RE: STOP Signs Needed at Main & Second Streets, Old Town Sherwood, Oregon

As residents of Main and Second Streets, we are concerned about the recent increase in the amount and speed of traffic in this area. Of particular concern is the speed observed traveling both directions along Main Street. It is felt that more people are using Main Street to avoid the stop sign at Washington & Second. While some do drive at a speed which is reasonable for this residential neighborhood with its numerous small children, many drivers accelerate excessively through the intersection at Second Street. Several "close calls" between vehicles and/or bicycles have been observed recently at this intersection.

We hereby request that a four-way STOP be instituted at the intersection of Main & Second Streets. This will help alleviate the acceleration along Main Street between First and Third, and will create greater watchfulness for cross-traffic at this intersection. With population rapidly increasing in the areas surrounding Old Town, the overall traffic pattern in these residential neighborhoods must be controlled to avoid possible tragedy *before it happens.* *[As these signatures were being collected, special concern with the before- and after-school traffic to and from the high school was frequently expressed.]*
