

Bethel-Danebo Closed Landfill Progress Report

For February 2016

Actions during this month:

- Blower has run continually without issue since June the 25th.
- The blower vacuum continually runs around 8.0 since the soils have been saturated this fall.
- **Actions scheduled to be taken within the next two months:**
- Continue sampling schedule.

Problems experienced during the month:

- Landtec has had our GEM5000 for almost the entire month of February. I had expected it back a couple weeks ago from its annual calibration service. As a result I have not been able to get analytical for February. As soon as the GEM5000 is returned sampling will be done.
- GEM5000 annual calibration cost \$1,515.00
