property area map illustrating the main features of the Property is provided as **Figure 2**. Photographs taken during the site reconnaissance visit are provided in **Appendix A**.

The Property was first developed for commercial use prior to 1884. Property improvements were destroyed by fire in 1891. By 1900, the western tax lot was 100% occupied by a commercial building and the eastern tax lot approximately 40% occupied by retail storefronts along East 2nd Street. By 1960, the Property was developed in its present-day configuration. The Property is currently occupied by vacant commercial buildings.

We have performed a Phase I Environmental Site Assessment in conformance with the scope and limitations of ASTM Practice E1527-13 of 401-407 East 2nd Street, The Dalles, Oregon, the Property. Any exceptions to, or deletions from, this practice are described in the Data Gaps section of this report. This assessment has revealed the following evidence of recognized environmental conditions (RECs) in connection with the Property:

- Piping suggesting the possible presence of an underground heating oil tank (HOT) was observed penetrating the west and north basement walls of the tax lot -2300 building during the site reconnaissance. However, a geophysical survey completed adjacent and north of the Property in 2019 found no evidence of a buried HOT in this area. The potential presence of a HOT adjacent to the Property is considered a REC and a potential vapor encroachment condition (VEC) for the Property.

401-407 E. 2ND STREET, THE DALLES, OREGON - PHASE I ENVIRONMENTAL SITE ASSESSMENT

Summary

October 5, 2021

A geophysical survey is recommended to explore for evidence of a current/former HOT adjacent to the northern and western Property boundaries. If a current/former HOT is identified, soil sampling is recommended to evaluate whether a release from the HOT impacting the Property has occurred.

The preceding summary is intended for informational purposes only. Reading of the full body of this report is recommended.

Introduction
October 5, 2021

2.0 INTRODUCTION

The objective of this Phase I ESA was to perform AAI into the past ownership and uses of the Property consistent with good commercial or customary practice as outlined by the ASTM in “Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process”, Designation E1527-13. AAI is the process for evaluating a property’s environmental conditions for the purpose of qualifying for landowner liability protections under the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA) following final rule of Part 312 of Title 40, Code of Federal Regulations (40 CFR Part 312). The purpose of this Phase I ESA was to identify, to the extent feasible, adverse environmental conditions including RECs of the Property.

The ASTM E1527-13 standard indicates that the purpose of the Phase I ESA is to identify RECs, including historical recognized environmental conditions (HRECs), and controlled recognized environmental conditions (CRECs) that may exist at a property. The term “recognized environmental conditions” means the presence or likely presence of any hazardous substances or petroleum products in, on, or at a property:

1. Due to any release to the environment;
2. Under conditions indicative of a release to the environment; or,
3. Under conditions that pose a material threat of a future release to the environment.

ASTM defines a “HREC” as a REC that has occurred in connection with a property, but has been addressed to the satisfaction of the applicable regulatory authority and meets current unrestricted use criteria established by a regulatory authority, without subjecting the property to any required controls (e.g., property use restrictions, activity and use limitations, institutional controls, or engineering controls). Before calling the past release a HREC, the environmental professional (EP) must determine whether the past release is a REC when the current Phase I ESA is conducted (e.g., if there has been a change in the regulations). If the EP considers the past release to be a REC at the time the Phase I ESA is conducted, the condition shall be included in the conclusions section of the report as a REC.

ASTM defines a “CREC” as a REC resulting from a past release of hazardous substances or petroleum products that has been addressed to the satisfaction of the applicable regulatory authority (e.g., as evidenced by the issuance of a no further action letter or equivalent, or meeting risk-based criteria established by regulatory authority), but with hazardous substances or petroleum products allowed to remain in place subject to the implementation of required controls (e.g., property use restrictions, activity and use limitations, institutional controls, or engineering controls).

As defined by ASTM, RECs can include hazardous substances or petroleum products present under conditions in compliance with laws if that presence represents a material threat of future release. The presence of hazardous substances or petroleum products is, however, not a REC if that presence is a *de minimis* condition. *De minimis* conditions are minor occurrences of contamination that generally do not present a material risk to human health and would not likely be subject to enforcement action if brought to the attention of governmental agencies. ASTM also considers the potential for a business environmental risk (BER), defined as a risk which can have a material environmental or environmentally-driven impact

Introduction
October 5, 2021

on the business associated with the current or planned use of the Property, not necessarily limited to those environmental issues required to be investigated by the ASTM standard. Consideration of BERs may involve addressing one or more ASTM non-scope considerations,

The scope of work conducted during this Phase I ESA consisted of a visual reconnaissance of the Property, interviews with key individuals, and review of reasonably ascertainable documents. The scope of work did not include an assessment for environmental regulatory compliance of any facility ever operated at the Property (past or present), or sampling and analyzing of environmental media. Stantec was not contracted to perform an independent evaluation of the purchase or lease price of the Property and its relationship to current fair market value. The conclusions presented in this Phase I ESA report are professional opinions based on data described herein. The opinions are subject to the limitations described in **Section 2.3**.

ASTM E1527-13 notes that the availability of record information varies from source to source. The User or EP is not obligated to identify, obtain, or review every possible source that might exist with respect to a property. Instead, ASTM identifies record information that is reasonably ascertainable from standard sources. "Reasonably ascertainable" means:

1. Information that is publicly available;
2. Information that is obtainable from its source within reasonable time and cost constraints; and,
3. Information that is practicably reviewable.

2.1 PROPERTY DESCRIPTION

The Property consists of approximately 0.28 acres of land developed with a single-story commercial building with basement. The Property is comprised of two 0.14-acre tax parcels, each of which is zoned Central Business Commercial (C-H). Surrounding properties are commercial, except to the north, which is developed as a surface parking lot. A Property location map is illustrated on **Figure 1**. A Property area map illustrating the main features of the Property is provided as **Figure 2**. Photographs taken during the site reconnaissance visit are provided in **Appendix A**.

2.2 SPECIAL TERMS, CONDITIONS, AND ADDITIONAL ASSUMPTIONS

There were no special terms, conditions, or additional assumptions associated with this Phase I ESA.

2.3 EXCEPTIONS AND LIMITING CONDITIONS

This report documents work that was performed in accordance with generally accepted professional standards at the time and location in which the services were provided and given the schedule and budget constraints established by the client. No other representations, warranties, or guarantees are made concerning the accuracy or completeness of the data or conclusions contained within this report, including no assurance that this work has uncovered all potential and actual liabilities and conditions associated with the Property.

401-407 E. 2ND STREET, THE DALLES, OREGON - PHASE I ENVIRONMENTAL SITE ASSESSMENT

Introduction
October 5, 2021

This report provides an evaluation of selected environmental conditions associated with the Property that was assessed at the time the work was conducted and is based on information obtained by and/or provided to Stantec at that time. There are no assurances regarding the accuracy and completeness of this information received from others.

Conclusions made within this report consist of Stantec's professional opinion as of the time of the writing of this report and are based solely on the scope of work described in the report, the limited data available, and the results of the work. They are not a certification of the property's environmental condition.

The Client did not provide or contract Stantec to provide recorded title records or search results for environmental liens or activity and use limitations encumbering the property or in connection with the property. Stantec did not obtain historical records that document the property history in 5-year intervals, and this resulted in data gaps. Although this represents data gaps, these data gaps are not considered to impact the EPs ability to identify RECs unless stated as such. Based on the information obtained during the course of this ESA and general knowledge of development at and near the Property, the absence of this information did not affect the ability of the EPs to identify RECs, HRECs, CRECs, or *de minimis* conditions.

This report has been prepared for the exclusive use of the Client identified herein and any use of or reliance on this report by any third party is prohibited, except as may be consented to in writing by Stantec or as required by law. The provision of any such consent is at Stantec's sole and unfettered discretion and will only be authorized pursuant to the conditions of Stantec's standard form reliance letter. Stantec assumes no responsibility for losses, damages, liabilities, or claims, howsoever arising, from third party use of this report.

The conclusions are based on the conditions encountered at the Property by Stantec at the time the work was conducted.

As the purpose of this report is to identify Property conditions which may pose an environmental risk; the identification of non-environmental risks to structures or people on the Property is beyond the scope of this assessment.

The findings, observations, and conclusions expressed by Stantec in this report are not an opinion concerning the compliance of any past or present owner or operator of the Property which is the subject of this report with any Federal, state, provincial or local law or regulation.

This report presents professional opinions and findings of a scientific and technical nature. It does not and shall not be construed to offer a legal opinion or representations as to the requirements of, nor compliance with, environmental laws, rules, regulations or policies of Federal, state, provincial or local governmental agencies. It is recommended that issues raised by the report should be reviewed for the client by its legal counsel.

Stantec specifically disclaims any responsibility to update the conclusions in this report if new or different information later becomes available or if the conditions or activities on the property subsequently change.

Introduction
October 5, 2021

2.4 PERSONNEL QUALIFICATIONS

This Phase I ESA was conducted by individuals that meets the ASTM definition of an EP. The credentials of the EPs involved in conducting this Phase I ESA are provided in **Appendix B**.

User-Provided Information
October 5, 2021

3.0 USER-PROVIDED INFORMATION

ASTM E1527-13 describes responsibilities of the User to complete certain tasks in connection with the performance of “All Appropriate Inquiries” into the Property. The ASTM standard requires that the EP request information from the User on the results of those tasks because that information can assist in the identification of RECs, CRECs, HRECs, or *de minimis* conditions in connection with the Property. Towards that end, Stantec requested that the User provide the following documents and information, and the User (City of The Dalles) delegated this responsibility to Alice Cannon, (current Property owner representative):

Description of Information	Provided (Yes / No)	Description and/or Key Findings
User Questionnaire and/or Interview	Yes	Alice Cannon, Columbia Gateway Urban Renewal Agency (CGURA) Manager, completed a user questionnaire on behalf of the City.
Environmental Liens or Activity Use Limitations	Yes	Ms. Cannon indicated that there are no environmental liens or activity use limitations attached to the Property
Previous Environmental Permits or Reports Provided by User	Yes	Ms. Cannon provided an asbestos survey report and bid for the in-place decommissioning of a HOT.
Purpose of the Phase I ESA	Yes	The CGURA plans to seek cleanup funding for asbestos abatement from Business Oregon. Completion of a Phase I ESA is a requirement to apply for this funding.

The completed User Questionnaire returned to us by Ms. Cannon is included in **Appendix C**. Responses received in the User Questionnaire did not result in the identification of RECs.

Records Review
October 5, 2021

4.0 RECORDS REVIEW

The objective of consulting historical sources of information is to develop the history of the Property and surrounding area and evaluate if past uses may have resulted in RECs. Physical setting records are evaluated to determine if the physical setting may have contributed to adverse environmental conditions in connection with the Property. During the review of historical records, Stantec attempted to identify uses of the Property from the present to the first developed use of the Property. Stantec's research included the reasonably ascertainable and useful records described in this section.

4.1 PHYSICAL SETTING

A summary of the physical setting of the Property is provided in the table below.

Topography:	The Property elevation is approximately 103 feet above mean sea level (ft msl). Topographic maps for the Property area indicate a gentle downward slope to the north toward the Columbia River, the surface of which is at approximately 75 ft msl.
Soil/Bedrock Data:	Bedrock within the downtown The Dalles area is relatively shallow and consists of Columbia River Basalt. Eleven direct-push borings (WASC-52528 through WASC-52538) advanced at 523 East 3 rd Street (approximately 400 feet southeast of the Property) encountered basalt bedrock at depths ranging from to 5.5 to 10.8 feet below ground surface (bgs). Similarly, three borings (WASC-52011, -52012, and -52013) advanced at the corner of Laughlin Street and East 1 st Street (approximately 250 feet east of the Property) and five borings (WASC-52014 through WASC-52019) advanced at the corner of Washington Street and East 1 st Street (approximately 400 feet northwest of the Property) encountered basalt bedrock at 9 feet bgs.
Estimated Depth to Groundwater/ Estimated Direction of Gradient:	Groundwater is generally not present above basalt bedrock in downtown The Dalles. Water level data collected in the 1980s in a United States Geological Survey (USGS) well located approximately 1,500 feet west of the Property were approximately 60 feet bgs.
NOTE: Site-specific groundwater flow direction and depth can only be determined by conducting site-specific testing, which Stantec has not conducted.	

4.2 FEDERAL, STATE AND TRIBAL ENVIRONMENTAL RECORDS

A regulatory agency database search report was obtained from Environmental Data Resources, Inc. (EDR), a third-party environmental database search firm. A complete copy of the database search report, including the date the report was prepared, the date the information was last updated, and the definition of databases searched, is provided in **Appendix D**.

Stantec evaluated the information listed within the database relative to potential impact to the Property, assessing the potential for impacts based in part on the physical setting. Observations about the Property and surrounding sites made during the Property reconnaissance are provided in more detail in **Section 5**.

Records Review
October 5, 2021

4.2.1 Listings for Property

The Property was identified in the Resource Conservation and Recovery Act Non-Generators / No Longer Regulated (RCRA NONGEN/NLR), Facility Index System/Facility Registry System (FINDS), and Enforcement and Compliance History System (ECHO) environmental databases related to a Sherwin Williams Paint Store formerly located at 405 East 2nd Street. These listings indicate that hazardous waste was generated at the Property. Dates associated with these listings span 1980 to 2000. These listings do not report any hazardous waste handling violations and are not indicative of a release. Therefore, these listings are not considered a REC for the Property.

4.2.2 Listings for Nearby Sites with Potential to Impact Property

Stantec assessed data presented in the environmental agency database search report to evaluate the potential for conditions on adjacent and nearby sites to pose a REC, CREC, or HREC for the Property. The evaluation included an opinion of the potential for contamination by hazardous substances or petroleum products to migrate to the Property from a nearby site, including by vapor migration or encroachment.

Stantec considers the listings in the database search report provided in **Appendix D** to not constitute a potential REC for the Property.

4.3 LOCAL/REGIONAL ENVIRONMENTAL RECORDS

Stantec checked the following sources to obtain information pertaining to Property use and/or indications of RECs in connection with the Property:

4.3.1 Oregon Fire Marshal Hazardous Substance Incident Database

Agency Name Contact Information	Finding
Oregon Fire Marshal Search Date: 9/24/2021	The Oregon Fire Marshal database is not searchable by address, so the zip code of 97058 was searched and all incidents near the Property were reviewed. No incidents listed within the 97058 zip code were of a nature likely to impact the Property.

4.3.2 Wasco County Tax Assessor Records

Agency Name, Contact Information	Findings
Wasco County Online Property Data Search Date: 9/24/21	Information available online from Wasco County indicates a year built of 1900 for the 0.14-acre western tax lot (01N13E03BD02300) and a year built of 1960 for the 0.14-acre eastern tax lot (01N13E03BD02200). Records indicate that the Property was last transferred on June 15, 2016. The current owner of both tax lots is CGURA.

Records Review
October 5, 2021

4.4 HISTORICAL RECORDS REVIEW

4.4.1 Land Title Records/Deeds

Land title records, deeds, environmental liens, and activity and use limitation documentation was not provided by the User, and public records were not searched by Stantec.

4.4.2 Aerial Photographs

Stantec reviewed historical aerial photographs including the Property and vicinity provided by EDR. The general type of activity on a property and land use changes can often be discerned from the type and layout of structures visible in the photographs. However, specific elements of a facility's operation usually cannot be discerned from aerial photographs alone. A copy of the EDR Aerial Photo Decade Package is provided in **Appendix E**. The following table summarizes Stantec's observations of the reviewed historical aerial photographs.

Year	Scale	Observations, Property and Adjoining Properties
1947	1"=500'	Tax lot -2300 is completely covered with a building. Approximately 2/3 of tax lot - 2200 is occupied by a building. Adjoining sites surrounding the Property are densely developed with commercial buildings.
1952	1"=500'	The Property appears unchanged. Buildings adjoining to the north have been removed, except for a small building at the corner of Federal Street and East 1 st Street, and a new building has been constructed in the northeast corner of the Property block. Otherwise, adjoining sites appear generally unchanged.
1955	1"=500'	The Property appears unchanged. Another building has been constructed in the north-central portion of the north adjoining site. Otherwise, adjoining sites appear generally unchanged.
1973, 1975	1"=500'	An addition to the tax lot -2200 building has extended it to the north and its present-day configuration. The north adjoining site is now 100% occupied by buildings. A wastewater treatment plant has been constructed north of the Property across East 1 st Street, and Interstate Highway 84 is present north of the treatment plant. Otherwise, adjoining sites appear generally unchanged.
1981, 1990, 1996, 2000	1"=500'	The Property appears unchanged. All buildings on the site adjacent and north of the Property have been demolished, and a surface parking lot constructed. Similarly, the adjoining block to the west has been redeveloped as a surface parking lot. Otherwise, adjoining sites appear generally unchanged.
2006, 2011, 2014, 2017	1"=500'	The Property and adjoining sites appear generally unchanged.

Source: EDR Aerial Photo Decade Package

Review of historical aerial photographs did not result in the identification of RECs for the Property.

4.4.3 City Directories

Stantec retained a third party to research available reverse city directories for the Property, in approximately five-year intervals. A copy of the EDR City Directory Image Report is provided in **Appendix E**. The following is a summary of Stantec's review of the city directory listings:

401-407 E. 2ND STREET, THE DALLES, OREGON - PHASE I ENVIRONMENTAL SITE ASSESSMENT

Records Review

4.4.4 Historical Fire Insurance Maps

Fire insurance maps were developed for use by insurance companies to depict facilities, properties, and their uses for many locations throughout the United States. These maps provide information on the history of prior land use and are useful in assessing whether there may be potential environmental contamination on or near the Property. These maps, which have been periodically updated since the late 19th century, often provide valuable insight into historical Property uses.

Stantec requested fire insurance maps from EDR. EDR provided maps for the years 1884, 1889, 1892, 1900, 1909, 1926, and 1960 that covered the Property. A copy of the EDR Sanborn® Map Search Reports are presented in **Appendix E**.

Year	Observations, Property and Adjoining Properties
1884	The Property is occupied by two buildings, including one that extends off-Property to the east. A hardware store is located at the corner of Federal Street and East 2 nd Street. A hotel (Jackson House) is located in the eastern half of the Property. Several additional commercial buildings are located on the Property block. The blocks to the north and west are developed with many commercial businesses. The block to the south is developed with residential dwellings. The blocks to the east appear undeveloped.
1889	An additional building is present in the northern half of the western tax lot of the Property, labeled as an agricultural implements store. Commercial development to the east has increased.
1892	The Property is described as being occupied by the ruins of a fire (a fire occurred in this area in 1891). The only structures on the block are several sheds offsite to the east. All dwellings to the south are no longer present. Commercial development to the west appears generally unchanged.
1900	The Property is occupied by a bank, saloon, agricultural implement store, and several East 2 nd Street storefronts. Commercial businesses are located on the east adjoining site. The north adjoining site is occupied by The Dalles Wool Scouring Mill Co. The Pease & Mays Oil Warehouse and The Dalles Electric Light, Telephone, & Power Co. Power House are located on the same block and to the northeast of the Property. The map indicates that the power house is fueled by coal. Commercial development surrounds the Property block. The Dalles Scouring Mill Co. and The Dalles Packing Co. Cannery are located a block north of the Property, north of present-day 1 st Street (labeled as "Front or Main" on the map).
1909	The configuration of buildings on the Property appears unchanged, but the agricultural implement business has been replaced with a liquor warehouse. The Dalles Wool Scouring Mill Co. remains on the north adjoining site, but the remainder of the block is now occupied by The Dalles Fruit Co., a food packing and processing business. Commercial development surrounds the Property block, except to the north, where an agricultural implement operation has taken over property formerly operated by The Dalles Packing Co.
1926	The configuration of buildings on the Property appears unchanged. The building at the corner of Federal Street and East 2 nd Street is now occupied by an auto sales and repair business. This use is not considered a REC due to its short period of operation on the Property. The building adjacent and east of the Property is occupied by The Dalles Creamery Co. The Dalles Wool Scouring Mill Co. remains on the north adjoining site. Food packing and processing operations remain as well but appear confined to the northeastern portion of the block. Commercial development surrounds the block, except to the north, which is largely undeveloped. A gasoline service station is located adjacent and south of the Property block, across Laughlin Street.
1960	The configuration of buildings on the Property appears unchanged except that the three retail stores on tax lot -2200 appear to have been expanded to the north. The building on tax lot -2300 labeled as a store with two offices and a printing operation at the north end. One of the three buildings on tax lot -2200 is labeled as a paint store, and the other two are labeled only as stores. A bank is located adjacent and east of the Property, and retail businesses are shown on the

Records Review

October 5, 2021

Year	Observations, Property and Adjoining Properties
	remainder of the southern half of the block. North adjacent sites are occupied by warehouses. Commercial development surrounds the block, except to the north, where The Dalles Sewage Treatment Works is located across East 1 st Street. A gasoline service station is located a block east of the Property, across Laughlin Street.

Sanborn Map source: EDR

Review of the above-referenced Sanborn® maps did not result in the identification of RECs for the Property.

4.4.5 Historical Topographic Maps

Stantec reviewed historical USGS 15-Minute Topographic Maps of the The Dalles (1934 and 1957) and 7.5-Minute Topographic Maps of the The Dalles North and The Dalles South (1974, 1977, 1995, 2014), Oregon Quadrangles to help identify past Property usage and areas of potential environmental concern.

No RECs were noted during our review of the topographic maps. A copy of the EDR Historical Topo Map Report is provided in **Appendix E**. The following table summarizes the maps reviewed and our observations.

Year	Scale	Observations, Property and Adjoining Properties
1934, 1957	1:62,500	No Property details can be discerned from this map. The map depicts a well-established downtown street grid in the Property area.
1974/1977, 1995, 2014	1:24,000	No Property details can be discerned from this map. The map depicts a well-established downtown street grid in the Property area. Interstate Highway 84 is present north of the Property.

Source: EDR Historical Topo Map Report

4.4.6 Other Historical Sources

A geophysical survey of downtown The Dalles alleyways was completed in January 2019 (GeoPotential, 2019). The survey included the alleyway that borders the Property to the north. No geophysical anomalies providing evidence of an underground HOT were identified adjacent to either tax parcel.

Site Reconnaissance
October 5, 2021

5.0 SITE RECONNAISSANCE

A visit to the Property and its vicinity was conducted by Jacqueline Brenner of Stantec on September 30, 2021. Access to the Property was provided by the current Property owner, CGURA. Stantec was accompanied during the Property visit by Joshua Chandler of the CGURA and Michella Rossi of Stantec. Photographs collected during the Property visit are included in **Appendix A**.

5.1 SITE RECONNAISSANCE METHODOLOGY

The site reconnaissance focused on observation of current conditions and observable indications of past uses and conditions of the Property that may indicate the presence of RECs. The reconnaissance of the Property was conducted on foot and Stantec utilized the following methodology to observe the Property:

- Traverse the outer Property boundary.
- Traverse the periphery of all structures on the Property.
- Visually observe accessible interior areas expected to be used by occupants or the public, maintenance and repair areas, utility areas, and a representative sample of occupied spaces.

Weather conditions during the visit to the Property were cloudy. There were no weather-related Property access restrictions encountered during the reconnaissance visit.

5.2 GENERAL DESCRIPTION

Property and Area Description:	The Property is located in downtown The Dalles, at the northeast corner of Federal Street and East 2 nd Street.
Property Operations:	None observed.
Structures, Roads, Other Improvements:	Property improvements included: • a single vacant commercial building on the western tax lot (-2300), and • a single vacant commercial building with three East 2nd Street entrances on the eastern tax lot (-2200), and approximately 15 feet of asphalt pavement used for parking north of the building.
Property Size (acres):	0.28 acres
Estimated % of Property Covered by Buildings and/or Pavement:	100%
Observed Current Property Use/Operations:	None
Observed Evidence of Past Property Use(s):	A sign on the south side of tax lot -2300 building indicates a former business name of Tonys Town & Country Clothing.
Sewage Disposal Method:	City of The Dalles
Potable Water Source:	City of The Dalles
Electric Utility:	Northern Wasco County Public Utility District
Natural Gas Utility:	NW Natural

Site Reconnaissance
October 5, 2021

5.3 HAZARDOUS SUBSTANCES AND PETROLEUM PRODUCTS

The following table summarizes Stantec's observations during the Property reconnaissance.

Observations	Description/Location
Hazardous Substances and Petroleum Products as Defined by CERCLA 42 U.S.C. § 9601(14):	None observed.
Drums (≥ 5 gallons):	None observed.
Strong, Pungent, or Noxious Odors:	None detected.
Pools of Liquid:	None observed.
Unidentified Substance Containers:	None observed.
PCB-Containing Equipment:	Three pole-mounted transformers each were observed near the northwest and northeast corners of the Property. No labels indicating polychlorinated biphenyl (PCB) content were observed. No staining or other evidence of a leak associated with the transformers was observed.
Other Observed Evidence of Hazardous Substances or Petroleum Products:	None observed.

5.4 INTERIOR OBSERVATIONS

Stantec made the following observations during the Property reconnaissance of the building interiors at the Property and/or identified the following information during the interview or records review portions of the assessment:

Observations	Description
Heating/Cooling Method:	Natural gas
Surface Stains or Corrosion:	Staining (water?) was observed in the basement under the 401 East 2 nd Street building originating from a ventilation grate facing the alley.
Floor Drains and Sumps:	No floor drains or sumps were observed.
Other Interior Observations:	None observed.

5.5 EXTERIOR OBSERVATIONS

Stantec made the following observations during the site reconnaissance of exterior areas of the Property and/or identified the following information during the interview or records review portions of the assessment:

Observations	Description
On-site Pits, Ponds, or Lagoons:	None observed.
Stained Soil or Pavement:	None observed.
Stressed Vegetation:	None observed.

Site Reconnaissance
October 5, 2021

Observations	Description
Waste Streams and Waste Collection Areas:	None observed.
Solid Waste Disposal:	No areas indicative of solid waste disposal were observed.
Potential Areas of Fill Placement:	No mounds, piles, or depressions suggesting the placement of fill material were observed on the Property, except for the surface gravels present on the Property.
Wastewater:	No wastewater discharge was observed.
Stormwater:	No stormwater management systems were observed. Stormwater is presumed to flow over the impervious paved and building-covered areas of the Property and flow into storm drains observed along E Second Street and Federal Street.
Wells:	No wells were observed.
Septic Systems:	No visible evidence of the existence of a septic system was observed.
Other Exterior Observations:	None.

5.6 UNDERGROUND STORAGE TANKS/STRUCTURES

Existing USTs:	Several small diameter pipes were observed entering the west and north walls of the basement of the building on tax lot -2300. A vertical pipe labeled as containing natural gas was observed in a possible HOT or former HOT location in the alley at the rear of the Property.
Former USTs:	As noted above, several small diameter pipes were observed in the basement of the building on tax lot -2300. A vertical pipe labeled as containing natural gas was observed in a possible underground storage tank (UST) or former UST location in the alley at the rear of the Property.
Other Underground Structures:	None observed.

5.7 ABOVEGROUND STORAGE TANKS

Existing ASTs:	No visible evidence (fill pipes, vent pipes, dispensers, surface stains), which would indicate the presence of aboveground storage tanks (ASTs), was discovered during the site reconnaissance.
Former ASTs:	No visible evidence (fill pipes, vent pipes, dispensers, surface stains), reports, or other evidence of the former presence of ASTs was discovered during this Phase I ESA.

5.8 ADJOINING PROPERTIES

5.8.1 Current Uses of Adjoining Properties

As viewed from the Property and/or from public rights-of-way, Stantec made the following observations about use and activities on adjoining sites:

NORTH	Surface parking lot across an alley.
EAST	Another Chance Resale & More Store.
SOUTH	Lilo's Hawaiian BBQ with residential lofts above across East Second Street.

Site Reconnaissance

October 5, 2021

WEST	Vacant retail space across Federal Street.

5.8.2 Observed Evidence of Past Uses of Adjoining Properties

Observations of adjoining sites providing indications of past use and activities, if any, are described below.

NORTH	None observed.
EAST	None observed.
SOUTH	None observed.
WEST	None observed.

5.8.3 Pits, Ponds or Lagoons on Adjoining Properties

As viewed from the Property and/or from public rights-of-way, Stantec made the following observations about the presence of pits, ponds and lagoons on adjoining sites:

NORTH	None observed.
EAST	None observed.
SOUTH	None observed.
WEST	None observed.

5.9 OBSERVED PHYSICAL SETTING

Topography of the Property and Surrounding Area:	No notable visible topographic features were observed. The Property and vicinity appear generally flat.

Interviews
October 5, 2021

6.0 INTERVIEWS

Stantec conducted interviews with the following individuals:

Name and contact information	Relationship to Property	Key findings:
Joshua Chandler Associate Planner City of The Dalles	URA Representative	Mr. Chandler indicated that the CGURA is seeking to demolish the Property building. He indicated they suspect a HOT may be located in the sidewalk along Federal Street to the west of the Property building due to a pipe extending into the sidewalk from the basement and from a cut out area framed in with brick below the pipe where a boiler may have previously been located. To his knowledge the primary prior use of the Property buildings was retail.

Evaluation
October 5, 2021

7.0 EVALUATION

This section provides a summary overview of or Findings, Opinions, and Conclusions.

7.1 FINDINGS AND OPINIONS

Information gathered from interviews, reviews of existing data, and a Property inspection was evaluated to determine if RECs are present in connection with the Property. Based on this information, Stantec made the following findings and developed the following opinions.

- Environmental records reviewed by Stantec identified no Property or vicinity listings of environmental concern.

No RECs were identified through a review of environmental records.

- Historical records reviewed by Stantec identified no Property or vicinity operations of environmental concern.

No RECs were identified through a review of historical records.

- A reconnaissance of the Property and interview conducted by Stantec on September 30, 2021 revealed the potential presence of a HOT either beneath Federal Street sidewalk adjacent and west of the Property, or beneath an alley adjacent and north of the Property. However, a geophysical survey completed adjacent and north of the Property in 2019 found no evidence of a buried HOT in this area.

The potential presence of a HOT adjacent to the Property represents a REC and a VEC.

7.2 DATA GAPS

The federal AAI final rule (40 CFR 312.10[a]) and ASTM E1527-13 identify a “data gap” as the lack or inability to obtain information required by the standards and practices of the rule despite good faith efforts by the Environmental Professional or the User.

Any data gaps resulting from the Phase I ESA described in this report are listed and discussed below.

Gap	Discussion
Deletions or Exceptions from Scope of Work Referenced in Section 2.3:	None
Weather-Related Restrictions to Site Reconnaissance:	None
Facility Access Restrictions to Site Reconnaissance:	Non
Other Site Reconnaissance Restrictions:	None

Evaluation
October 5, 2021

Gap	Discussion
Data Gaps from Environmental Records Review:	None
Data Gaps from Historical Records Review:	None
Data Gaps from Interviews:	None
Other Data Gaps:	None

7.3 CONCLUSIONS AND RECOMMENDATIONS

We have performed a Phase I Environmental Site Assessment in conformance with the scope and limitations of ASTM Practice E1527-13 of 401-407 East 2nd Street, The Dalles, Oregon. Any exceptions to, or deletions from, this practice are described in **Section 2.3** of this report. This assessment has revealed the following evidence of RECs in connection with the Property:

- Piping suggesting the presence of a current or former HOT was observed penetrating the west and north basement walls of the Property building during the site reconnaissance. However, a geophysical survey completed adjacent and north of the Property in 2019 found no evidence of a buried HOT in this area. The potential presence of a HOT adjacent to the Property is considered a REC and a potential VEC for the Property.

A geophysical survey is recommended to explore for evidence of a current/former HOT adjacent to the Property. If a current/former HOT is identified, soil sampling is recommended to evaluate whether a release from the HOT impacting the Property has occurred.

Appendix B STANTEC RESUMES

Jacqueline has 6 years of experience in the environmental field, in both research and environmental consulting roles. Ms. Brenner has developed a career focus on improving understanding of water quality in relation to watershed health and brownfield redevelopment. She has a broad background as an environmental professional, including graduate coursework in hydrology and water quality, environmental policy, and GIS. At Stantec, she has conducted Phase I and II Environmental Site Assessments, environmental compliance monitoring, regulated building material surveys, developed sampling and analysis plans, and assisted with brownfield redevelopment efforts.

Jacqueline studied the watersheds of hundreds of Oregon lakes and their natural and anthropogenic sources of nitrates and phosphates, discovering strong regional correlations. She has also helped EPA map agricultural use and changes to groundwater nitrates over time throughout Oregon's Willamette Valley, and especially in the Southern Willamette Valley Groundwater Management Area, where numerous entities have nitrate levels above state accepted standards.

She is adept at fulfilling the requirements for All Appropriate Inquiry and conducting assessments in compliance with ASTM 1527-13.

EDUCATION

BS, Ecology and Evolutionary Biology, University of California - Santa Cruz, 2011

MS, Environmental Sciences, concentration in Water Resource Science, Oregon State University, 2015

Masters Certificate, GIS, Oregon State University 2015

REGISTRATIONS

40-Hour Health & Safety Certification (29 CFR 1910.120), Hygiene Technologies International, Inc., 2011 - Present

Asbestos Hazard Emergency Response Act of 1986 (AHERA) Accredited Asbestos Professional, 2016 – Present

Washington State Certified Lead Paint Inspector #7740 2019 - 2022

Carrie Rackey has 18 years of experience in the environmental field, in both regulatory and consulting roles. Ms. Rackey has developed a career focus on brownfield redevelopment and environmental due diligence. She has a comprehensive background as an environmental professional, including grant writing and implementation, Phase I and II Environmental Site Assessment, remediation system management, risk assessment, and environmental compliance.

Carrie has helped numerous Oregon communities successfully compete for US Environmental Protection Agency Brownfield Grants to help communities identify, prioritize, and assess environmental risks at abandoned and underused sites. Ms. Rackey guides communities through implementation of brownfield grant projects, keeping the ultimate goals of sustainability, community benefit, and economic growth in mind.

Carrie has an extensive foundation of environmental due diligence projects, conducting Phase I and II Environmental Site Assessments for public and private clients in two countries and seven states. She is adept at fulfilling the requirements for All Appropriate Inquiry and conducting assessments in compliance with ASTM 1527-13.

REGISTRATIONS

Certified Hazardous Materials Manager, #14666

Leonard Farr Jr. RG, LG

Principal

Leonard is a Principal Geologist and Brownfield Specialist with 30 years of environmental consulting experience. Leonard regularly assists clients with complex regulatory issues, with emphasis in the areas of brownfield redevelopment, environmental due diligence, remedial investigation/feasibility study (RI/FS), and cleanups of contaminated land. Leonard has managed more than 500 brownfield/due diligence projects for a variety of local government and commercial clients. He has assisted clients in obtaining funding for and implementing the redevelopment of hundreds of brownfield properties. Leonard has managed numerous complex RI/FS projects within state and federal regulatory programs. These projects have involved the collection of thousands of samples, the assessment of risk associated with contaminants detected in the samples, the analysis of remedial alternatives to mitigate contaminants detected at concentrations exceeding acceptable risk levels, and the implementation of a broad range of cleanup activities.

EDUCATION

MS, Geology, Portland State University, Portland, Oregon, 1989

REGISTRATIONS

Registered Geologist #1169, State of Oregon

Licensed Geologist #1849, State of Washington

SELECT PROJECT EXPERIENCE

Prosper Portland | Environmental Services On-Call Contract | Portland, Oregon | Program Manager

Leonard has been managing environmental services on-call contracts for the Prosper Portland (formerly the Portland Development Commission) for nearly 20 years. Some of his most notable projects have included: 1) The Yards at Union Station, a 2001 Phoenix Award winning project for excellence in brownfield redevelopment; 2) South Waterfront Redevelopment Area, a 2004 Phoenix Award winning project for excellence in brownfield redevelopment; 3) Station Place, as Oregon Brownfield Awards winner in 2012, 4) Fields Park, an Oregon Brownfield Awards winner in 2016, and 5) environmental due diligence and prospective purchaser agreement assistance for the USPS Portland P&DC property recently acquired for \$88M by Prosper.

Rogue Valley COG | Brownfield Program Management | Medford, Oregon | Program Manager

Leonard assisted the Rogue Valley COG in preparing a successful \$600,000 EPA brownfield grant in fiscal year 2017 and is currently assisting the COG in implementing this grant. The EPA grant-funded program funded various planning

and environmental assessment activities at 11 brownfield properties ranging in size from less than 1 acre to 20+ acres. Former land uses included service stations, dry cleaners, auto and heavy equipment service and repair, and manufacturing. Environmental work managed by Leonard for this project has included the completion of: 1) a comprehensive brownfield inventory; 2) Phase I Environmental Site Assessments (ESAs) for nine sites; 3) sampling and analysis plans, health and safety plans, Endangered Species Act/National Historic Preservation Act clearance activities, and Phase II ESAs for nine sites; 4) site-specific reuse/remedial planning for one site; 5) two area-wide plans, 6) numerous community outreach functions; and 7) EPA reporting.

City of Eugene | Brownfield Program Management | Eugene/Springfield, Oregon | Program Manager

The Eugene/Springfield brownfield program initially was funded by a \$680,000 fiscal year 2012 EPA brownfield grant. Leonard was responsible for implementation of the brownfield program. The initial grant program funded 13 brownfield projects ranging in size from less than 1 acre to 20 acres (including the EWEB Headquarters property described below). Former land uses included service stations, dry cleaners, auto and heavy equipment service and repair, manufacturing, and a former steam plant. In fiscal year 2018, Leonard prepared a new brownfield grant application, obtaining an additional \$500,000 in EPA funding for the program. Since October of 2017, Leonard has completed a wide variety of projects at an additional 16 brownfield properties. Environmental work managed by Leonard to date has included: 1) four focus area

brownfield inventories; 2) Phase I Environmental Site Assessments (ESAs) for 23 sites; 3) sampling and analysis plans, health and safety plans, Endangered Species Act/National Historic Preservation Act clearance activities, and Phase II ESAs for 19 sites; 4) reuse/remedial planning for three sites; 5) various community outreach functions; and 6) EPA reporting.

Portland Water Bureau | WRX Water Main Project
| Portland, Oregon | Environmental Manager
Leonard is managing all environmental aspects of this project to incorporate resiliency into the City of Portland's water delivery system through the installation of a new 30-inch water main crossing beneath the Willamette River. The six water pipelines that currently cross the Willamette River are either hung under bridges or buried in soils susceptible to liquefaction. Work managed by Leonard has included: 1) extensive environmental assessment of the new pipeline alignment, 2) developing a plan for the management of contaminated soils identified along the alignment, and 3) supporting development of a dewatering plan for contaminated groundwater necessitated by construction of an 80-foot deep by 40-foot diameter shaft required to facilitate horizontal drilling beneath the Willamette River.

EWEB | Headquarters Property Site Assessment |
Eugene, Oregon | Project Manager
In October 2010, the Eugene Water and Electric Board (EWEB) relocated its Field Operations Center from its Headquarters Property to West Eugene, freeing up 17 acres of prime downtown waterfront property for redevelopment. On behalf of EWEB and the Eugene/Springfield brownfield program, Leonard has completed three environmental projects that have resolved all environmental issues at the site. One project included supplemental site assessment and Closure Report preparation to obtain a No Further Action (NFA) letter from the Oregon Department of Environmental Quality (DEQ) for a release from a former 100,000-gallon Bunker C underground storage tank associated with a Steam Plant the formerly operated on the site. DEQ issued an NFA for the release on July 24, 2015. Another project, funded by the Eugene/Springfield brownfield program, included a comprehensive Phase II ESA. More than 250 borings were drilled at the site as part of this assessment. Next, utilizing the Phase II ESA data, Leonard designed and implemented a remediation program that included an interim removal action of four areas of soil contamination, and a risk assessment

demonstrating that residual contamination did not pose a risk to human health or the environment. Following the completion of this work, the DEQ issued an NFA letter for the entire site in 2018.

Holman Enterprises | Various Environmental Due Diligence | Multi-State | Program Manager
Leonard has provided prior-to-purchase environmental due diligence services across the western United States for Holman Enterprises for more than a decade. He has managed the completion of 15 Phase I ESAs, nine Phase II ESAs, and four regulated building material surveys on behalf of Holman.

Appendix C USER PROVIDED RECORDS

PHASE I ESA USER'S QUESTIONNAIRE

In order to qualify for protection from land owner liability under CERCLA as an *innocent landowner*, *bona fide prospective purchaser*, or *contiguous property owner*, ASTM standard practice E1527-13 and the federal AAI rule (40 CFR 312) require that the User of the Phase I ESA report provide certain information (if available) to the Environmental Professional completing the assessment. Failure to provide this information could result in a determination that "all appropriate inquiry" is not complete. Information that is not or cannot be provided to the Environmental Professional may be identified as a "data gap" in the Phase I ESA report.

Please answer the following questions as completely as possible. Attach additional pages as needed. Return the completed questionnaire to Stantec along with the executed Authorization for Services form.

1. Property Information

Property Name: Tony's Town and Country / Tammy Hall Floral

Property Address: 401 - 407 E 2nd Street

City: The Dalles State: OR Zip: 97058

Property Owner Name: Columbia Gateway Urban Renewal Agency

Property Owner Phone #: 541-296-5481, x 1151

2. Key Site Manager

This should be an individual with good knowledge of the uses and physical characteristics of the property, and the processes or activities currently conducted at the property. Often this will be the property manager, chief physical plant supervisor, or head maintenance person.

Name: Joshua Chandler

Company/Organization/Title: City of The Dalles / Associate Planner

Phone # 541-296-5481, x 1121

E-Mail Address: jchandler@ci.the-dalles.or.us

3. Contact For Site Access (if different from Key Site Manager)

Name: same as above

Company/Organization/Title: _____

Phone # _____

E-Mail Address: _____

4. Environmental Cleanup Liens. Are you aware of any environmental cleanup liens against the property that are filed or recorded under federal, tribal, state or local law?

Yes (describe or attach details of the lien) _____

X No _____

5. Activity and Land Use Limitations. Are you aware of any activity and use limitations, such as engineering controls, land use restrictions, or institutional controls that are in place at the property and/or have been filed or recorded as applicable to the property as a result of environmental contamination, investigation, cleanup, or related matters?

Yes (describe or
attach details of the
limitations)

X No

6. Specialized Knowledge or Experience. As the User of this ESA, do you have any specialized knowledge or experience related to the property or nearby properties? For example, are you involved in the same line of business as the current or former occupants of the property or an adjoining property, such that you would have specialized knowledge about chemicals and processes used by this type of business?

Yes (describe or attach
details of your
specialized knowledge
or experience)

X No

7. Relationship of Purchase Price to Fair Market Value of Property. Does the purchase price being paid for this property reasonably reflect the fair market value of the property? If you conclude that there is a difference, do you have any reason to believe that the reduced purchase price may be related to contamination known or believed to be present at the property?

_____ Yes, I have reason to believe that the purchase price for the property has been reduced in comparison with the fair market value due to contamination known or believed to be present at the property.

_____ No, I have no reason to believe that the purchase price for the property has been reduced in comparison with the fair market value due to contamination known or believed to be present at the property.

X Not applicable. User is not involved in a purchase or sale of the property.

8. Commonly Known or Reasonably Ascertainable Information. Are you aware of commonly known or reasonably ascertainable information about the property that would help the Environmental Professional to identify conditions indicative of releases or threatened releases of hazardous substances or petroleum products? For example:

Do you know the past uses of the property?

X Yes (describe)

No

1884: Hardware Store/Hotel; 1888: General Store, Ag Implements/Dining;
1892: destroyed by fire; 1909: Bank, Saloon, Liquor Warehouse/Tailor, Plumbing, "Curios";
1926: Auto Sales and Repair/ Tailor, Auto, Storage; 1951-2016: Department Store/Retail

Do you know of chemicals, hazardous substances or petroleum products that are present or once were present at the property?

X Yes (describe)

No

1888 use: Agricultural Implements; 1926 use: Auto

Do you know of spills or other releases of chemicals, hazardous substances or petroleum products that have taken place at the property?

☐ Yes (describe) _____
☒ No _____

Do you know of any environmental cleanups that have taken place at the property?

☐ Yes (describe) _____
☒ No _____

9. The Degree of Obviousness of Contamination. E1527-13 and the federal AAI rule (40 CFR 312.31) require that the Phase I ESA consider the degree of obviousness of the presence or likely presence of contamination at the property, and the ability to detect the contamination by appropriate investigation. Based on your knowledge and experience related to the property, are there any *obvious* indicators that point to the presence or likely presence of contamination at the property?

☐ Yes (describe) _____
☒ No _____

10. Availability of Previous Environmental Reports. Are you aware of previous environmental site assessment reports, other environmental reports, documents, correspondence, etc. concerning the property and its environmental condition?

☒ Yes (please identify and provide copies, if available) _____
☐ No _____

Asbestos Survey Report (2018)
 Heating Oil Tank Assessment and Decommission bid (2020)

Signature: 

Name (printed): _____ Alice Cannon

Company: _____ City of The Dalles, Oregon

Title: _____ Community Development Director/Urban Renewal Manager

Date: _____ 09-30-2021

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-13), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E 2247-16), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E 1528-14) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property. Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

EXECUTIVE SUMMARY

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: Also known as Superfund, the National Priority List database is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund program. The source of this database is the U.S. EPA.

A review of the NPL list, as provided by EDR, and dated 07/29/2021 has revealed that there is 1 NPL site within approximately 1 mile of the target property.

Federal RCRA generators list

RCRA-VSQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Very small quantity generators (VSQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

A review of the RCRA-VSQG list, as provided by EDR, and dated 03/22/2021 has revealed that there are 4 RCRA-VSQG sites within approximately 0.25 miles of the target property.

State- and tribal - equivalent CERCLIS

OR ECSI: The Environmental Cleanup Site Information System records information about sites in Oregon that may be of environmental interest. The data come from the Department of Environmental Quality.

A review of the OR ECSI list, as provided by EDR, and dated 06/01/2021 has revealed that there are 27 OR ECSI sites within approximately 1 mile of the target property.

ADDITIONAL ENVIRONMENTAL RECORDS

Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 03/22/2021 has revealed that there are 5 RCRA NonGen / NLR sites within approximately 0.25 miles of the target property.

EXECUTIVE SUMMARY

ROD: Record of Decision. ROD documents mandate a permanent remedy at an NPL (Superfund) site containing technical and health information to aid the cleanup.

A review of the ROD list, as provided by EDR, and dated 07/29/2021 has revealed that there is 1 ROD site within approximately 1 mile of the target property.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR Hist Auto: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Auto list, as provided by EDR, has revealed that there are 3 EDR Hist Auto sites within approximately 0.125 miles of the target property.

<u>Equal/Higher Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>

EXECUTIVE SUMMARY

EDR Hist Cleaner: EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Cleaner list, as provided by EDR, has revealed that there are 2 EDR Hist Cleaner sites within approximately 0.125 miles of the target property.

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

NARR Comments: (April 24, 2009, Bob Schwarz) Mark Yinger Associates (Yinger) found hydraulic oil staining on the dirt floor in a portion of the basement. Lab analysis (lab report attached) indicated minor levels of contamination. Yinger told DEQ by phone that they plan to remove wooden planks containing oil and cover the dirt floor with concrete. On April 20, 2009, site owner Katherine Drabek signed an agreement to work with DEQ's Cleanup Program. However, buyer agreed a few days later to purchase the building without DEQ approval of remedial measures. Based on contaminant concentrations and proposed remedial measures, DEQ agreed to not pursue the site further.

Environmental Interest/Information System:

OR-DEQ (Oregon - Department Of Environmental Quality) is a regulatory agency whose job is to protect the quality of Oregon's Environment. DEQ uses a combination of technical assistance, inspections and permitting to help public and private facilities and citizens understand and comply with state and federal environmental regulations.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Quantity: 63000
Unit of Measure: Gallons
Release Date: 01/07/2015
Description: City of The Dalles reported an overflow of wastewater at the treatment plant from a 500-amp breaker trip to UV System. 63000 gallons of "re-energized system water" was released to the Columbia River yesterday. They weren't sure of they should report or not, thus the delay.

Lat/Long: 45.601023 / -121.17887
Source: Other
Media: Surface Water
Responsible Company: City of The Dalles
Responsible Address: 313 Court St.
Responsible City,St,Zip: The Dalles, OR 97058

Name: Not reported
Address: 105 LAUGHLIN ST
City,State,Zip: THE DALLES, OR 97058
Facility ID: 2019-2038
Incident Status: Referred/Closed
Material: Sewage
Quantity: Unknown
Unit of Measure: UNK
Release Date: 08/10/2019
Description: Caller is reporting that they had an extreme rain event lastnight, that submerged their UV equipment. Uv was off line from 2300 hours

Environmental Interest/Information System:

OR-DEQ (Oregon - Department Of Environmental Quality) is a regulatory agency whose job is to protect the quality of Oregon's Environment. DEQ uses a combination of technical assistance, inspections and permitting to help public and private facilities and citizens understand and comply with state and federal environmental regulations. RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:

OR-DEQ (Oregon - Department Of Environmental Quality) is a regulatory agency whose job is to protect the quality of Oregon's Environment. DEQ uses a combination of technical assistance, inspections and permitting to help public and private facilities and citizens understand and comply with state and federal environmental regulations.

AIR EMISSIONS CLASSIFICATION UNKNOWN

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

regulations.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Dispatched to a possible Hazardous Package call at the Wasco County Courthouse. Division Chief Jay Wood (102) responded initially to make contact with Wasco County Sheriff's Office personnel to determine a course of action. Once on scene, 102 met with Wasco County Sheriff's Sgt. Chris McNeel to determine the Incident Command (IC) Post Location and who was the Sheriff's IC. It was determined that Chief Deputy Lane Magill was in charge of the operation and he was inside the courthouse clearing occupants under an evacuation order. 102 attempted to determine if Oregon Emergency Response System (OERS) had been contacted to no avail. Chief Palmer (101) arrived and made contact with Sheriff Rick Eisland and a command post was located at 5th and Court Street. At that time, the Sheriff assumed command with 101 at the command post. 101 was contacted by Oregon State Fire Marshal (OSFM) Hazardous Materials Response Team 3 (HM3) our of Gresham Fire and Emergency Services who left a voice mail. 101 returned the call to HM3 and it was then determined that OERS had not dispatched HM3 as was initially thought. 101 asked that HM3 respond and the team agreed to do so. OERS had an incident number assigned to this call which is OERS# 2015-1651. Early in the course of events, 102 contacted Mid-Columbia Medical Center (MCMC) House Supervisor to give them advance notice of potential victims of contamination. They were further contacted several other times during the course of events to keep them updated and informed. It was determined that Wasco County Sheriff's Office and many other government offices throughout Oregon received letters that were in envelopes that had colored pencil and/or crayon printed delivery and return addresses. It was also reported that the letters were threatening in some manner as well as potentially containing an unknown substance. In other counties, the letters were opened and it was initially reported that the personnel who opened the letters ended up in the emergency department of their local hospitals. This was an unconfirmed report but since the threat was there, the HM team was requested. Once HM3 arrived on scene they were briefed by 101 and 102 along with Law Enforcement Personnel. The team made their preparations by donning their appropriate level Personal Protective Equipment at Level B. The team made entry and analyzed the letter for known substances with their detection devices. Their analysis determined that there was no hazardous substance within the letter. Once that was determined, the personnel who handled the letters were notified that there was no threat and no decontamination was needed. All units cleared the scene. A photo (attached) taken from KPTV.com shows what the letter looked like. The attached letter was sent to Hood River County.

Click Here:

Environmental Interest/Information System:

OR-DEQ (Oregon - Department Of Environmental Quality) is a regulatory agency whose job is to protect the quality of Oregon's Environment. DEQ uses a combination of technical assistance, inspections and permitting to help public and private facilities and citizens understand and comply with state and federal environmental regulations.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Created By: ECLARK
Created Date: 07/07/2009
Updated By: ECLARK
Updated Date: 07/07/2009
Decode for NarcdID: Remedial Action
NARR Comments: PCS discovered in basement of NAPA auto parts during The Dalles Streetscape Project in 2001. The source is believed to be hydrocarbon cont. related to the former use of the building as a service station w/ above ground tanks in the 1930's. 4 soil samples were taken at 20' intervals. GPH detected in 2 samples at 1300-2100 mg/kg. These 2 were then sampled for contaminants of concern. Benzene (0.054 and 0.017 mg/kg), ethylbenzene (1.3 and 0.13 mg/kg) xylenes (0.18 and 0.077 mg/kg) and naphthalene (0.029 and 0.016 mg/kg) were detected in the two samples containing gasoline. Each constituent was present at a concentration less than the DEQ generic risk based threshold values for the evaluated possible exposure pathways listed in DEQ Sept. 99 Guidance, <quot>Risk Based Decision Making for the Remediation of Pet. Cont. Sites<quot>. Toluene, EDB, EDC, leachable lead were < reporting limits. 44 tons of soil to Wasco LF. NFA issued by Warren Niemi on July 18, 2001. Liz Clark 7/7/09.

Environmental Interest/Information System:

OR-DEQ (Oregon - Department Of Environmental Quality) is a regulatory agency whose job is to protect the quality of Oregon's Environment. DEQ uses a combination of technical assistance, inspections and permitting to help public and private facilities and citizens understand and comply with state and federal environmental regulations.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of

events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and its Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

NARR Comments: (11/15/88 ADK/LUST) Unknown (6/20/02 DMC/SAS) Vapors in site basement believed to have been caused by plume or plumes from 2 leaking underground storage tank (LUST) sites across the street (Milt's Exxon and Arco #4018). Parking lot adjacent to the site was a gas station in the 1920s and may still have USTs on-site. Site referred to ER/Tanks program; no further action for ER/SAS. (2/3/04 DMC/SAS) According to ER/Tanks, contamination is no longer an issue at the site and it has been recently sold.

Updated By: GWISTAR
Updated Date: 09/22/2016
Decode for NarcdID: Contamination
NARR Comments: [2016] Several Phase I/II investigations were performed at the site from about 2003-05. Primary contaminants of potential concern are petroleum products - including PAHs - in soil and groundwater, and asbestos that may be friable in places. In addition, wood in the warehouse structure appears to pose a potential direct contact hazard for exposure to DDT.

Decode for NarcdID: General Site Description
NARR Comments: The site is a roughly a long rectangle that trends east-west. There are two large buildings and a grain elevator on the site. The largest structure is a 300-foot long by 50-foot wide warehouse that covers most of the western half of the site. Immediately east of the warehouse is the six-story flour mill. The grain elevator adjoins the SE corner of the flour mill. As of 2005, the buildings were not in use, and had not been operational since 1992.

Summary Details:

Conditions at proposal October 26, 1989): The Union Pacific Railroad Co. Tie-Treating Plant covers 83 acres in a mixed commercial and residential area just south of the Columbia River in the City of The Dalles, Wasco County, Oregon. Union Pacific owned the wood treatment facility from 1926 to late 1987, when equipment and structures were purchased by Kerr-McGee Chemical Corp.; however, Union Pacific retained ownership of the land and responsibility for all pre-1987 contamination of facility soil and ground water. The plant primarily treated railroad ties for Union Pacific, but also treated wood for other commercial users across the United States. From 1959 to November 1987, J. H. Baxter Co. operated the plant for Union Pacific. The facility treated wood with ammoniacal copper arsenate, creosote, a creosote/fuel oil mixture, and pentachlorophenol. Spills of treatment solutions on-site and waste water ponds no longer in use are thought to be the main source of contamination of soil and ground water. Improvements in the waste water treatment system allow the site to operate as a zero discharge facility. In 1984, Union Pacific began a comprehensive investigation of soil and ground water at the site. Creosote components, pentachlorophenol, fuel oil, ammonia, volatile organic compounds (VOCs), and arsenic are the major contaminants found in soil and ground water at the site. Contamination by arsenic and VOCs is greatest in the shallow and intermediate aquifers beneath the site. Organic contaminants, including phenanthrene and naphthalene, have been detected in the two deep confined aquifers beneath the site. Ground water is used by over 11,000 people within 3 miles of the site. The Dalles has increased its monitoring of the municipal supply wells. In May 1989, Union Pacific signed a Consent Order with the Oregon Department of Environmental Quality (DEQ) and agreed to undertake a remedial

investigation/feasibility study RI/FS) to determine the type and extent of contamination at the site and identify alternatives for remedial action. The RI/FS is scheduled to be completed by mid-1991. Status August 30, 1990): DEQ approved UnionPacific s workplan for the RI/FS in January 1990. The investigation is now underway.

NARR Comments: (5/2/05 DMC/SAS) Site screening recommended. (2/12/14 KJR/SAS) EPA completed a PA at this site in Nov. 2014. The PA documented the history of the property and current use by Oregon Cherry Growers. No sampling was performed. Additional actions at the federal level were not recommend in the PA. However, invesitgation is recommended by the state.

Decode for NarcdID: Site History
NARR Comments: [2/12/15] The property is currently owned and occupied by Oregon Cherry Growers (OCGI), who apparently purchased the parcels from the Port of the Dalles in approximately 1992. Prior occupants of the site include the Stadelman Fruit Company and Columbia Marine Shipyard (CMS). The CMS property comprised a roughly L-shaped area that included the vicinity of the current-day aeration pond, adjacent warehouse, and property west of the haul-out that fronted to the Columbia River. As long ago as 1950, the Stadelman Fruit Company owned and occupied the property inside the elbow that now comprises the southwest corner of the OCGI property. A property boundary map from 1950 depicts the location of the haul-out (i.e., barge way), adjacent railroad tracks, and parcel boundaries and their owners at the time. By the late 1970 s, CMS operations had ended, and Stadelman Fruit Company operations expanded to the CMS-occupied area to the east that included the haul-out way. After that acquisition, Stadelman Fruit Company converted the haul-out for use as a waste water treatment/aeration pond and developed Plant 2. With regard to CMS s occupancy, this site provided the maintenance, repair, and fabrication services for multiple CMS-affiliated shipping companies operating within the Columbia River basin and select tributaries. Specifically, development on the CMS property included the haul-out/barge way for vessel repair, maintenance, and fabrication; onsite engineering, steel fabrication, diesel engine overhaul, carpenter, and electrical shops; a diesel engine parts warehouse; and a floating dry-dock. The office building on the property provided logistical, personnel, and dispatch support. CMS-affiliated property west of the shipyard was also developed, with a 1.19-million-gallon petroleum storage facility (ECSI 4359) where fuel loaded from barges was held until being distributed by truck to end users.

NARR Comments: (10/19/88 JMO/SAS) In 11/86, workers constructing mitigation ponds for a riverfront park north of the JH Baxter Tie Plant in The Dalles discovered contaminated subsurface soils. DEQ was notified and soil samples were collected. Tested samples indicated measurable contamination by wood preserving constituents. An abandoned storm sewer that formerly carried runoff from the Tie Plant to the Columbia River was suspected as the source of contamination. CH2M-Hill was contracted by Union Pacific Railroad to collect and test soil samples from the park area and attempt to locate the abandoned storm sewer. CH2M-Hill did find contamination in very low concentrations. They concluded that contamination at the site was due to discharges of contaminants through the storm sewer.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 07/29/2021	Source: EPA
Date Data Arrived at EDR: 08/04/2021	Telephone: N/A
Date Made Active in Reports: 08/31/2021	Last EDR Contact: 09/01/2021

	Data Release Frequency: Quarterly

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Federal Delisted NPL site list

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425(e), sites may be deleted from the NPL where no further response is appropriate.

Data Release Frequency: Varies

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly known as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Data Release Frequency: Quarterly

Federal CERCLIS NFRAP site list

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be potential NPL site.

Date of Government Version: 07/29/2021	Source: EPA

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Date of Government Version: 03/22/2021	Source: Environmental Protection Agency

Federal RCRA generators list

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

RCRA-SQG: RCRA - Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

RCRA-VSQG: RCRA - Very Small Quantity Generators (Formerly Conditionally Exempt Small Quantity Generators)

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Very small quantity generators (VSQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

WA PTAP: PTAP Site Listing

A list of sites accepted into the Petroleum Technical Assistance Program. The Petroleum Technical Assistance Program (PTAP) expands the state's ability to respond to the high customer demand to clean up petroleum contaminated sites. Under the PTAP, the Pollution Liability Insurance Agency (PLIA) may provide informal site-specific technical consultations and issue written opinion letters to persons conducting independent remedial actions at qualifying petroleum cleanup sites. PLIA may provide these services under the authority of RCW 70.149.040(9) and the Model Toxics Control Act (MTCA), Chapter 70.149 RCW and Chapter 173-340 WAC.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

RCRA NonGen / NLR: RCRA - Non Generators / No Longer Regulated

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

HIST FTTS INSP: FIFRA/TSCA Tracking System Inspection & Enforcement Case Listing

A complete inspection and enforcement case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historical Auto Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

EDR Hist Cleaner: EDR Exclusive Historical Cleaners

EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

NY MANIFEST: Facility and Manifest Data

Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a TSD facility.

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:

Source: American Hospital Association, Inc.

Telephone: 312-280-5991

The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing

Source: Centers for Medicare & Medicaid Services

Telephone: 410-786-3000

A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

Nursing Homes

Source: National Institutes of Health

Telephone: 301-594-6248

Information on Medicare and Medicaid certified nursing homes in the United States.

Public Schools

UTM X (Meters):	641916.4
UTM Y (Meters):	5051092.0
Elevation:	103 ft. above sea level

USGS TOPOGRAPHIC MAP

Target Property Map:	6067178 THE DALLES SOUTH, OR
Version Date:	2014

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General NNE

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

<u>Flood Plain Panel at Target Property</u>	<u>FEMA Source Type</u>
4102370002B	FEMA Q3 Flood data
<u>Additional Panels in search area:</u>	<u>FEMA Source Type</u>
5300990525B	FEMA Q3 Flood data
4102290013B	FEMA Q3 Flood data

4102370003B	FEMA Q3 Flood data

NATIONAL WETLAND INVENTORY

<u>NWI Quad at Target Property</u>	<u>NWI Electronic Data Coverage</u>
THE DALLES SOUTH	YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

<u>MAP ID</u>	<u>LOCATION FROM TP</u>	<u>GENERAL DIRECTION GROUNDWATER FLOW</u>
Not Reported		

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. The following information is based on Soil Conservation Service SSURGO data.

Soil Map ID: 1

Soil Component Name: Rock outcrop

Soil Surface Texture:
Hydrologic Group: Class D - Very slow infiltration rates. Soils are clayey, have a high water table, or are shallow to an impervious layer.

Soil Drainage Class:
Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: Not Reported

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)

Source: United States Geologic Survey

EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Current USGS 7.5 Minute Topographic Map

Source: U.S. Geological Survey

HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.

Source: FEMA

Telephone: 877-336-2627

Date of Government Version: 2003, 2015

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005 and 2010 from the U.S. Fish and Wildlife Service.

Telephone: 503-378-2166

HYDROGEOLOGIC INFORMATION

AQUIFLOW^R Information System

Source: EDR proprietary database of groundwater flow information

EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit

Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

Telephone: 800-672-5559

SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

LOCAL / REGIONAL WATER AGENCY RECORDS

FEDERAL WATER WELLS

PWS: Public Water Systems

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS)

This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

Telephone: 703-356-4020

The National Radon Database has been developed by the U.S. Environmental Protection Agency (USEPA) and is a compilation of the EPA/State Residential Radon Survey and the National Residential Radon Survey. The study covers the years 1986 - 1992. Where necessary data has been supplemented by information collected at private sources such as universities and research institutions.

EPA Radon Zones

Source: EPA

Telephone: 703-356-4020

Sections 307 & 309 of IRAA directed EPA to list and identify areas of U.S. with the potential for elevated indoor radon levels.

OTHER

Airport Landing Facilities: Private and public use landing facilities

Source: Federal Aviation Administration, 800-457-6656

Epicenters: World earthquake epicenters, Richter 5 or greater

Source: Department of Commerce, National Oceanic and Atmospheric Administration

Earthquake Fault Lines: The fault lines displayed on EDR's Topographic map are digitized quaternary faultlines, prepared in 1975 by the United State Geological Survey

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

Portland, OR 97204
Contact: Len Farr

EDR Topographic Map Library has been searched by EDR and maps covering the target property location as provided by Stantec were identified for the years listed below. EDR's Historical Topo Map Report is designed to assist professionals in evaluating potential liability on a target property resulting from past activities. EDR's Historical Topo Map Report includes a search of a collection of public and private color historical topographic maps, dating back to the late 1800s.

Search Results:**Coordinates:**

P.O.# 185751306
Project: 209 E 2nd Street

Latitude: 45.601893 45° 36' 7" North
Longitude: -121.182537 -121° 10' 57" West
UTM Zone: Zone 10 North
UTM X Meters: 641735.77
UTM Y Meters: 5051423.06
Elevation: 100.67' above sea level
