Re: Extension of the Toxic Emissions Inventory Submission Requirement
Due Date Under Cleaner Air Oregon

Dear Ms. Devita-McBride:

In reference to the ODEQ letter dated December 19, 2025, requesting additional updates to the CAO Emissions Inventory (Inventory), Biomass One, LP, is requesting a 60-day extension to the February 2, 2026, deadline for submission of the Inventory due to the untimely passing of one of our environmental compliance team members. We have also been without another environmental compliance team member as he faces a long-term recovery process from the surgery of a serious leg injury. He was the principal architect of the Inventory submittal. He is optimistic that his injury will be healed enough for him to return to work in late February or early March. The early April extension request will allow him time to review the materials used to develop the inventory. If the recovery process allows an earlier return to work, Biomass One, LP will make every effort to submit the Inventory before the extension request deadline in early April.

Thank you for considering this request.

Respectfully Submitted,

Kurt E. Lumpkin | General Manager
