RE: Signing of West Division and Washington Street

INFORMATION: This intersection has received attention recently due to the increased traffic moving through the intersection. We have had calls from citizens who travel through this intersection requesting its reevaluation. We recently had an accident at this intersection wherein a lady was injured.

ACTION: This intersection needs additional signage to control the traffic flow westerly on Division Street as it intersects with Washington Street. The sign should allow a free right turn at all times to proceed north on Washington. The stop sign would cause motorists to stop before proceeding west on Division. It should also inform the motorist to yield to the uphill or southbound traffic on Washington Street.
