Tony Valladares,

DEQ called in the ATI Specialty Alloys & Components, LLC (ATI) facility in Millersburg, OR to the Cleaner Air Oregon (CAO) program on September 5, 2025. On November 18, 2025, DEQ received a request from ATI for a partial extension of the deadline for submittal of the CAO Emissions Inventory (Inventory), which DEQ granted on November 21, 2025. To date, DEQ has received the following partial Inventory submittals:

- Inventory Part 1: Process flow diagrams; Categorical Exempt Toxics Emissions Units (TEUs) Form AQ523; and emissions information (AQ520 form) for the natural gas combustion and emergency engine TEUs initially submitted on December 4, 2025 (Your DEQ Online Submittal ID 72766), and revised February 19, 2026.
- Inventory Part 2: Emissions information (AQ520 form) for all cooling towers, pickling tanks, and abrasive blasting TEUs submitted on February 19, 2026. Emissions for these TEUs were combined in a single AQ520 with the TEUs from Inventory Part 1.

DEQ anticipates receiving the following partial Inventory submittals by April 17, 2026:

- Revisions to the Inventory Parts 1 and 2 requested by DEQ in a March 13, 2026, comment letter.
- Inventory Part 3: Emissions information (AQ520 form) for the baghouses, tank scrubbers, and gasoline dispensing facilities TEUs identified by ATI in their April 8, 2026 submittal.

As specified in DEQ's letter dated February 26, 2026, DEQ met with ATI on April 9, 2026, to discuss the timeline for submitting the remaining Inventory information. Based on that discussion, and in accordance with [Oregon Administrative Rule \(OAR\) 340-245-0030\(1\)&\(3\)](#), ATI must provide the following information by **90 days** after the issuance date of this letter or **July 9, 2026**:

1. An Inventory including the Grinding 3:1 Baghouse (EU-04), Micro Grind Baghouse (EU-AI), Chloride Can fugitives, and facility-wide MIBK use TEUs. The Inventory should include the AQ520 form and all supplemental documentation required under [OAR-340-245-0040\(4\)](#). A separate AQ520 form including only these TEUs may be used instead of adding to the previously submitted AQ520 form.

Given the complexity of ATI's operations, DEQ plans to continue to review partial Inventory submittals and meet with ATI on a regular basis to provide feedback and discuss due dates for submittal of the remaining required Inventory information and any necessary updates until final approval of the complete Inventory for all activities at this facility. ATI must schedule a meeting with DEQ to establish a submittal plan for the fifth partial Inventory submittal, to take place no later than **July 24, 2026**.

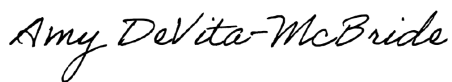

DEQ requests that you submit additional information to complete your Inventory. If you think that any of

that information is confidential, trade secret or otherwise exempt from disclosure, in whole or in part, you must comply with the requirements in [OAR 340-214-0130](#) to identify this information. This includes clearly marking each page of the writing with a request for exemption from disclosure and stating the specific statutory provision under which you claim exemption. Emissions data is not exempt from disclosure.

DEQ remains available to discuss this information request with you and answer any questions you may have. Failure to provide additional information, corrections, or updates to DEQ by the deadlines above may result in a violation of [OAR 340-245-0030\(4\)\(b\)](#).

If you have any questions regarding this letter, please contact me directly at (971) 300-3653 or amy.devita-mcbride@deq.oregon.gov. I look forward to your continued assistance with this process.

Sincerely,

Amy DeVita-McBride
Cleaner Air Oregon Project Engineer
