Re: Request for Extension on Stack Test Report

Heather,

PCC Structural (PCC) is continuing to address the information requested in your letter dated June 5, 2025. PCC was able to schedule the testing of Baghouse 8901 (item 1 of the information request) during the last week of July, and testing was completed on August 1, 2025. Per the information request, the test report is due 60 days after completion of testing, which is September 30, 2025. As we discussed during our call on September 16, 2025, the source testing firm (Mostardi Platt) has not yet provided a draft test report for PCC and our consultants to review. Mostardi Platt has also not provided a firm timeline of when we will have a draft to review.

We understand the September 30, 2025 test report submittal deadline is now just under 15 days away. However, due to the uncertainty around when the test report will be finalized, we are nonetheless requesting a 17 day extension to the deadline. Preparation of the test report is beyond the control of PCC. As you are aware, reviewing the test report before final submittal is a necessary step to check the accuracy and completeness of the report, which can lead to additional time needed for the testing firm to incorporate updates into the final version. It is for these reasons that we believe this extension is necessary and for good cause, as required by OAR 340-245-0030(3). We will remain in close contact with Mostardi Platt as they work on completion of the test report.

We appreciate your consideration of this request, please let us know if you would like to have a call to discuss it further.

Thank you,

On behalf of PCC Structural, Inc.
