RE: Due Date Notification for Wastewater TEU Emissions (Emissions Inventory Submittal #4)

John Schaab and Jim Evers,

On May 29, 2025, Intel Corporation (Intel) received notice that the Gordon Moore Park at Ronler Acres Campus and the Aloha Campus (DEQ Air Quality Source Number 34-2681) were called into the Cleaner Air Oregon (CAO) program. On August 11, 2025, DEQ received a request from Intel for a partial extension of the deadline for submittal of the CAO Emissions Inventory (Inventory), which DEQ granted on August 14, 2025. Given the complexity of Intel's operations, DEQ plans to continue to review partial Inventory submittals and meet with Intel on a regular basis to provide feedback and discuss due dates for submittal of the remaining required Inventory information and any necessary updates.

To date, DEQ has received the following partial Inventory submittals:

- Submittal #1: Emissions Inventory (AQ520 form) for the natural gas combustion units and cooling tower Toxics Emissions Units (TEUs), and facility-wide process flow diagrams: initially submitted August 26, 2025, with additional information and revisions submitted on November 4, 2025, January 16, 2026, February 13, 2026, April 3, 2026, and June 1, 2026;
- Submittal #2: Emissions Inventory (AQ520 form) and documentation for emergency generator and fire pump TEUs: initially submitted on October 30, 2025, with additional information and revisions submitted on January 28, 2026, February 4, 2026, February 13, 2026, April 3, 2026, and June 1, 2026.
- Submittal #3: Emissions Inventory (AQ520 form) and documentation for storage tanks and exempt TEU information: initially submitted February 17, 2026, with additional information and revisions submitted on March 27, 2026, June 9, 2026, July 1, 2026, and July 20, 2026.

At this time, DEQ is not requesting additional information or revisions related to Submittals #1 and #2. DEQ is currently reviewing Submittal #3.

As specified in DEQ's approval of Intel's extension request, DEQ met with Intel on September 12, 2025, to discuss the timeline for submittal of the remaining Inventory information. Based on that discussion and in accordance with Oregon Administrative Rule (OAR) 340-245-0030(1)&(3), Intel must submit the following information by **September 30, 2026**:

1. An Emissions Inventory for all wastewater process TEUs, including:
    a. A complete AQ520 form;
    b. All supplemental documentation required under OAR 340-245-0040(4), including but not

limited to emissions model files, emissions methodologies, analytical data, safety data sheets, and other documentation used to develop emission rates;

c. Updated process flow diagrams as needed to map TEU IDs, Stack/Fugitive IDs, and pollution control devices to those listed in the AQ520 form; and
d. A description of any wastewater process activities that are categorically exempt under OAR 340-245-0060(3)(b).

DEQ requests that you submit additional information related to your Inventory. If you think that any of that information is confidential, trade secret or otherwise exempt from disclosure, in whole or in part, you must comply with the requirements in OAR 340-214-0130 to identify this information. This includes clearly marking each page of the writing with a request for exemption from disclosure and stating the specific statutory provision under which you claim exemption. Emissions data is not exempt from disclosure.

DEQ remains available to discuss this information request and answer any questions you may have. Failure to provide additional information, corrections, or updates to DEQ by the deadlines in this letter, may result in a violation of OAR 340-245-0030(1).

If you have any questions regarding this letter, please contact me directly at 503-866-9643 or julia.degagne@deq.oregon.gov. I look forward to your continued assistance with this process.

Sincerely,

Julia DeGagne
