Re: Notice of Permit Modification  
Class 1 Permit Modification-M132  
ORD 089 452 535

Dear Mr. Denson,

On September 12, 2025, Chemical Waste Management of the Northwest (CWMNW) submitted a Class 1 permit modification request, number M132, to update the facility's Waste Analysis Plan (Standalone Document #1) to add EPA Method 6020B and make a series of minor corrections. The Waste Analysis Plan describes the processes the facility uses to profile proposed waste streams for acceptance, confirm the identity of wastes received at the facility and determine if wastes have been treated to a concentration required for Land Disposal Restriction requirements. CWMNW submitted the permit modification request to DEQ in accordance with 40 CFR 270.42(a) as incorporated in OAR 340-100-0002(1).

Based on a Departmental review of the M132 permit modification application and supplemental information, the modifications to the Waste Analysis Plan (Standalone Document #1) was determined to be a Class I modification pursuant to 40 CFR 270.42(a) and (d)(2)(i). Additionally, since the nature of the modification was found to be "minor" and part of the "routine operation" of the facility additional Director approval is not necessary in this case.

If you have any questions, please contact Spencer Bohaboy of my staff at 971-263-1075.

Sincerely,

Ron Doughten  
Manager, Eastern Region  
Materials Management & Hazardous Waste
