Re: Response to DEQ letter dated June 5, 2025

Dear Heather,

PCC Structurals (PCC) is continuing to address the information requested in your letter dated June 5, 2025 concerning the CAO emissions inventory for PCC's LPC facility (the letter). PCC originally proposed to provide responses to the remaining items from the letter within 30 days of DEQ approving the final stack test report for Baghouse 8901. DEQ approved the stack test report on March 23, 2026 (the stack test approval).

As you are aware, the CAO emissions inventory developed for LPC is large and complex. Changes requested in the letter have required structural updates to the emissions inventory for which additional development and review must be completed before the emissions inventory can be submitted. The amount of information requested, and the level of required revision to previously submitted documents, represents a significant amount of work and requires the involvement of various groups both internal and external to PCC.

PCC and PCC's consultants have been supporting other regulatory programs (including Climate Protection Plan permitting and annual reporting) since submitting the original stack test report in October 2025. As we focus on responding to the letter, it is clear that limited additional time beyond April 22nd will be needed to effectively complete the responses.

For the reasons stated above, we are requesting a 21-day extension to the April 22nd deadline for deliverables identified in the letter. This would change the due date for PCC's responses to the letter to May 13th, 2026. Although we have made progress in responding to the letter, an extension is necessary for good cause, consistent with OAR 340-245-0030(3).

5001 SE Johnson Creek Blvd • Milwaukie, Oregon 97222 - 4123 • Phone (503) 777-3881 • Fax (503) 788-6535

We appreciate your consideration of this request.

Thank you,

On behalf of PCC Structurals, Inc.
