RE: Cleaner Air Oregon Emissions Inventory Data Request Deadline Extension

In regards to DEQ's May 13, 2026 letter requesting additional information related to Boeing Portland's Cleaner Air Oregon (CAO) Emissions Inventory, Boeing Portland is requesting an extension of the deadline to provide the requested information to October 15, 2026 (90 days) consistent with OAR 340-245-0030(3).

Boeing is requesting the extension for the information requested in the May 13 letter (including a revised DEQ form AQ520) in order to collect, process and integrate information about emissions sources that have previously not been considered, do not vent emissions outside of the facility walls and or for which existing methodologies either do not exist or require adaptation (e.g. hand finishing and abrasive blasting). Collection of this data and emissions inventory integration will also require obtaining information from equipment manufacturers, identifying and evaluating confidential business information, creating equipment inventories for equipment that has not been inventoried and developing a way to represent the processing of materials through this equipment that translates into air emissions.

Please let me know if there are any questions,

Respectfully,
Boeing Portland

Jeff Kosta
Environmental Engineer
