Subject:	Status Update: NETL Albany Groundwater Infrastructure Installation & Sampling
Date:	Tuesday, September 8, 2026 12:10:50 PM
Attachments:	image004.png image006.png

Hi Margaret & Bruce,

NETL Albany and our contractor have completed installation of the offsite groundwater and soil gas monitoring well infrastructure per our DEQ approved workplan. We've also performed the initial sampling event.

The well infrastructure specified in the workplan was installed this summer over the course of three installation events.

The contractor team also performed the initial sample collection. The team was unable to sample two of the newly installed soil gas monitoring points as they were found to be flooded at the time of sampling, and one of the monitoring well caps had seized and the team was unable to open the well.

I am preparing a memo detailing the completed work currently. Please let me know if you would like me to schedule some time to discuss with the NETL team.

Thanks,

Elizabeth Youngblood
