

Bethel-Danebo Closed Landfill Progress Report

For February 2017

Actions during this month:

- Regular sampling.
- Blower has run continually without issue since June the 25th 2015.
- The blower vacuum is at 8.5. The soils are saturated with standing water in several locations on the site.
- The gas monitor was at the factory for service and returned.

Actions scheduled to be taken within the next two months:

- Continue sampling schedule.
- Site review.

Problems experienced during the month:

- Most probes that are ground surface termination were flooded in the probe.
