

Approximate
Extent of
TCE Plume
(Based on
1 ppb Contour)

KEY

- TSA Monitoring Well
- Approximate Trichloroethene Concentration Contour (ug/L)
- 5 (5/94) Trichloroethene Concentration (ug/L) and date, if different than August 1994 (ND - Not Detected)

Notes: 1. Data are averaged for well pairs:
BOP-23ds.dg; D-17ds.dg; CMW-14ds.dg;
CMW-22ds.dg; DEO-3s.i; and EMC-2ds.dg.
2. Where field duplicate or split sample results are available, the maximum concentration is shown.
3. Where multiple samples were collected within August 1994 or within the month annotated, the maximum concentration is shown.

Approximate Extent of TCE in the TSA Conglomerate: August 1994 Figure 4-31
